### EQUITY UPDATE

- Nifty was up ~1% in February 2024 after flattish January 2024.
- All sectoral indices ended positive, except for Fast-moving consumer goods (FMCG), which was down 2.2%. Oil & gas (+6.7%), auto (+6.4%) and realty (+6.3%) were the top gainers. The mid-cap. (-0.5%) and small-cap. (-0.3%) indices underperformed the Nifty Index.
- Most of the global markets ended positive. Shanghai (+8.1%), Japan (+7.9%) and Hong Kong (+6.6%) were the major gainers; US SPX and Nasdaq soared to a record high and were up 5.2% and 6.1% in February; the latest rally was propelled by investor optimism about artificial intelligence

#### Global Macros

- US Fed Reserve:** The minutes of the US Federal Open Market Committee (FOMC) meeting highlighted that members were not in a rush to start cutting interest rates. Expectations of fed rate cut has been cut by half for CY24 with 150bps of rate cut expected at the start of the year to just 75bps currently.
- Bond yield:** The US 10-year bond yield increased from 3.88% (as on February 1, 2024) to 4.25% (on February 29, 2024) led by robust labor market prints and upside surprise to CPI inflation
- Crude:** Dated Brent crude spot price increased to US\$84.55/bbl as on February 29, 2024, from US\$78.90/bbl as on February 2, 2024 and future prices increased to US\$83.62/bbl as on February 29, 2024 from US\$78.70/bbl on February 1, 2024.

#### Domestic Macros

- GDP Growth:** GDP growth for 3QFY24 at 8.4% YoY was at a 6-qr high. There have been positive revisions to the 1HFY24 data as well. The strong GDP growth of 8.2% YoY in 9MFY24 was driven by capex (GFCF) growth of 10.2%. Construction was the fastest growing component, rising at 10.4% in the 9MFY24 period, corresponding well with the capex jump. Rural/agricultural growth remains benign, agriculture Gross value added (GVA) was -0.8% year on year for Q3FY24 which is a 19 quarter low.
- GST Collection:** GST collections for January 2024 (collected in February 2024) was at Rs 1.68 lakh crore, up by around 12.5% on an annual basis. With this, the monthly GST revenues has remained over Rs 1.5 lakh crore for 12 consecutive months.
- Credit Growth:** As per latest RBI data, system credit growth stood at 20.3% YoY (16.3% YoY excluding the impact of the HDFC-HDFC Bank merger) for the fortnight ended February 9, 2024.
- Inflation:** January 2024 Consumer Price Index inflation moderated to 5.1% - in line with expectations. Sequentially, headline inflation contracted by 0.1% (December 2023: (-)0.3%) led mainly by vegetables, followed by fruits, spices, pulses, and oils and fats. January 2024's Wholesale Price Index inflation moderated to 0.3% from 0.7% in December 2023
- Currency:** USD-INR came under pressure in the first part of February 2024 from rising US Dollar strength (amid robust macro data). USD-INR depreciated to Rs83.04/US\$ on February 15, 2024 (from Rs82.98/US\$ on February 1) before appreciating to Rs82.91/US\$ on February 29, 2024 aided by steady Foreign Portfolio Investment (FPI) inflows. Overall, the INR has appreciated by 0.2% in February 2024.

#### Regulatory, policy and market developments

- Equity trading trends:** Foreign Portfolio Investment (FPIs) sold US\$88 mn (until February 29) of Indian equities in the secondary market, whereas DIIs bought US\$3.1 bn (until February 29).

#### Nifty 3QFY24 Results – In-line driven by cyclicals

- The 3QFY24 corporate earnings ended on a strong note, with widespread outperformance across aggregates driven by continued margin tailwinds. Domestic cyclicals such as Autos and Financials, along with global cyclicals (i.e., Metals and O&G) drove the growth. Technology posted a marginal decline in earnings, its first in 26 quarters.
- Earnings for the Nifty-50 jumped 17% YoY during 3QFY24 and by 26% over 9MFY24. Excluding Oil Marketing Companies OMCs, Nifty reported 15/19% YoY earnings growth during 3QFY24/9MFY24 respectively

#### Sectoral Summary:

- Technology:** The IT Services companies exhibited a median revenue growth of 1.0% Quarter on quarter (QoQ) in CC. With continued weakness in key verticals and pressure on 4Q execution, the companies have either narrowed their revenue guidance band or expect to achieve the lower end of the range. Throughout 3QFY24, softness persisted in key verticals and geographies, with BFSI, Consumer, and Communications reporting muted growth.

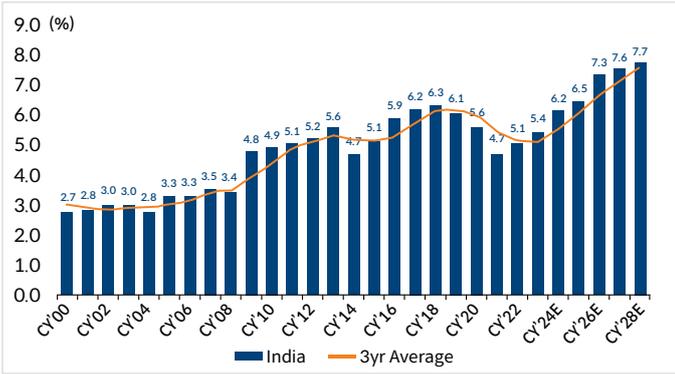

- Banks:** The banking sector exhibited a mixed performance in 3QFY24, characterized by healthy business growth, controlled provisions, persistent Net interest Margin (NIM) pressure, and high opex. Credit growth was primarily driven by retail growth. The corporate sector saw a gradual pickup, aided by Ministry of Micro, Small & Medium Enterprises. (MSME growth). Most of the banks witnessed stagnant or a slight dip in margins, barring select PSU banks.
- Autos:** In 3QFY24, Auto volumes (ex-tractors) grew 16% YoY (flat QoQ) led by a healthy recovery in 2Ws, stable growth across other segments, and a lower base due to the festive mismatch. 2Ws witnessed the sharpest growth of ~19% YoY during the quarter.
- Consumer:** The consumption trend and management commentary about rural recovery remained unchanged in 3Q. Local competition, a delayed rural recovery, and price cuts continued to hurt revenue performance during 9MFY24 (4% revenue growth). Volume growth improved a bit sequentially, but revenue growth was muted due to price cuts.

#### Outlook

- Election heavy 2024, advantage India:** Large part of the global economies will undergo elections in 2024 including India. However for India, likely continuity of incumbent will ensure continuation of supportive policy actions. For India, all the three elements of the capex cycle (Housing, Corporate Capex & Govt Capex) are now firing and hence the potential global slowdown should have limited impact on India. Over the medium term, we continue to remain constructive on equities and believe India is on the cusp of achieving robust growth over the next few years.
- Corporate earnings continue to remain strong:** Nifty earnings have risen at a 21% CAGR over FY20-24E, matching pace with the Nifty 50 index rising by 77% during the past 4 years. Earnings outlook is still robust for FY25/CY24 as rising corporate spending and strong bank balance sheets anchor earnings growth in mid-teen over the medium term. Compared with the other Emerging markets/major economies, India has shown more robust and consistent earnings performance. Visibility of India's cyclical upturn, full-blown capex cycle, robust demand and expected interest rate easing in 2HCY24 gives confidence in Indian companies to deliver healthy earnings growth next year
- Key things to watch out are:** (a) News flow on Indian elections, (b) Oil price trend, (c) rate trajectory by the central banks and (c) Russia-Ukraine & Middle-East war impact on global supply chain.
- Valuation and view:** Mid/small cap indices have outperformed the Nifty 50 by 30-50% in last 1 year and could be due to strong flows in funds focused on mid/small caps (at a cyclical high). On the other hand large cap stocks have seen outflows (flows are at a cyclical low). As a result, Mid/Small cap stocks are trading at a significant premium to large cap. Nifty 50 is at reasonable valuation of ~20x on FY25 earnings with good earnings growth outlook. In this context, currently large cap focused funds appear well placed.
- Recommendation:** Investors should invest based on their risk profile and continue allocating via SIPs. We prefer large-cap oriented funds and hence any fresh allocations can be made in diversified funds like large cap, Flexicap and Multicap. Hybrid funds, given their flexibility in asset allocation can also be made part of core portfolio. In thematic funds, financial sector is trading at attractive valuations and hence can invest in Banking, Financial Services and Insurance (BFSI) fund.

### DEBT UPDATE

#### Executive Summary

As we enter into the landscape of expectation of ease of monetary policy as well as cooling inflation, global growth is still expected to remain subdued. The near-term challenge might be to calibrate the monetary policy in response to the descending inflation.

Against a backdrop of evolving economy and fluctuating sentiments, India continues to show a narrative of resilience and adaptability. Marked by robust economic growth, moderating inflation, high foreign flows into the market and a stable Indian rupee.

#### Global Macros

The United States (US) Federal Reserve kept the target range for the federal funds rate at its 23-year high of 5.25% - 5.50% for the first policy meeting of 2024. Federal Open Market Committee (FOMC) meeting minutes served as a reminder that US Fed is in absolutely no rush for a rate cut. Policymakers have expressed both optimism and caution on inflation. They showed more concern over upside inflation than downside growth risks.

While on the contrary, the US Economy remained resilient as indicated by data points below-

- US Gross Domestic Product (GDP) grew by 3.2% in Q4 CY2023 on the back of resilient consumer spending as well as powerful labour market.
- Personal Income for Jan-24 grew 1% as against 0.3% for Dec-23.
- In addition, there also seems to be progress on inflation. US Consumer Price Index (CPI) for Jan-24 was at 3.1% as against 3.4% in Dec-23.
- US Non-farm payrolls for Jan-24 was higher at 353k as against 333k for Dec-23.
- US Unemployment rate for Jan-24 was lower at 3.7% in line with Dec-23.

Bank of England (BoE)'s Monetary Policy Committee (MPC) left interest rates unchanged at 5.25% on 1st February 2024. United Kingdom (UK) economy shrank in the last 2 quarters of 2023 (Q3 at -0.1% and Q4 at -0.3%) –entering into a technical recession. The weakness largely reflects high inflation and higher interest rates, both of which seems to have squeezed household and businesses. UK CPI rose 4% in Jan-24 in line with Dec-23, still above the target inflation.

In the last quarter of 2023, Euro Area reported a growth of 0% vs -0.1% in Q3 CY2023 due to persistently high inflation, record borrowing costs and weak external demand. For the year 2023, GDP grew by 0.5% annually – a decline from 3.4% growth in 2022. Euro area CPI for Feb-24 fell to 2.6% vs 2.8% in Jan-24. While the progress on inflation is notable, it is still above the target of 2%. The unemployment rate for Jan-24 is slightly lower at 6.4% from 6.5% in Dec-23.

Japan has lost its shining position as the 3rd largest economy in the world to Germany and slipped to 4th position in the list of largest economy in the world. The decline may be attributed to the significant fall in the value of Japanese Yen and Bank of Japan's decision to maintain negative interest rates. Japanese GDP fell to a -0.1% decline in growth in Q4 CY2023 from a revised -0.8% decline in Q3 CY2023 – also, entering into a technical recession along with UK. The decline in the growth seems to be on account of declining private consumption and elevate cost pressure. Japanese CPI rather slowed and fell to a low of 2.2% in Jan-24 from 2.6% in Dec-23, keeping well alive the expectations that there could be a possibility of a rate hike in March 2024 meeting.

People's Bank of China (PBoC) cut its key rate (5-year loan prime rate) by 25 bps to 3.95% - its first rate since June 2023 and also the largest rate cut. The decision for a rate cut was to spur credit demand and boost its property sector as the 5-year loan prime rate is tied to the mortgage rate. However, its 1-year rate was retained at 3.45%.

The Chinese economy grew by 0.1% in Q4 CY2023 from 1.5% in Q3 CY2023. Chinese CPI continues to remain in the negative territory at -0.8% in Jan-24 vs -0.3% in Dec-23. With business investment still flat or negative due to downturn of the property sector, net exports declining, persistent foreign outflows and government spending constrained by shrinking tax and pessimistic consumer sentiment, the full burden of delivering China's growth fell on housing consumption.

- Gold prices hits 3 months high on the back of easing US Inflation, weakening of US dollar and decline in United States Treasury (UST) yields.
- In tandem with gold, silver also saw a rise, especially spurred by decline in US ISM Manufacturing Purchasing Managers Index (PMI).
- West Texas Intermediate (WTI) Crude Oil surged above \$80.5 per barrel.
- London Metal Exchange (LME) Base metals experienced mix trading amid concerns over China's economic health and weak borrowing by local governments.

### Domestic Macros

- ❖ The Indian Economy, on the other hand, has continued its strong momentum in the face of global headwinds and uncertainties. Indian economy expanded by 8.4% in Q3 FY24 vs a revised expansion of 8.1% in Q2 FY24. Led by investments driven by public sector capital expenditure.
- ❖ Inflation Rate in India surged to 5.1% in Jan-2024 from 5.69% in Dec-2023. However, the current inflation rate remains in RBI's tolerance band of 2 - 6%.
- ❖ Domestic Purchasing Managers Index (PMI) remained firm at 61.5 in Feb-24 as against 61.2 for Jan-24, reflecting robust economic activity with contributions from both Manufacturing and Services.
- ❖ Industrial output growth for Dec-23 improved to 3.8% from 2.4% for Nov-23, driven by higher growth in manufacturing output, capital and infrastructure & construction goods and consumer goods.
- ❖ Domestic liquidity continued to remain in deficit with RBI continuing to infuse liquidity to support markets.

### Debt Outlook

February MPC meeting minutes reflect the Reserve Bank of India (RBI) comfort on the macro environment on account of favourable domestic and global environment. They highlighted the need for monetary policy to be restrictive and maintain downward pressure on inflation till it reaches stated target of ~4%. On the economic growth front, expectations of a healthy yet much slower growth in FY25E led by cyclical headwinds such as relatively weak exports, tighter lending standards, and agriculture sector performance.

Markets are expected to be driven by global rate cut expectations and net Foreign portfolio Investment (FPI) flows in the debt market, however still expected to experience some volatility due to swing in the United States Treasury (UST) yields and continued geopolitical tensions. Benchmark yields are expected to remain volatile in this current scenario.

# How to read a Mutual Fund Factsheet?

## Know how your money is managed

The benefits of investing in mutual funds are well known. However, buying them on face value is not enough. Investors should know how their money is managed. They should research as much as possible on a scheme's strategy, performance, risks involved and how the money is invested. Many investors shy away from this exercise as they consider it cumbersome. To make life easy for investors, mutual funds disclose a fund factsheet which details the quintessential information required before investing.

The factsheet is a concise document with a plethora of information about how the fund is managed; it is disclosed on a monthly basis. This article tries to decode the factsheet and explains how investors should use it for making investment decisions.

## Five things to look out for in mutual fund factsheets

## Basic information

The factsheet provides all the general information on the funds its objective or philosophy, options (growth or dividend), plans (direct and regular), net asset value (NAV) of each plan, minimum investment amount, systematic features (SIP, SWP, STP) and assets under management (AUM) data.

It is important to know about the fund's exit load, as it gets deducted from total gains if the investor exits during a specific period after investment. It is a small penalty charged on prevailing NAV to discourage premature redemption. Different schemes have different exit loads, while few such as Overnight funds generally do not have exit load. Some funds have a fixed exit load and some have a tiered structure. For instance, a fund may have nil exit load if the investor withdraws up to 10% of units per year. For units more than 10%, it charges 3% for exit before 12 months, 2% for exit before 24 months, 1% for exit before 36 months and nil after that.

Investors should look out for the fund's product labeling and riskometer. Product labeling underlines product suitability for investors. It tells about ideal investment time frame required to benefit from the fund and where it invests. Riskometer is a presentation that helps investors measure the risk associated with the fund. It presents six levels of risks - low, Low to Moderate, moderate, moderately High, High and Very High. Since an equity fund typically has high risk involved, needle of the scale points towards moderately high /high, suggesting the fund is meant for investors with a high risk-taking appetite. Examples of equity and liquid funds are listed below:

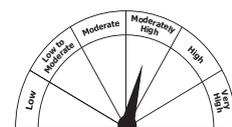

## Equity Fund

### Product Labeling

**This product is suitable for investors who are seeking:**

- Growth of capital in the long term
- Investment predominantly in equity and equity-related instruments

### Riskometer

The Benchmark is at Moderately High Risk

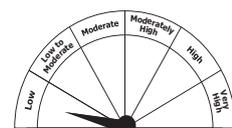

## Debt Fund

### Product Labeling

**This product is suitable for investors who are seeking:**

- Optimal returns in the short term
- Investment in portfolio of short duration money market and debt instruments

### Riskometer

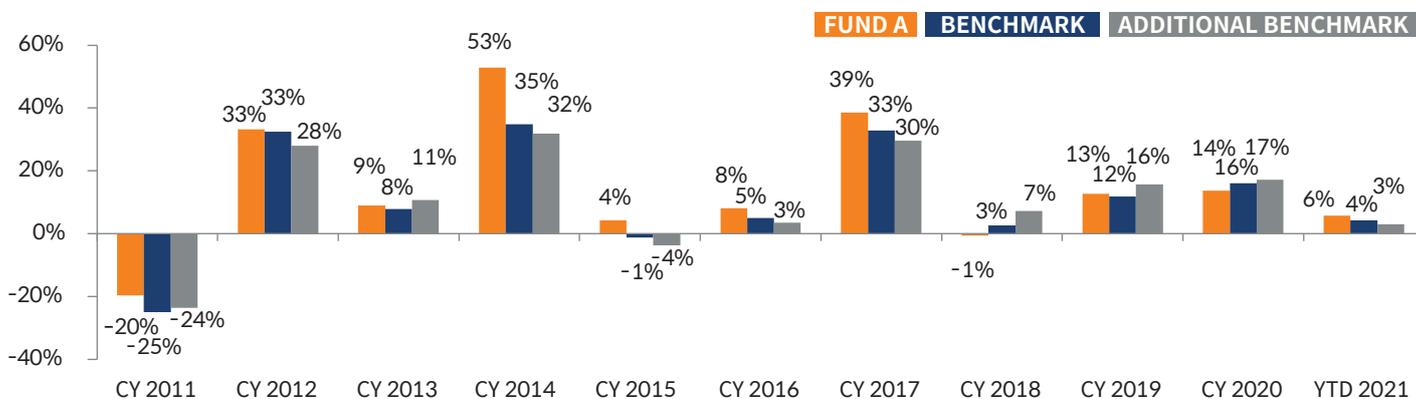

The Benchmark is at Low Risk

## Performance aspects

Although the past performance does not guarantee future trend, investors can get a broad idea on how a fund may perform in future. This section looks at the fund's performance (lump sum as well as SIP) across time frames and compares it with the fund's benchmark and a

market benchmark. Many fund houses provide graphical representation of calendar year performance of funds along with standard SEBI prescribed performance tables.

## Fund manager details

In an investment voyage, mutual fund is the ship and fund manager is the sailor. Success of the voyage depends on the manager's expertise. Hence, it is imperative to know the fund manager well.

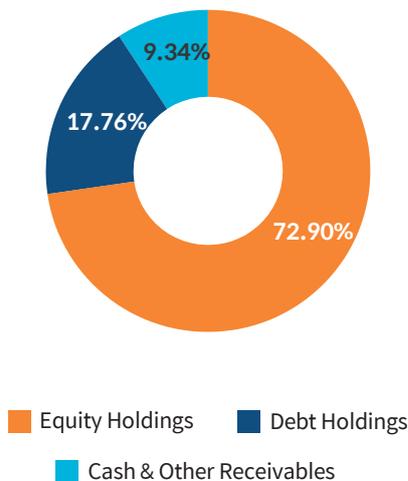

The factsheet provides information on the manager's experience and qualification. You can find out their track record by reviewing the performance of all schemes managed by them.

## Portfolio aspects

### Key portfolio attributes to look for in equity/ hybrid funds

#### Asset allocation

It highlights the exposure to different asset classes - equity, debt and cash - in a portfolio.

The data used is for illustration purpose only.

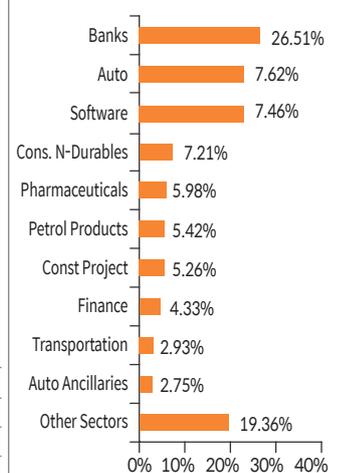

#### Company and sector allocation

It informs investors about a fund's concentration level in sectors and stocks. An aggressive fund manager may have high concentration among fewer companies and sectors, which may not be appropriate for investors seeking diversification. Investors should check whether the fund has taken higher-than-prudent exposure to riskier sectors or low quality stocks.

<b>Equity Holding Total</b>	<b>94.83%</b>
<b>Cash &amp; Other Receivables</b>	<b>5.17%</b>
<b>Total</b>	<b>100.00%</b>

##### Allocation - Top 10 Sectors

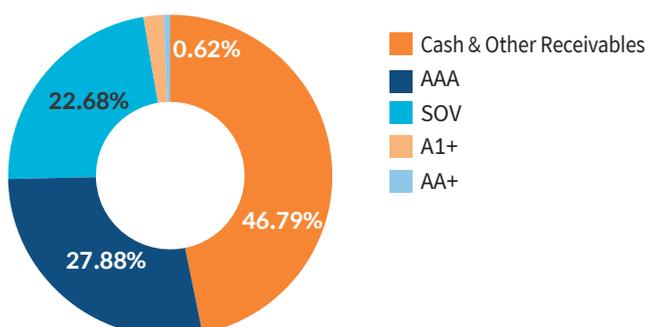

### Key portfolio attributes to look for in debt funds

#### Credit quality profile

A debt fund's holdings are classified according to its credit ratings such as AAA, AA+, A1+ (given by credit rating agencies), etc.

Funds with higher exposure to AAA (top rated long-term debt) and A1+ (top rated short-term debt) have lower credit risk and higher credit quality.

Conservative investors should check whether the fund manager in order to boost performance is taking undue exposure to lower rated debt papers as they typically trade at higher yields but are exposed to high credit and liquidity risk vis-à-vis top rated papers.

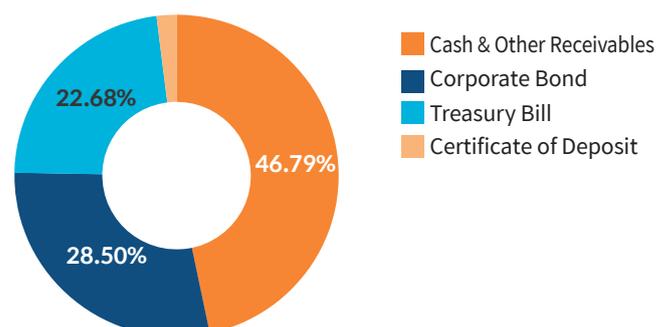

The data used is for illustration purpose only.

#### Instrument break-up

It highlights allocation to various debt instruments such as commercial papers (CPs), certificate of deposits (CDs), NCDs and bonds, gilts and cash equivalents.

Investors in shorter maturity debt funds such as liquid, ultra short term, short-term debt funds should check whether higher proportion has been allocated to shorter maturity instruments such as CPs and CDs. As long-term debt instruments such as gilts and bonds are typically more sensitive to interest rate changes compared with CPs and CDs, higher exposure to former instruments by liquid or ultra-short term may result in high risk.

The data used is for illustration purpose only.

# Tax Reckoner

## Snapshot of Income Tax rates specific to Mutual Funds

The Income Tax rates are applicable to financial year 2023-24 as per Finance Act, 2023  
Income-tax implications on income with respect to units of Mutual Fund

Type of Investor	Resident***	NRI
Withholding tax rate	10%*	20%** or rate as per applicable tax treaty*** (whichever is lower)

\* Tax not deductible if income in respect of units of a mutual fund is below Rs. 5,000 in a financial year.

\*\* The base tax is to be further increased by surcharge at the rate of:

- 37% on base tax where income or aggregate of such income exceeds Rs. 5 crore;
- 25% where specified income exceeds Rs. 2 crore but does not exceed Rs. 5 crore;
- 15% where total income exceeds Rs. 1 crore but does not exceed Rs. 2 crore; and
- 10% where income or aggregate of such income exceeds Rs. 50 lakhs but does not exceed Rs. 1 crore.

In case investor is opting for 'New Regime' as mentioned on page 2, the rate of surcharge not to exceed 25%.

Further, "Health and Education Cess" is to be levied at 4% on aggregate of base tax and surcharge.

\*\*\* The income distributed by mutual fund to unitholders is unlikely to fall within the definition of dividend under the tax treaty. Given this and the language of the newly inserted provision to section 196A, claiming tax treaty benefit in respect of income distributed by mutual fund to unitholders for withholding tax purpose may not be possible.

\*\*\*\* As per section 139AA of the Income tax Act, 1961 ("the Act") read with rule 114AAA of the Income-tax Rules, 1962, in the case of a resident person, whose PAN has become inoperative due to PAN -Aadhaar not being linked on or before 30 June 2023, it shall be deemed that he has not furnished the PAN and tax could be withheld at a higher rate of 20% as per section 206AA of the Act. For linking PAN with Aadhaar after 30 June 2022, fees of Rs 1,000 thereafter has been prescribed.

### CAPITAL GAINS TAXATION

<b>• Long Term Capital Gains (units held for more than 36 months)</b>		<b>• Short Term Capital Gains (units held for 36 months or less)</b>	
Long term capital gains (Not applicable for specified mutual fund schemes - Note 1)	20% <sup>§</sup>	20% <sup>§</sup>	Listed - 20% <sup>§</sup> Unlisted - 10%***
Short term capital gains (Including specified mutual fund schemes - Note 1)	as per your applicable tax slab	30% / 25% <sup>^^</sup> / 22% <sup>^^^</sup> / 15% <sup>^^^</sup>	30% <sup>^</sup>
<b>Tax Deducted at Source (Applicable to NRI Investors)<sup>f</sup></b>			
		<b>Short term capital gains<sup>§</sup></b>	<b>Long term capital gains<sup>§</sup></b>
Equity oriented schemes		15%	10%*
Other than equity oriented schemes (except specified mutual fund schemes)		30% <sup>^</sup>	10%*** (for unlisted) & 20% <sup>§</sup> (for listed)
Specified mutual fund schemes - Note 1		30% <sup>^</sup>	Not applicable

Note 1 - Capital gains from transfer of units of "specified mutual fund schemes" acquired on or after 1st April 2023 are treated as short term capital gains taxable at applicable slab rates as provided above irrespective of the period of holding of such mutual fund unit. For this purpose, "specified mutual fund" means mutual fund where not more than 35 per cent of its total proceeds is invested in the equity shares of domestic companies.

Note 2 - For "Fund of Fund investing in Domestic Equity ETFs", following provisions of Income Tax Act 1961, may be applicable on this scheme. As per the Section 112A of the Act, this scheme (which invest at least 90% in domestic equity ETF, where such ETF invest at least 90% in domestic equity shares) falls under the category of "equity oriented fund", however, as per the newly introduced Section 50AA by Finance Act, 2023, any "specified mutual fund", by whatever name called, where not more than 35 percent of its total proceeds is invested in the equity shares of domestic companies, any gains on transfer / redemption of units if such specified mutual funds acquired on or after 1 April 2023 shall be deemed to be short-term capital gains. A view may be adopted that sale of this scheme may be classified as "specified mutual fund" under the Act and should be taxable at the rate of 15% (plus applicable surcharge and cess). For further details, clarification and action, please consult your tax advisor.

\* Income-tax at the rate of 10% (without indexation benefit and foreign exchange fluctuation) to be levied on long-term capital gains exceeding Rs. 1 lakh provided transfer of such units is subject to Securities Transaction Tax (STT).

§ Surcharge to be levied at:

- 37% on base tax where specified income\*\*\* exceeds Rs. 5 crore;
- 25% where specified income\*\* exceeds Rs. 2 crore but does not exceed Rs. 5 crore;
- 15% where total income exceeds Rs. 1 crore but does not exceed Rs. 2 crore; and
- 10% where total income exceeds Rs. 50 lakhs but does not exceed Rs. 1 crore.

In case total income includes income by way of dividend on shares and short-term capital gains on units of equity oriented mutual fund schemes and long-term capital gains on mutual fund schemes, the rate of surcharge on the said type of income not to exceed 15%. In case investor is opting for 'New Regime' as mentioned on page 3, the rate of surcharge not to exceed 25%.

\*\*\* Specified income - Total income excluding income by way of dividend on shares and short-term capital gains on units of equity oriented mutual fund schemes and long-term capital gains on mutual fund schemes. Further, Health and Education Cess to be levied at the rate of 4% on aggregate of base tax and surcharge.

@ Surcharge at 7% on base tax is applicable where total income of domestic corporate unit holders exceeds Rs 1 crore but does not exceed 10 crores and at 12% where total income exceeds 10 crores. However, surcharge at flat rate of 10 percent to be levied on base tax for the companies opting for lower rate of tax of 22%/15%. Further, "Health and Education Cess" to be levied at the rate of 4% on aggregate of base tax and surcharge.

# Short term/ long term capital gain tax (along with applicable Surcharge and Health and Education Cess) will be deducted at the time of redemption of units in case of NRI investors. Tax treaty benefit can be claimed for withholding tax on capitals gains subject to fulfillment of stipulated conditions.

& After providing indexation.

\*\*\* Without indexation.

^ Assuming the investor falls into highest tax bracket.

^^ If total turnover or gross receipts in the financial year 2021-22 does not exceed Rs. 400 crores.

^^^ This lower rate is optional and subject to fulfillment of certain conditions as provided in section 115BAA.

^^^^ This lower rate is optional for companies engaged in manufacturing business (set-up & registered on or after 1 October 2019) subject to fulfillment of certain conditions as provided in section 115BAB.

- Further, the domestic companies are subject to minimum alternate tax (except for those who opt for lower rate of tax of 22%/15%) not specified in above tax rates.
- Transfer of units upon consolidation of mutual fund schemes of two or more schemes of equity oriented fund or two or more schemes of a fund other than equity oriented fund in accordance with SEBI (Mutual Funds) Regulations, 1996 is exempt from capital gains.

## ■ Average Maturity:

Average Maturity of the securities in scheme.

## ■ Beta:

Beta of a portfolio is a number indicating the relation between portfolio returns with that of the market index i.e. it measure the volatility, or systematic risk, of a portfolio in comparison to the market as a whole.

## ■ Indexation Benefit:

- Long Term Capital Gains (holding period of over 3 years) from other than equity oriented and specified mutual funds are taxed at 20% plus applicable surcharge and cess with the benefit of indexation.
- Government notifies Cost Inflation Index (CII) for each financial year taking into consideration the prevailing inflation levels.
- The cost of acquisition for computation of tax is adjusted for inflation using CII, thereby reducing the capital gains from tax perspective.

## ■ Macaulay Duration (Duration):

Macaulay Duration (Duration) measures the price volatility of fixed income securities. It is often used in the comparison of interest rate risk between securities with different coupons and different maturities. It is defined as the weighted average time to cash flows of a bond where the weights are nothing but the present value of the cash flows themselves. It is expressed in years/days. The duration of a fixed income security is always shorter than its term to maturity, except in the case of zero coupon securities where they are the same.

## ■ Modified Duration:

A formula that expresses the measurable change in the value of a security in response to a change in interest rates. Modified duration of portfolio can be used to anticipate the change in market value of portfolio for every change in portfolio yield.

## ■ Portfolio Turnover Ratio:

Portfolio Turnover Ratio is the percentage of a fund's holdings that have changed in a given year. This ratio measures the fund's trading activity, which is computed by taking the lesser of purchases or sales and dividing by average monthly net assets.

## ■ Portfolio Yield (Annualized Portfolio YTM\*):

Weighted average yield of the securities in scheme portfolio. \*In case of semi annual YTM, it will be annualized.

## ■ Risk Free Return:

The theoretical rate of return of an investment with safest (zero risk) investment in a country.

## ■ Sharpe Ratio:

Sharpe Ratio is a risk to reward ratio, it measures portfolio returns generated in excess to the investment in risk-free asset, for per unit of total risk taken. While, positive Sharpe ratio indicates, portfolio compensating investors with excess returns (over risk-free rate) for the commensurate risk taken; negative Sharpe ratio indicates, investors are better off investing in risk-free assets.

## ■ Specified Mutual Fund:

Specified mutual fund" means mutual fund where not more than 35 per cent of its total proceeds is invested in the equity shares of domestic companies.

## ■ Standard Deviation:

A statistical measure that defines expected volatility/risk associated with a portfolio. This explains the variation/deviation from the average returns delivered by the portfolio. A higher standard deviation means higher volatility (risk) and a lower standard deviation means lower volatility.

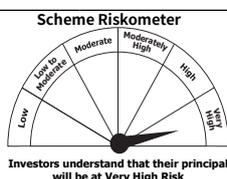

## ■ Total Expense Ratio:

Total expenses charged to scheme for the month expressed as a percentage to average monthly net assets.

## ■ Tracking Error:

Tracking error indicates how closely the portfolio return is tracking the benchmark Index return. It measures the deviation between portfolio return and benchmark index return. A lower tracking error indicates portfolio closely tracking benchmark index and higher tracking error indicates portfolio returns with higher deviation from benchmark index returns.
