* Pursuant to notice cum addendum no. 62/2023, the name of schemes of Mirae Asset Mutual Fund has been changed with effect from December 15, 2023.

EQUITY UPDATE

- The Nifty Index recorded a gain of 1.6% in March 2024, while in FY2024 it was up 29% (best performance in 20 years). During March 2024, Mid-cap. (-0.5%) and Small-cap. (-4.4%) indices underperformed the Nifty Index; however, on a FY basis, mid-cap. and small-cap. indices were up 60% and 70%, respectively
- Sector-wise, capital goods, auto and metals were up 6.1%, 5% and 5%, whereas IT, realty and Fast Moving Consumer Goods(FMCG) declined to 7.2%, 1.2% and 0.7% in March 2024.
- Most of the global markets ended on a positive note. Taiwan (+7%), Germany (+4.6%) and the UK (+4.2%) were the major gainers.

Global Macros

- Bond yield:** The US 10-year bond yield fell marginally from 4.25%(as on February 29, 2024) to 4.2% (on March 29, 2024).
- Crude:** Brent crude future prices increased to US\$87.48/bbl on March 29, 2024, from US\$83.55/bbl on March 1, 2024 and spot prices fell marginally to US\$86.96/bbl on March 29, 2024 from US\$87.39/bbl on March 1, 2024.

Domestic Macros

- Fitch Ratings Upgrades India GDP estimates:** The ratings agency in its March Outlook report said expects India's real GDP for FY25 to grow by 7 percent, a 0.5 percentage points upwards revision.
- GST Collection:** GST revenue collection in the month of February 2024 was at Rs 1.78 lakh crore, up by around 11.5% on an annual basis. This is the second highest monthly collection on record. With this, the monthly GST revenues has remained over Rs 1.5 lakh crore for 13 consecutive months. Total collections in FY2024 amount to Rs20.2 tn (up by 11.6% over total FY2023 collections at Rs18.1 tn).
- Credit Growth:** As per latest RBI data, system credit growth stood at 16.5% YoY for the fortnight ended March 8, 2024.
- Inflation:** February 2024 Consumer Price Index inflation was unchanged at 5.1% (January: 5.1%). Core inflation remained benign at 3.4%. February 2024's Wholesale Price Index inflation moderated to 0.2% from 0.3% in January 2023.
- Currency:** INR was relatively steady for most part of March around Rs82.8/US\$ before depreciating in the last week of March to Rs83.4/US\$ (on March 28, 2024) due to rising US Dollar strength. Overall, the INR has depreciated by 0.6% in March 2024.

Regulatory, policy and market developments

- Equity trading trends:** FPIs bought US\$3.2 bn of Indian equities in the secondary market, whereas DIs bought US\$6.8 bn.
- General Elections:** The Lok Sabha elections in 2024 have been scheduled to be conducted in seven phases, commencing from April 19,2024 and concluding on June 1,2024. The results will be announced on June 4, 2024.

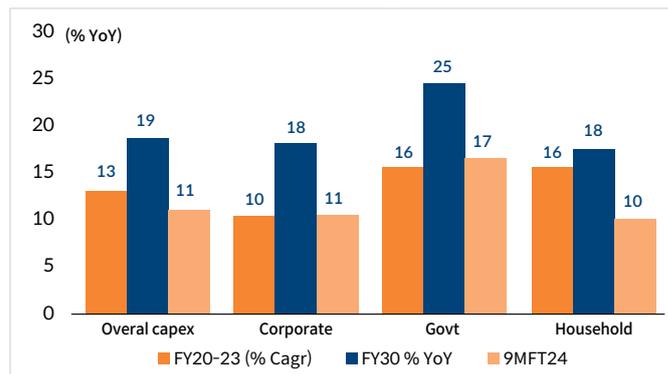

Outlook

- India stands out positively in global context:** Large part of the global economies will undergo elections in 2024 including India. However for India, likely continuity of incumbent will ensure continuation of supportive policy actions. For India, all the three elements of the capex cycle (Housing, Corporate Capex & Govt Capex) are now firing and hence the potential global slowdown should have limited impact on India. Over the medium term, we continue to remain constructive on equities and believe India is on the cusp of achieving robust growth over the next few years.
- Corporate earnings continue to remain strong:** Nifty earnings have risen at a 17% CAGR over FY20-24E, matching pace with the Nifty 50 index rising by ~80% during the past 4 years. Earnings outlook is still robust for FY25/CY24 as rising corporate spending and strong bank balance sheets anchor earnings growth in mid-teen over the medium term. Compared with the other major economies, India has shown more robust and consistent earnings performance. Visibility of India's cyclical upturn, full-blown capex cycle, robust demand and expected interest rate easing in the second half of CY24 gives confidence in Indian companies to deliver healthy earnings growth next year
- High Frequency Indicators remain healthy:** Economic Indicators reflect stability in macro trends with capex strong but consumption weak. Moderating inflationary headwinds should augur well for consumption recovery.
 - Inflation is moderating (CPI/WPI was 5.09%/0.2% respectively) and RBI expects Consumer Price Index (CPI) to decline to 4.0% by mid'24, though it remains watchful on food inflation near term.
 - Capex-linked indicators have been healthy during FY24 but could moderate before elections. Steel consumption growth was at 8.8% YoY for Feb'24. Cement production (5.6%YoY for Jan'24) is sequentially ticking up.

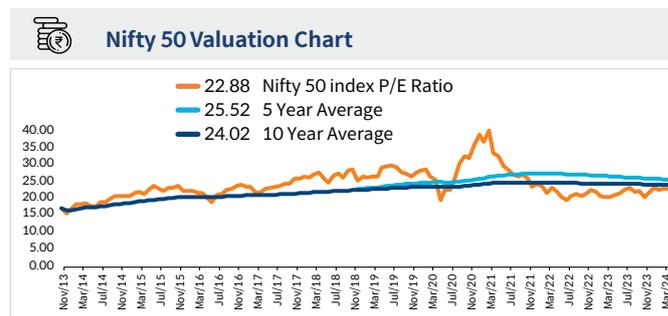

Property indicators continued to be strong with Primary property sales for Jan24 vols at +13.5% YoY. Credit data for banks stayed robust at 16.5% YoY in February, marginally up by 0.5ppt MoM.

- Consumption trends show modest recovery. Rural demand has been weak since COVID and is showing signs of a gradual recovery on a favourable base. IMD expects El-Nino to weaken during First Half of CY24 and hence expects a normal monsoon during CY24 which augurs well for recovery in rural demand.
- Key things to watch out are:** (a) Newsflow on Indian elections, (b) Oil price trend, (c) rate trajectory by the central banks and (c) Russia-Ukraine & Middle-East war impact on global supply chain.
- Valuation and view:** Midcap/small cap indices have outperformed the Nifty50 by 37/50% in last 1 year and could be due to strong flows in funds focused on mid/small caps (at a cyclical high). On the other hand large cap stocks have seen outflows (flows are at a cyclical low). As a result, Mid/Small cap stocks are trading at a significant premium to largecap. Nifty 50 is at reasonable valuation of ~20.5x on FY25 earnings with good earnings growth outlook. In this context, currently large cap focused funds appear well placed.
- Recommendation:** Investors should invest based on their risk profile and continue allocating via SIPs. We prefer large-cap oriented funds and hence any fresh allocations can be made in diversified funds like largecap, Flexicap and Multicap. Hybrid funds, given their flexibility in asset allocation can also be made part of core portfolio. In thematic funds, financial sector is trading at attractive valuations and hence can invest in BFSI(Banking Financial Services,and insurance) fund.

DEBT UPDATE

Executive Summary

Subdued global economy, soaring debt levels globally, geopolitical risks & still persistent inflation levels continue to plague the global economy. While the world still awaits ease in monetary policy, the global economy seems to be relatively resilient.

Against a backdrop of evolving economy and fluctuating sentiments, India continues to show a narrative of resilience and adaptability. Marked by robust economic growth, high foreign flows into the market and a stable Indian rupee.

Global Macros

While the United States (US) Federal Reserve kept the target range for the federal funds rate at its 23-year high of 5.25% - 5.50% for fifth consecutive meeting in March 2024, they might continue to maintain initial forecasts of three rate cuts in 2024 and projecting a shallower rate cut cycle beyond 2025. This reiterates to the central bank's confidence that elevated levels in inflation is unlikely to derail the progress made so far. Chairman of Federal Open Market Committee (FOMC), Jerome Powell has again emphasized the importance of inflation moving back to the target of 2% before they ease the monetary policy.

The US Economy showed mixed signals, as indicated by data points below-

- S&P Purchasing Managers Index (PMI) for Mar-24 was slightly lower at 52.2 vs 52.5 for Feb-24, with contribution from Manufacturing stronger and Services weaker than expected.
- US ISM Manufacturing Index for Feb-24 at 47.8 was lower than 49.1 for Jan-24.
- US ISM Services Index for Feb-24 at 52.6 was lower than 53.4 for Jan-24.
- US Non-Farm Payrolls for Feb-24 was at 275k. However, Jan-24's reading was revised downwards from 353k to 229k.
- US Unemployment Rate for Feb-24 at 3.9% was higher than 3.7% for Jan-24.
- US Consumer Price Index (CPI) for Feb-24 at 3.2% was higher than 3.1% for Jan-24; Core fell to 3.8% vs 3.9% for Jan-24.
- US New Home Sales for Feb-24 declined by -0.3% vs 1.7% for Jan-24.
- US Retail Sales for Feb-24 at 0.6% was higher than -1.1% for Jan-24.

Bank of England (BoE)'s Monetary Policy Committee (MPC) left interest rates unchanged at 5.25% on 21st March 2024 until they meet the 2% inflation target. Currently, the inflation rate of the United Kingdom (UK) economy for Feb-2024 is at 3.4% vs 4.0% in Jan-2024. UK MPC is primarily focusing on price stability in its framework. UK Gross Domestic Product (GDP) for Q4 CY2023 declined at 0.3% in line with Q3 CY2023.

European Central Bank (ECB) maintained its interest rates again at 4.5% (also historically high), as policymakers are concerned over potential recession with persistently elevated inflation levels in the economy. Eurozone CPI for Feb-24 at 2.6% was slightly lower than 2.8% in Jan-24, primarily due to decline in energy prices.

In a widely anticipated move, Bank of Japan (BoJ) decided to hike interest rates for the first time since 2007 to around 0% to 0.1% from -0.1%, mainly due to its still persistent inflation levels in the economy. The central bank also scrapped the yield curve control (YCC) policy implemented on its 10-year government bond in September 2016. Japanese Inflation levels went up to 2.8% in Feb-2024 from 2.2% in Jan-2024, accelerating sharply in the last four months.

People's Bank of China (PBoC) maintained status quo on 1-year policy rate at 3.45% as well as 5-year prime rate at 3.95% in March 2024 meeting. Both policy rates are at record lows as the central bank seeks to turn around the economy in the face of headwinds from the declining property sector as well as weak export revenue. The central bank further signaled room for more rate cuts. China's inflation levels have come back into the positive territory at 0.7% in Feb-2024 (highest in 11 months) after nearly 4 months of persistent deflation in the economy. The rise in inflation was majorly due to robust spending during Lunar New Year Holiday.

- Gold prices continues to glitter amid global tensions. Gold prices are at \$2,250/oz after gaining 10% in Q1 CY2024, due to strong retail buying in China & Turkey. However, volatility in the yellow metal also remained high due to a slowdown in global growth.
- Brent crude oil prices edged down slightly due to expectations of tighter supply from Organization of the Petroleum Exporting Countries (OPEC+) cuts, attacks on Russian refineries and upbeat Chinese manufacturing data.

Domestic Macros

- The Indian Economy, on the other hand, has continued its strong momentum in the face of global headwinds and uncertainties.
- Inflation Rate in India inched slightly lower to 5.09% in Feb-2024 from 5.10% in Feb-2024. However, the current inflation rate remains in RBI's tolerance band of 2 - 6%.
- Domestic Manufacturing Purchasing Managers Index (PMI) touched a high at 59.1 in Mar-24 as against 56.9 for Feb-24, reflecting robust manufacturing activity while Services PMI has slightly eased to 60.3 in Mar-24 against 60.6 in Feb-24.
- GST collections remained buoyant, reaching ₹1.78 lakh crore in Mar-2024 from ₹1.68 lakh crore in Feb-2024. Collections of GST e-way bills marked an impressive year-on-year growth of 18.9%.
- India's Current Account Deficit narrowed to \$10.5 billion in Q3 FY24 from \$16.8 billion in Q3 FY23.

Debt Outlook

Reserve Bank of India (RBI) has maintained status quo on policy rates while remaining nimble in managing liquidity in its MPC meeting in April 2024. Domestic liquidity remained in surplus with month end spending by RBI continuing to absorb liquidity by way of Variable Reverse Repo Rates (VRRRs). Money Market Yields are expected to soften.

Borrowing calendar for dated securities for H1 FY25 at ₹7.5 lakh crore was lower than the market expectations of ₹8.5 lakh crore, which represented a 15.50% decline YoY. The share of borrowings declined across the curve barring 10-year government bond, which marked an increase of 5.5%. New 50-year government security was also introduced into the borrowing calendar.

On the economic growth front, expectations of a healthy yet much slower growth in FY25E led by cyclical headwinds such as relatively weak exports, tighter lending standards, and agriculture sector performance.

Markets are expected to be driven by global rate cut expectations in the second half of the year and massive net Foreign portfolio Investment (FPI) flows in the debt market, however still expected to experience some volatility.

How to read a Mutual Fund Factsheet?

Know how your money is managed

The benefits of investing in mutual funds are well known. However, buying them on face value is not enough. Investors should know how their money is managed. They should research as much as possible on a scheme's strategy, performance, risks involved and how the money is invested. Many investors shy away from this exercise as they consider it cumbersome. To make life easy for investors, mutual funds disclose a fund factsheet which details the quintessential information required before investing.

The factsheet is a concise document with a plethora of information about how the fund is managed; it is disclosed on a monthly basis. This article tries to decode the factsheet and explains how investors should use it for making investment decisions.

Five things to look out for in mutual fund factsheets

Basic information

The factsheet provides all the general information on the funds its objective or philosophy, options (growth or dividend), plans (direct and regular), net asset value (NAV) of each plan, minimum investment amount, systematic features (SIP, SWP, STP) and assets under management (AUM) data.

It is important to know about the fund's exit load, as it gets deducted from total gains if the investor exits during a specific period after investment. It is a small penalty charged on prevailing NAV to discourage premature redemption. Different schemes have different exit loads, while few such as Overnight funds generally do not have exit load. Some funds have a fixed exit load and some have a tiered structure. For instance, a fund may have nil exit load if the investor withdraws up to 10% of units per year. For units more than 10%, it charges 3% for exit before 12 months, 2% for exit before 24 months, 1% for exit before 36 months and nil after that.

Investors should look out for the fund's product labeling and riskometer. Product labeling underlines product suitability for investors. It tells about ideal investment time frame required to benefit from the fund and where it invests. Riskometer is a presentation that helps investors measure the risk associated with the fund. It presents six levels of risks - low, Low to Moderate, moderate, moderately High, High and Very High. Since an equity fund typically has high risk involved, needle of the scale points towards moderately high /high, suggesting the fund is meant for investors with a high risk-taking appetite. Examples of equity and liquid funds are listed below:

Product Labeling

This product is suitable for investors who are seeking:

- Growth of capital in the long term
- Investment predominantly in equity and equity-related instruments

Riskometer

The Benchmark is at Moderately High Risk

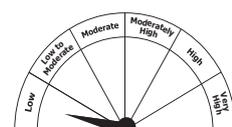

Debt Fund

Performance aspects

Although the past performance does not guarantee future trend, investors can get a broad idea on how a fund may perform in future. This section looks at the fund's performance (lump sum as well as SIP) across time frames and compares it with the fund's benchmark and a

market benchmark. Many fund houses provide graphical representation of calendar year performance of funds along with standard SEBI prescribed performance tables.

Fund manager details

In an investment voyage, mutual fund is the ship and fund manager is the sailor. Success of the voyage depends on the manager's expertise. Hence, it is imperative to know the fund manager well.

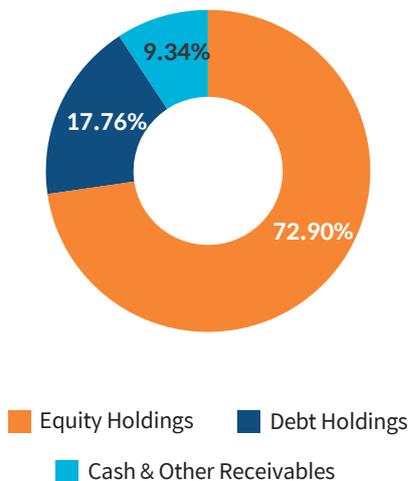

The factsheet provides information on the manager's experience and qualification. You can find out their track record by reviewing the performance of all schemes managed by them.

Portfolio aspects

Key portfolio attributes to look for in equity/ hybrid funds

Asset allocation

It highlights the exposure to different asset classes - equity, debt and cash - in a portfolio.

The data used is for illustration purpose only.

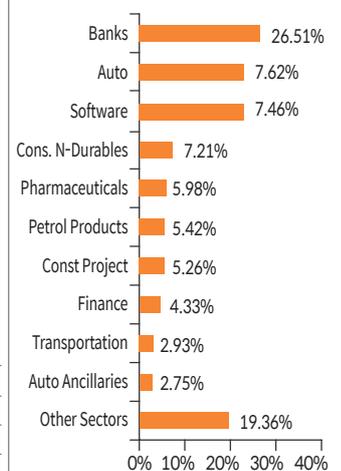

Company and sector allocation

It informs investors about a fund's concentration level in sectors and stocks. An aggressive fund manager may have high concentration among fewer companies and sectors, which may not be appropriate for investors seeking diversification. Investors should check whether the fund has taken higher-than-prudent exposure to riskier sectors or low quality stocks.

Allocation - Top 10 Sectors

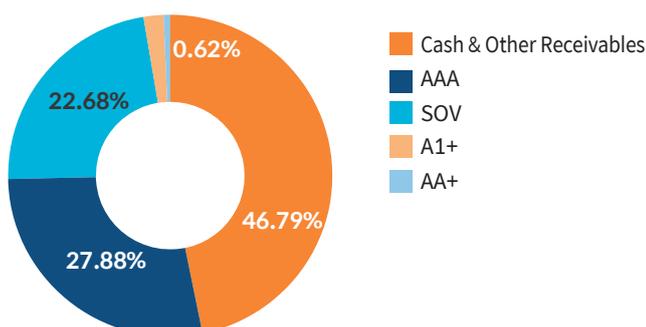

Key portfolio attributes to look for in debt funds

Credit quality profile

A debt fund's holdings are classified according to its credit ratings such as AAA, AA+, A1+ (given by credit rating agencies), etc.

Funds with higher exposure to AAA (top rated long-term debt) and A1+ (top rated short-term debt) have lower credit risk and higher credit quality.

Conservative investors should check whether the fund manager in order to boost performance is taking undue exposure to lower rated debt papers as they typically trade at higher yields but are exposed to high credit and liquidity risk vis-à-vis top rated papers.

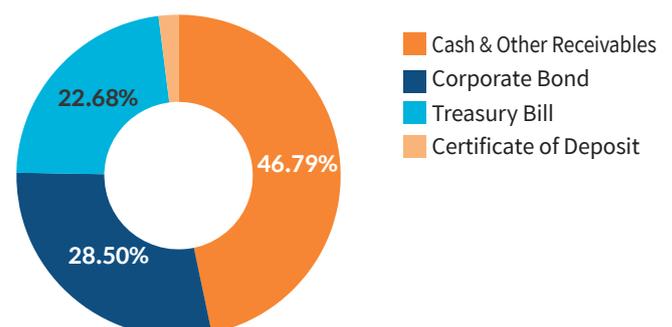

The data used is for illustration purpose only.

Instrument break-up

It highlights allocation to various debt instruments such as commercial papers (CPs), certificate of deposits (CDs), NCDs and bonds, gilts and cash equivalents.

Investors in shorter maturity debt funds such as liquid, ultra short term, short-term debt funds should check whether higher proportion has been allocated to shorter maturity instruments such as CPs and CDs. As long-term debt instruments such as gilts and bonds are typically more sensitive to interest rate changes compared with CPs and CDs, higher exposure to former instruments by liquid or ultra-short term may result in high risk.

The data used is for illustration purpose only.

Tax Reckoner

Snapshot of Income Tax rates specific to Mutual Funds

The Income Tax rates are applicable to financial year 2024-25 as per Finance Act, 2024
Income-tax implications on income with respect to units of Mutual Fund

Type of Investor	Resident***	NRI
Withholding tax rate	10%*	20%** or rate as per applicable tax treaty*** (whichever is lower)

* Tax not deductible if income in respect of units of a mutual fund is below Rs. 5,000 in a financial year.

** The base tax is to be further increased by surcharge at the rate of:

- 37% on base tax where income or aggregate of such income exceeds Rs. 5 crore;
- 25% where specified income exceeds Rs. 2 crore but does not exceed Rs. 5 crore;
- 15% where total income exceeds Rs. 1 crore but does not exceed Rs. 2 crore; and
- 10% where income or aggregate of such income exceeds Rs. 50 lakhs but does not exceed Rs. 1 crore.

In case investor is opting for 'New Regime' as mentioned on page 2, the rate of surcharge not to exceed 25%.

Further, "Health and Education Cess" is to be levied at 4% on aggregate of base tax and surcharge.

*** The income distributed by mutual fund to unitholders is unlikely to fall within the definition of dividend under the tax treaty. Given this and the language of the newly inserted provision to section 196A, claiming tax treaty benefit in respect of income distributed by mutual fund to unitholders for withholding tax purpose may not be possible.

**** As per section 139AA of the Income tax Act, 1961 ("the Act") read with rule 114AAA of the Income-tax Rules, 1962, in the case of a resident person, whose PAN has become inoperative due to PAN -Aadhaar not being linked on or before 30 June 2023, it shall be deemed that he has not furnished the PAN and tax could be withheld at a higher rate of 20% as per section 206AA of the Act. For linking PAN with Aadhaar after 30 June 2022, fees of Rs 1,000 thereafter has been prescribed.

Specified mutual fund schemes - Note 1		30% [^]	Not applicable

Note 1 - Capital gains from transfer of units of "specified mutual fund schemes" acquired on or after 1st April 2023 are treated as short term capital gains taxable at applicable slab rates as provided above irrespective of the period of holding of such mutual fund unit. For this purpose, "specified mutual fund" means mutual fund where not more than 35 per cent of its total proceeds is invested in the equity shares of domestic companies.

Note 2 - For "Fund of Fund investing in Domestic Equity ETFs", following provisions of Income Tax Act 1961, may be applicable on this scheme. As per the Section 112A of the Act, this scheme (which invest at least 90% in domestic equity ETF, where such ETF invest at least 90% in domestic equity shares) falls under the category of "equity oriented fund", however, as per the newly introduced Section 50AA by Finance Act, 2023, any "specified mutual fund", by whatever name called, where not more than 35 percent of its total proceeds is invested in the equity shares of domestic companies, any gains on transfer / redemption of units if such specified mutual funds acquired on or after 1 April 2023 shall be deemed to be short-term capital gains. A view may be adopted that sale of this scheme may be classified as "specified mutual fund" under the Act and should be taxable at the rate of 15% (plus applicable surcharge and cess). For further details, clarification and action, please consult your tax advisor.

* Income-tax at the rate of 10% (without indexation benefit and foreign exchange fluctuation) to be levied on long-term capital gains exceeding Rs. 1 lakh provided transfer of such units is subject to Securities Transaction Tax (STT).

§ Surcharge to be levied at:

- 37% on base tax where specified income*** exceeds Rs. 5 crore;
- 25% where specified income** exceeds Rs. 2 crore but does not exceed Rs. 5 crore;
- 15% where total income exceeds Rs. 1 crore but does not exceed Rs. 2 crore; and
- 10% where total income exceeds Rs. 50 lakhs but does not exceed Rs. 1 crore.

In case total income includes income by way of dividend on shares and short-term capital gains on units of equity oriented mutual fund schemes and long-term capital gains on mutual fund schemes, the rate of surcharge on the said type of income not to exceed 15%. In case investor is opting for 'New Regime' as mentioned on page 3, the rate of surcharge not to exceed 25%.

*** Specified income - Total income excluding income by way of dividend on shares and short-term capital gains on units of equity oriented mutual fund schemes and long-term capital gains on mutual fund schemes. Further, Health and Education Cess to be levied at the rate of 4% on aggregate of base tax and surcharge.

@ Surcharge at 7% on base tax is applicable where total income of domestic corporate unit holders exceeds Rs 1 crore but does not exceed 10 crores and at 12% where total income exceeds 10 crores. However, surcharge at flat rate of 10 percent to be levied on base tax for the companies opting for lower rate of tax of 22%/15%. Further, "Health and Education Cess" to be levied at the rate of 4% on aggregate of base tax and surcharge.

Short term/ long term capital gain tax (along with applicable Surcharge and Health and Education Cess) will be deducted at the time of redemption of units in case of NRI investors. Tax treaty benefit can be claimed for withholding tax on capitals gains subject to fulfillment of stipulated conditions.

* For the purpose of tax calculation under Option A, ad hoc deduction of INR 150,000 has been claimed. The ad hoc deduction is only illustrative in nature. Basis actual deduction, the tax amount will vary.

** For purpose of tax calculation under Option B, no exemption/ deductions have been claimed and it has been proposed that enhanced surcharge of 37% should not apply.

*** NIL tax on account of rebate under section 87A.

If the said taxable income includes income by way of dividend on shares and short-term capital gains in case of listed equity shares, equity oriented mutual fund units, units of business trust and long-term capital gains, then enhanced surcharge of 37% and 25% would not be applicable and accordingly effective tax rate would be lower.

■ Average Maturity:

Average Maturity of the securities in scheme.

■ Beta:

Beta of a portfolio is a number indicating the relation between portfolio returns with that of the market index i.e. it measure the volatility, or systematic risk, of a portfolio in comparison to the market as a whole.

■ Indexation Benefit:

- Long Term Capital Gains (holding period of over 3 years) from other than equity oriented and specified mutual funds are taxed at 20% plus applicable surcharge and cess with the benefit of indexation.
- Government notifies Cost Inflation Index (CII) for each financial year taking into consideration the prevailing inflation levels.
- The cost of acquisition for computation of tax is adjusted for inflation using CII, thereby reducing the capital gains from tax perspective.

■ Macaulay Duration (Duration):

Macaulay Duration (Duration) measures the price volatility of fixed income securities. It is often used in the comparison of interest rate risk between securities with different coupons and different maturities. It is defined as the weighted average time to cash flows of a bond where the weights are nothing but the present value of the cash flows themselves. It is expressed in years/days. The duration of a fixed income security is always shorter than its term to maturity, except in the case of zero coupon securities where they are the same.

■ Modified Duration:

A formula that expresses the measurable change in the value of a security in response to a change in interest rates. Modified duration of portfolio can be used to anticipate the change in market value of portfolio for every change in portfolio yield.

■ Portfolio Turnover Ratio:

Portfolio Turnover Ratio is the percentage of a fund's holdings that have changed in a given year. This ratio measures the fund's trading activity, which is computed by taking the lesser of purchases or sales and dividing by average monthly net assets.

■ Portfolio Yield (Annualized Portfolio YTM*):

Weighted average yield of the securities in scheme portfolio. *In case of semi annual YTM, it will be annualized.

■ Risk Free Return:

The theoretical rate of return of an investment with safest (zero risk) investment in a country.

■ Sharpe Ratio:

Sharpe Ratio is a risk to reward ratio, it measures portfolio returns generated in excess to the investment in risk-free asset, for per unit of total risk taken. While, positive Sharpe ratio indicates, portfolio compensating investors with excess returns (over risk-free rate) for the commensurate risk taken; negative Sharpe ratio indicates, investors are better off investing in risk-free assets.

■ Specified Mutual Fund:

Specified mutual fund" means mutual fund where not more than 35 per cent of its total proceeds is invested in the equity shares of domestic companies.

■ Standard Deviation:

A statistical measure that defines expected volatility/risk associated with a portfolio. This explains the variation/deviation from the average returns delivered by the portfolio. A higher standard deviation means higher volatility (risk) and a lower standard deviation means lower volatility.

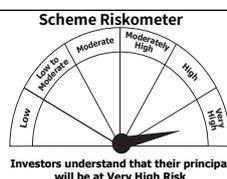

■ Total Expense Ratio:

Total expenses charged to scheme for the month expressed as a percentage to average monthly net assets.

■ Tracking Error:

Tracking error indicates how closely the portfolio return is tracking the benchmark Index return. It measures the deviation between portfolio return and benchmark index return. A lower tracking error indicates portfolio closely tracking benchmark index and higher tracking error indicates portfolio returns with higher deviation from benchmark index returns.
