CRISIL-IBX Gilt Index - June 2027

CRISIL-IBX Gilt Index - June 2027 Index seeks to measure the performance of portfolio predominantly invested in G-Sec maturing between 01 January 2027 to 30 June 2027. The index shall mature on 30 June 2027.

Features

- Total Return Index seeking to capture price and coupon returns of the underlying portfolio.
- It's a target date index which follows a roll-down approach.
- The index uses a buy and hold strategy wherein the portfolio of G-sec is held till maturity unless they become ineligible
- Small portion of portfolio (2%) is invested in on-the-run 91 Day T-bill for liquidity
- Index portfolio marked-to-market on a daily basis using CRISIL Gilt and T-Bills valuations
- Inception Date of Index: 28 February 2021.

Key Characteristics

- **Replicability:** The index constituents are valued on a daily basis. This lends the index a realistic approach by having the valuations close to the market levels

Methodology

- Weights of the G-sec securities and T-bills Securities in the Index will be 98% and 2% respectively.
- Securities Selection methodology in G-Sec are as follows:
 - All securities selected will have a maturity date in the eligible period of G-sec which is from 1st January 2027 to 30th June 2027.
 - All Securities are selected on the basis of Amount Outstanding.
 - Minimum Amount Outstanding should be Rs. 25000 crores.
 - Surrogate bonds (namely Food Corporation of India bonds, Oil bonds, Fertilizer bonds and UTI Special Bonds), STRIPS and Floating rate bonds shall be kept out of the purview of the selection process.
 - Weights to individual securities will be calculated in the ratio of amount outstanding (30% weightage) and liquidity score (70% weightage).
 - Eligible securities will be added on a 6 monthly basis and weights will be redistributed based on ratio of amount outstanding (30% weightage) and liquidity score (70% weightage).
- Securities Selection methodology in T-Bills are as follows:
 - Three 91-Day T-Bill will be selected by rebalancing on a bi-monthly basis.
 - This will consist of last three on-the-run 91-Day T-Bills as on the bi-monthly (once in two months) rebalancing date.
 - The maturity date of such T-bill selected should not be greater than the maturity of the fund.
 - In case no such 91 Day on-the-run T-Bill is available closer to the maturity date of the fund, T-Bill that is closest to the maturity date but maturing before the maturity date of index will be selected.
 - If such T-Bill matures as well, the proceeds will be invested in TREPS.
 - The T-bills will be weighted equally on each rebalancing date.
- Any cash flows accruing to the index on account of coupon cash flows, part redemption of the security or

securities, will be reinvested on the same day in the index in the proportion of existing weights.

- As the index includes securities that shall mature during the 6-period ending on the final maturity date of the index, any proceeds from the redemption of securities prior to the final maturity date of the index shall be reinvested according to following waterfall approach –
 - a) The proceeds from security redemption will be reinvested in the longest maturity outstanding government security issued and maturing on or just before the index maturity date.
 - b) In case a replacement in the form of another outstanding government security cannot be found for reinvestment then the proceeds from such redemption shall be reinvested in the remaining portfolio on the same date in the proportion of the existing weights.
 - c) In case due to any reason, it is not possible to meet the requirements stated in point (a) and (b) above, then the proceeds from such redemption shall be reinvested in a T-Bill maturing on or just before the index maturity date.
 - d) If the last outstanding security (including T-Bill) in the index matures before the final index maturity date, all redemption proceeds shall be assumed to be re-invested in The Clearing Corporation of India Ltd.'s (CCIL) TREPS overnight rate for any subsequent days till the maturity of the index.
- The relative weights of the Government securities and asset classes will change due to price movement and will be reset during the 6 monthly rebalancing.
- While rebalancing (security addition/ deletion/ weights reset), Impact Cost for each asset class will be as follows:
 - G-sec: 1.5 bps on each leg (total 3 bps)
 - T-bills: 0 bps on each leg (total 0 bps)

Any index having maturity date on a weekend (Saturday and Sunday) or on a holiday, or on an unplanned market off, will mature on the next working day.

Portfolio as on 01 January 2024

CRISIL-IBX Gilt Index - April 2028

CRISIL-IBX Gilt Index - April 2028 Index seeks to measure the performance of portfolio predominantly invested in G-Sec maturing between 06 September 2027 and 05 April 2028. The index shall mature on 05 April 2028.

Features

- Total Return Index seeking to capture price and coupon returns of the underlying portfolio.
- It's a target date index which follows a roll-down approach.
- The index uses a buy and hold strategy wherein the portfolio of G-sec is held till maturity unless they become ineligible.
- A small portion of the portfolio (2%) is invested in on-the-run 91 Day T-bill for liquidity.
- Index portfolio marked-to-market on a daily basis using CRISIL Gilt and T-Bills valuations.
- Inception Date of Index: 28 February 2021.

Key Characteristics

- **Replicability:** The index constituents are valued on a daily basis. This lends the index a realistic approach by having the valuations close to the market levels.

Methodology

- Weights of the G-sec securities and T-bills Securities in the Index will be 98% and 2% respectively.
- Securities Selection methodology in G-Sec are as follows:
 - All securities selected will have a maturity date in the eligible period of G-sec which is from 06 September 2027 to 05 April 2028.
 - All Securities are selected on the basis of Amount Outstanding.
 - Minimum Amount Outstanding should be Rs. 25000 crores.
 - Weights to individual securities will be calculated in the ratio of amount outstanding (30% weightage) and liquidity score (70% weightage).
 - Eligible securities will be added on a 6 monthly basis and weights will be redistributed based on ratio of amount outstanding (30% weightage) and liquidity score (70% weightage).
 - Surrogate bonds (namely Food Corporation of India bonds, Oil bonds, Fertilizer bonds and UTI Special Bonds), STRIPS and Floating rate bonds shall be kept out of the purview of the selection process.
- Securities Selection methodology in T-Bills are as follows:
 - Three 91-Day T-Bill will be selected by rebalancing on a bimonthly basis.
 - This will consist of last three on-the-run 91-Day T-Bills as on the bi-monthly (once in two months) rebalancing date.
 - The maturity date of such T-bill selected should not be greater than the maturity of the fund.
 - In case no such 91 Day on-the-run T-Bill is available closer to the maturity date of the fund, T-Bill that is closest to the maturity date but maturing before the maturity date of index will be selected.
 - If such T-Bill matures as well, the proceeds will be invested in TREPS.
 - The T-bills will be weighted equally on each rebalancing date.
- Any cash flows accruing to the index on account of coupon cash flows, part redemption of the security or

securities, will be reinvested on the same day in the index in the proportion of existing weights.

- As the index includes securities that shall mature during the 6-period ending on the final maturity date of the index, any proceeds from the redemption of securities prior to the final maturity date of the index shall be reinvested according to following waterfall approach –
 - a) The proceeds from security redemption will be reinvested in the longest maturity outstanding government security issued and maturing on or just before the index maturity date.
 - b) In case a replacement in the form of another outstanding government security cannot be found for reinvestment then the proceeds from such redemption shall be reinvested in the remaining portfolio on the same date in the proportion of the existing weights.
 - c) In case due to any reason, it is not possible to meet the requirements stated in point (a) and (b) above, then the proceeds from such redemption shall be reinvested in a T-Bill maturing on or just before the index maturity date.
 - d) If the last outstanding security (including T-Bill) in the index matures before the final index maturity date, all redemption proceeds shall be assumed to be re-invested in The Clearing Corporation of India Ltd.'s (CCIL) TREPS overnight rate for any subsequent days till the maturity of the index.
- The relative weights of the Government securities and asset classes will change due to price movement and will be reset during the 6 monthly rebalancing.
- While rebalancing (security addition/ deletion/ weights reset), Impact Cost for each asset class will be as follows:
 - G-sec: 1.5 bps on each leg (total 3 bps)
 - T-bills: 0 bps on each leg (total 0 bps)

'Any index having maturity date on a weekend (Saturday and Sunday) or on a holiday, or on an unplanned market off, will mature on the next working day.'

CRISIL-IBX 70:30 CPSE Plus SDL Index – April 2025

CRISIL-IBX 70:30 CPSE Plus SDL Index – April 2025 Seeks to track the performance of AAA CPSE and SDL securities maturing between 01 November 2024 to 30 April 2025. The index shall mature on 30 April 2025.

Asset Allocation

- **CPSE:** 70%
- **SDL:** 30%

The weights between asset classes may drift due to price movement, and will be reset quarterly.

Features

- Total Return Index seeking to capture price and coupon returns of the underlying portfolio.
- It's a target date index which follows a roll-down approach.
- Corporate issuers with rating of AAA, issued by CPSEs, having the security nearest to maturity with a minimum outstanding of Rs. 1,000 crores in the eligible period.
- State issuers having the security nearest to maturity with a minimum outstanding of Rs. 1,000 crores in the eligible period.
- Index portfolio marked-to-market on a daily basis using CRISIL valuations
- Inception Date of Index: 04 January 2022.

Key Characteristics

- **Replicability:** The index constituents are valued on a daily basis. This lends the index a realistic approach by having the valuations close to the market levels.

Methodology

- Securities Selection methodology in CPSE are as follows:
 - Top 7 CPSE issuers shall be selected, at the time of inception of the index, based on liquidity score of the securities maturing in the eligible period for CPSE.
 - Liquidity score will be calculated based on the volume traded (70%), number of trades (15%) and days traded (15%) in the previous quarter.
 - Securities with the minimum amount outstanding of Rs. 1000 crore will be eligible for the index.
 - The Securities of the selected issuers having maturity nearest to the target date shall be selected.
 - The selected securities will be held till maturity unless a new security of same issuer is available having outstanding greater than and maturity closer to fund maturity as compared to existing security.
 - The issuer/security will be removed from the index if the conservative rating of issuer falls below AAA, or it is not classified as CPSE.
 - Weights to the securities will be based on Liquidity score (70%) and amount outstanding (30%) of issuer (based on eligible securities) and will be reset on a quarterly basis.
 - Perpetual bonds, Floating rate bonds, Tax free bonds, GOI service bonds, GOI guaranteed bonds, CE Rated, Partly Paid, Partial Redemption and bonds with single call/put options are excluded from

the universe of bonds.

- Securities Selection methodology in SDL are as follows:
 - Top 6 states shall be selected, at the time of inception of the index, on the basis of liquidity of the securities maturing in the eligible period for SDL
 - Liquidity score will be calculated based on the volume traded (70%), number of trades (15%) and days traded (15%) in the previous quarter.
 - Securities with minimum amount outstanding of Rs. 1000 crore will be eligible for the index.
 - The Securities of the selected states having maturity nearest to the target date shall be selected.
 - The selected securities will be held till maturity unless a new security of same issuer is available having outstanding greater than and maturity closer to fund maturity as compared to existing security.
 - Weights to the securities will be based on Liquidity score (70%) and amount outstanding (30%) and will be reset on a quarterly basis.
 - UDAY bonds will be excluded

Rebalancing and review:

1. If amount outstanding of any security falls below Rs. 1000 crore in the interim period and there is no replacement security available for the issuer, we will remove the security/issuer at the month end. The amount will be invested according to the waterfall approach stated below.
2. The relative weights of the securities will change due to price movement and will be reset during the quarterly rebalancing.
3. Any cash flows accruing to the index on account of coupon cash flows, part redemption of the security or securities, exit of ineligible securities etc., reinvested on the same day in the index in the proportion of existing weights. If the same security is not available or on account of full redemption of the securities, it would be reinvested according to following waterfall approach -
 - a. The proceeds from security redemption will be reinvested in the longest maturity outstanding security issued by the same issuer (state in case of SDL and Bond/money market instrument in case of corporate bond) and maturing on or just before the index maturity date.
 - b. In case a replacement in the form of outstanding security of the same issuer cannot be found for reinvestment then the proceeds from such redemption shall be reinvested in the remaining portfolio on the same date in the proportion of the existing weights. This will be subject to compliance to the SEBI portfolio concentration norms for indices used by passive funds.
 - c. In case due to any reason, it is not possible to meet the portfolio concentration norms as prescribed by SEBI, then the proceeds from such redemption shall be reinvested in a T-Bill maturing on or just before the index maturity date.
 - d. If the last outstanding security (including T-Bill) in the index matures before the final index maturity date, all redemption proceeds shall be assumed to be re-invested in The Clearing Corporation of India Ltd.'s (CCIL) TREPS overnight rate for any subsequent days till the maturity of the index.

'Any index having maturity date on a weekend (Saturday and Sunday) or on a holiday, or on an unplanned market off, will mature on the next working day.'

CRISIL-IBX SDL Index – May 2027

CRISIL-IBX SDL Index – May 2027. Seeks to track the performance of SDL securities maturing between 01 December 2026 to 31 May 2027. The index shall mature on 31 May 2027.

Asset Allocation

- **SDL:** 100%

The weights may drift due to price movement and will be reset quarterly.

Features

- Total Return Index seeking to capture price and coupon returns of the underlying portfolio.
- It's a target date index which follows a roll-down approach.
- State issuers having the security nearest to maturity with a minimum outstanding of Rs. 1,000 crores in the eligible period.
- Index portfolio marked-to-market on a daily basis using CRISIL valuations.
- Inception Date of Index: 24 January 2022.

Key Characteristics

- **Replicability:** The index constituents are valued on a daily basis. This lends the index a realistic approach by having the valuations close to the market levels.

Methodology

- Securities Selection methodology in SDL are as follows:
 - Top 12 states shall be selected, at the time of inception of the index, on the basis of liquidity of the securities maturing in the eligible period for SDL.
 - Liquidity score will be calculated based on the volume traded (70%), number of trades (15%) and days traded (15%) in the previous quarter.
 - Securities with minimum amount outstanding of Rs. 1000 crore will be eligible for the index.
 - The Securities of the selected states having maturity nearest to the target date shall be selected.
 - The selected securities will be held till maturity unless a new security of same issuer is available having outstanding greater than and maturity closer to fund maturity as compared to existing security.
 - Weights to the securities will be based on Liquidity score (70%) and amount outstanding (30%) and will be reset on a quarterly basis.
 - UDAY bonds will be excluded

Rebalancing and review:

1. If amount outstanding of any security falls below Rs. 1000 crore in the interim period and there is no replacement security available for the issuer, we will remove the security/issuer at the month end. The amount will be invested according to the waterfall approach stated below.
2. The relative weights of the securities will change due to price movement and will be reset during the quarterly rebalancing.
3. Any cash flows accruing to the index on account of coupon cash flows, part redemption of the security or securities, exit of ineligible securities etc., w reinvested on the same day in the index in the proportion of existing weights. If the same security is not available or on account of full redemption of the securities, it would be reinvested according to following waterfall approach -
 - a. The proceeds from security redemption will be reinvested in the longest maturity outstanding security issued by the same issuer (state in case of SDL) and maturing on or just before the index maturity date.
 - b. In case a replacement in the form of outstanding security of the same issuer cannot be found for reinvestment then the proceeds from such redemption shall be reinvested in the remaining portfolio on the same date in the proportion of the existing weights. This will be subject to compliance to the SEBI portfolio concentration norms for indices used by passive funds.
 - c. In case due to any reason, it is not possible to meet the portfolio concentration norms as prescribed by SEBI, then the proceeds from such redemption shall be reinvested in a T-Bill maturing on or just before the index maturity date.
 - d. If the last outstanding security (including T-Bill) in the index matures before the final index maturity date, all redemption proceeds shall be assumed to be re-invested in The Clearing Corporation of India Ltd.'s (CCIL) TREPS overnight rate for any subsequent days till the maturity of the index.

Any index having maturity date on a weekend (Saturday and Sunday) or on a holiday, or on an unplanned market off, will mature on the next working day.

CRISIL-IBX 50:50 PSU + SDL Index – October 2025

CRISIL-IBX 50:50 PSU + SDL Index – October 2025 Seeks to track the performance of AAA PSU and SDL securities maturing between 01 May 2025 to 31 October 2025. The index shall mature on 31 October 2025.

Asset Allocation

- **PSU:** 50%
- **SDL:** 50%

The weights between asset classes may drift due to price movement, and will be reset quarterly

Features

- Total Return Index seeking to capture price and coupon returns of the underlying portfolio.
- It's a target date index which follows a roll-down approach.
- Corporate issuers with rating of AAA, issued by PSUs, with a minimum outstanding of Rs. 500 crores in the eligible period, having the security with the highest liquidity.
- State issuers with a minimum outstanding of Rs. 1,000 crores in the eligible period, having the security with the highest liquidity.
- Index portfolio marked-to-market on a daily basis using CRISIL valuations
- Inception Date of Index: 01 March 2022.

Key Characteristics

- **Replicability:** The index constituents are valued on a daily basis. This lends the index a realistic approach by having the valuations close to the market levels

Methodology

PSU

Eligibility Norms:

- Issuing entity should be domiciled in India and should satisfy either of the following:
- Central Public Sector Enterprises (CPSEs) as listed on DPE & DIPAM website.
- Maharatna, Navratna and Miniratna as listed on DPE website, if not included in CPSEs list as mentioned in point 1.
- Public Financial Institutions (PFIs) owned and managed by GOI and not included in points 1 and 2 above.
- Statutory body set-up by Act of Parliament.

Issuer Selection:

- All eligible issuers with a conservative rating of AAA maturing in the eligible period will be shortlisted.
- All issuers with a minimum total amount outstanding of Rs. 500 crores in the eligible period will be selected. Minimum 4 issuers are to be included in the index.
- Only listed issuers shall be included in the index. An issuer will be considered to be listed if at least one security of such issuer is listed.

Security Selection:

- For each issuer selected, most liquid security based on liquidity score in the previous quarter will be selected. Securities maturing in the eligible period before the target date, with minimum amount outstanding of Rs. 100 crores will be considered. If there are no trades in the previous quarter for a particular issuer, then security nearest to the maturity from the eligible universe will be selected.
- Perpetual bonds, Floating rate bonds, Tax free bonds, GOI service bonds, GOI guaranteed bonds, Partly Paid, Partial Redemption and bonds with embedded call/put options are excluded from the universe of bonds.
- Liquidity score will be calculated based on the volume traded (70%), number of trades (15%) and days traded (15%) in the previous quarter.

Weighing Approach:

- Weights to the issuers will be divided equally.

Rebalancing and Downgrade:

- The rebalancing period will be quarterly.
- During the quarterly rebalancing, if a new issuer meets the eligibility criteria, it will be added to the index. The weights of the issuers will be reset to equal weights during the quarterly rebalancing, when a new issuer is added in the index, subject to 15% single issuer limit.
- The selected securities will be held till maturity unless a new security of same issuer is identified during quarterly rebalancing to be more liquid
- If government gives 'in principal approval' to disinvest its stake in any government owned entity, such entity will not be a part of the index at the time of inception of the index.
- If any existing constituent of the index gets in principal approval for disinvestment, such issuer, will be excluded from the index, only after the process of disinvestment is completed, during the quarter rebalancing of the index.
- In case if any issuer gets downgrade for the PSU AAA issuers, such issuers shall be excluded from the index within the next 5 working days.
- Any cash flows accruing to the index on account of coupon cash flows, part redemption of the security or securities, reinvested on the same day in the index in the proportion of existing weights.
- As the index includes securities that shall mature during the six-month period ending on the final maturity date of the index, any proceeds from the redemption of securities prior to the final maturity date of the index shall be reinvested according to following waterfall approach –
 - The proceeds from security redemption will be reinvested in the longest maturity outstanding security issued by the same issuer (state in case of SDL and Bond/money market instrument in case of corporate bond) and maturing on or just before the index maturity date.
 - In case a replacement in the form of outstanding security of the same issuer cannot be found for reinvestment then the proceeds from such redemption shall be reinvested in the remaining portfolio on the same date in the proportion of the existing weights. This will be subject to compliance to the SEBI portfolio concentration norms.
 - In case due to any reason, it is not possible to meet the portfolio concentration norms as prescribed by SEBI, then the proceeds from such redemption shall be reinvested in a T-Bill maturing on or just before the index maturity date.
 - If the last outstanding security (including T-Bill) in the index matures before the final index maturity date, all redemption proceeds shall be assumed to be re-invested in The Clearing Corporation of

India Ltd.'s (CCIL) TREPS overnight rate for any subsequent days till the maturity of the index.

The effective date of the above rebalancing shall be first working day of the quarter

SDL

Issuer Selection:

- All states with issuances maturing in the eligible period will be shortlisted
- Top 10 issuers with a minimum total amount outstanding of Rs. 1,000 crores in the eligible period will be selected on the basis of liquidity. If less than 10 issuers are available, all issuers will be selected. Minimum 4 issuers are to be included in the index.
- Liquidity score will be calculated based on the volume traded (70%), number of trades (15%) and days traded (15%) in the previous quarter.

Security Selection:

- For each issuer, most liquid security based on liquidity score in the previous quarter will be selected. Securities maturing in 6-month period before the target date, with minimum amount outstanding of Rs. 100 crores will be considered. If there are no trades in the previous quarter for a particular issuer, then security nearest to the maturity from the eligible universe will be selected.
- Liquidity score will be calculated based on the volume traded (70%), number of trades (15%) and days traded (15%) in the previous quarter.
- Uday bonds will be excluded.

Weighing Approach:

- Weights to the issuers will be divided equally.

Rebalancing and Downgrade:

- The rebalancing period will be quarterly.
- During the quarterly rebalancing, if a new issuer meets the eligibility criteria, it will be added to the index. The weights of the issuers will be reset to equal weights during the quarterly rebalancing, when a new issuer is added in the index.
- The selected securities will be held till maturity unless a new security of same issuer is identified during quarterly rebalancing to be more liquid
- Any cash flows accruing to the index on account of coupon cash flows, part redemption of the security or securities, reinvested on the same day in the index in the proportion of existing weights.
 - As the index includes securities that shall mature during the six-month period ending on the final maturity date of the index, any proceeds from the redemption of securities prior to the final maturity date of the index shall be reinvested according to following waterfall approach –
 - The proceeds from security redemption will be reinvested in the longest maturity outstanding security issued by the same issuer (state in case of SDL and Bond/money market instrument in case of corporate bond) and maturing on or just before the index maturity date.
 - In case a replacement in the form of outstanding security of the same issuer cannot be found for reinvestment then the proceeds from such redemption shall be reinvested in the remaining portfolio on the same date in the proportion of the existing weights.
 - In case due to any reason, it is not possible to meet the portfolio concentration norms as prescribed

by SEBI, then the proceeds from such redemption shall be reinvested in a T-Bill maturing on or just before the index maturity date.

- If the last outstanding security (including T-Bill) in the index matures before the final index maturity date, all redemption proceeds shall be assumed to be re-invested in The Clearing Corporation of India Ltd.'s (CCIL) TREPS overnight rate for any subsequent days till the maturity of the index.

The effective date of the above rebalancing shall be first working day of the quarter

'Any index having maturity date on a weekend (Saturday and Sunday) or on a holiday, or on an unplanned market off, will mature on the next working day.'

CRISIL-IBX 50:50 Gilt Plus SDL Index – April 2028

CRISIL-IBX 50:50 Gilt Plus SDL Index – April 2028 seeks to track the performance of Gilt and SDL securities maturing between 01 May 2027 to 30 April 2028. The index shall mature on 30 April 2028.

Asset Allocation

- **Gilt:** 50%
- **SDL:** 50%

The weights between asset classes may drift due to price movement, and will be reset Semi-annually

Features

- Total Return Index seeking to capture price and coupon returns of the underlying portfolio.
- It's a target date index which follows a roll-down approach.
- Government securities with a minimum outstanding of Rs. 25000 crores
- State issuers with a minimum outstanding of Rs. 1,000 crores in the eligible period, having the security nearest to maturity
- Index portfolio marked-to-market on a daily basis using CRISIL valuations
- Inception Date of Index: 10 March 2022.

Key Characteristics

- **Replicability:** The index constituents are valued on a daily basis. This lends the index a realistic approach by having the valuations close to the market levels

Methodology

Gilt

Security Selection:

- All Securities are selected on the basis of Amount Outstanding.
- Minimum Amount Outstanding should be Rs. 25000 crores.
- The index constituents are valued on a daily basis using CRISIL Valuations
- Surrogate bonds (namely Food Corporation of India bonds, Oil bonds, Fertilizer bonds and UTI Special Bonds), STRIPS and Floating rate bonds shall be kept out of the purview of the selection process.

Weighing Approach:

- Weights to individual securities will be calculated in the ratio of amount outstanding (30% weightage) and liquidity score (70% weightage).
- Liquidity score will be calculated based on the volume traded (70%), number of trades (15%) and days traded (15%) in the previous quarter.

Rebalancing, Review:

- Eligible securities will be added on a 6 monthly basis and weights will be redistributed based on ratio of amount outstanding (30% weightage) and liquidity score (70% weightage).

Cash flow reinvestment:

- Any cash flows accruing to the index on account of coupon cash flows, part redemption of the security or securities, will be reinvested on the same day in the index in the proportion of existing weights.
- As the index includes securities that shall mature during the twelve-month period ending on the final maturity date of the index, any proceeds from the redemption of securities prior to the final maturity date of the index shall be reinvested according to following waterfall approach –
 - The proceeds from security redemption will be reinvested in the longest maturity outstanding security and maturing on or just before the index maturity date.
 - In case a replacement in the form of outstanding security cannot be found for reinvestment then the proceeds from such redemption shall be reinvested in the remaining portfolio on the same date in the proportion of the existing weights.
 - In case if there are no eligible securities, then the proceeds from such redemption shall be reinvested in a T-Bill maturing on or just before the index maturity date.
 - If the last outstanding security (including T-Bill) in the index matures before the final index maturity date, all redemption proceeds shall be assumed to be re-invested in The Clearing Corporation of India Ltd.'s (CCIL) TREPS overnight rate for any subsequent days till the maturity of the index
- The relative weights of the Government securities will change due to price movement and will be reset during the 6 monthly rebalancing.

The effective date of the above rebalancing shall be first working day of the month

SDL
Issuer Selection:

- All states with issuances in maturing in the eligible period will be shortlisted
- Top 10 issuers identified at the time of inception of launch date with a minimum total amount outstanding of Rs. 1,000 crores in the eligible period will be selected on the basis of liquidity. If less than 10 issuers are available, all issuers will be selected.
- Liquidity score will be calculated based on the volume traded (70%), number of trades (15%) and days traded (15%) in the previous quarter.

Security Selection:

- For each issuer selected, security having maturity nearest to the target date shall be selected, from securities maturing in eligible period, with minimum amount outstanding of Rs. 100 crores will be considered.
- The index constituents are valued on a daily basis using CRISIL Valuations.
- Uday bonds will be excluded from the final universe.

Weighing Approach:

- Weights to the issuers will be divided equally, at the inception of the index.
- The weights may drift due to price movement and due to cash flows accruing on account of coupon cash

flows and will be reset during rebalancing.

Rebalancing and Downgrade:

- The index constituents will be reviewed on semi-annual basis.
- During the rebalancing, if any security of an issuer becomes eligible, it will be added to the index. Existing securities will not be excluded. Weight of the issuer will be divided among the securities.
- Any cash flows accruing to the index on account of coupon cash flows, part redemption of the security or securities, will be reinvested on the same day in the index in the proportion of existing weights.
- As the index includes securities that shall mature during the twelve-month period ending on the final maturity date of the index, any proceeds from the redemption of securities prior to the final maturity date of the index shall be reinvested according to following waterfall approach –
 - The proceeds from security redemption will be reinvested in the longest maturity outstanding security issued by the same issuer (state in case of SDL and Bond/money market instrument in case of corporate bond) and maturing on or just before the index maturity date.
 - In case a replacement in the form of outstanding security of the same issuer cannot be found for reinvestment then the proceeds from such redemption shall be reinvested in the remaining portfolio on the same date in the proportion of the existing weights.
 - In case due to any reason, it is not possible to meet the portfolio concentration norms as prescribed by SEBI, then the proceeds from such redemption shall be reinvested in a T-Bill maturing on or just before the index maturity date.
 - If the last outstanding security (including T-Bill) in the index matures before the final index maturity date, all redemption proceeds shall be assumed to be re-invested in The Clearing Corporation of India Ltd.'s (CCIL) TREPS overnight rate for any subsequent days till the maturity of the index.

The effective date of the above rebalancing shall be first working day of the month.

'Any index having maturity date on a weekend (Saturday and Sunday) or on a holiday, or on an unplanned market off, will mature on the next working day.'

CRISIL-IBX 60:40 SDL + AAA PSU Index – April 2025

CRISIL-IBX 60:40 SDL + AAA PSU Index – April 2025 seeks to track the performance of SDL and AAA PSU securities maturing between 01 November 2024 to 30 April 2025. The index shall mature on 30 April 2025.

Asset Allocation

- **SDL:** 60%
- **AAA PSU:** 40%

The weights between asset classes may drift due to price movement and will be reset Semi-annually.

Features

- Total Return Index seeking to capture price and coupon returns of the underlying portfolio.
- It's a target date index which follows a roll-down approach.
- State issuers with a minimum outstanding of Rs. 1,500 crores in the eligible period, having the security with the highest liquidity
- Corporate issuers with rating of AAA, issued by PSUs, with a minimum outstanding of Rs. 1,000 crores in the eligible period, having the security with the highest liquidity
- Index portfolio marked-to-market on a daily basis using CRISIL valuations
- Inception Date of Index: 24 March 2022.

Key Characteristics

- **Replicability:** The index constituents are valued on a daily basis. This lends the index a realistic approach by having the valuations close to the market levels

Methodology

SDL

Issuer Selection:

- All states with issuances maturing in the eligible period will be shortlisted
- 10 most liquid issuers with a minimum total amount outstanding of Rs. 1,500 crores in the eligible period will be selected on the basis of liquidity. If less than 10 issuers are available, all issuers will be selected. Minimum 5 issuers are to be included in the index.
- Liquidity score will be calculated based on the volume traded (70%), number of trades (15%) and days traded (15%) in the previous quarter.

Security Selection:

- For each issuer selected, most liquid security based on liquidity score in the previous quarter will be selected. Securities maturing in eligible period before the target date, with minimum amount outstanding of Rs. 1000 crores will be considered. If there are no trades in the previous quarter for a particular issuer, then security nearest to the maturity from the eligible universe will be selected.
- UDAY bonds will be excluded

Weighing Approach:

- Weights to the issuers will be divided equally as on the base date of the index.
- Weights will be reset every quarter

Rebalancing and downgrade:

- The index constituents will be reviewed on semi-annual basis.
- If any issuer becomes eligible, it will be added during the rebalancing, and the weights will be reset. Existing issuers will not be excluded.
- During the rebalancing, if any security of an issuer becomes eligible, it will be added to the index. Existing securities will not be excluded. Weight of the issuer will be divided among the securities.
- When any issuer is excluded, the weight of that particular issuer will be redistributed proportionally in rest of the issuers of same asset class.
- If the total number of SDL issuers fall below 5, when issuers are excluded due to any reason, new issuers will be added as per the criteria stated above.
- Any cash flows accruing to the index on account of coupon cash flows, part redemption of the security or securities, will be reinvested on the same day in the index in the proportion of existing weights.
- As the index includes securities that shall mature during the 6-month period ending on the final maturity date of the index, any proceeds from the redemption of securities prior to the final maturity date of the index shall be reinvested according to following waterfall approach
 - The proceeds from security redemption will be reinvested in the longest maturity outstanding security issued by the same issuer (state in case of SDL and Bond/money market instrument in case of corporate bond) and maturing on or just before the index maturity date.
 - In case a replacement in the form of outstanding security of the same issuer cannot be found for reinvestment then the proceeds from such redemption shall be reinvested in the remaining portfolio on the same date in the proportion of the existing weights.
 - In case due to any reason, it is not possible to meet the portfolio concentration norms as prescribed by SEBI, then the proceeds from such redemption shall be reinvested in a T-Bill maturing on or just before the index maturity date.
 - If the last outstanding security (including T-Bill) in the index matures before the final index maturity date, all redemption proceeds shall be assumed to be re-invested in The Clearing Corporation of India Ltd.'s (CCIL) TREPS overnight rate for any subsequent days till the maturity of the index.

The effective date of the above rebalancing shall be first working day of the month or the quarter

AAA PSU
Eligibility Norms:

Issuing entity should be domiciled in India and should satisfy either of the following:

- Central Public Sector Enterprises (CPSEs) as listed on DPE & DIPAM website.
- Maharatna, Navratna and Miniratna as listed on DPE website, if not included in CPSEs list as mentioned in point 1.
- Public Financial Institutions (PFIs) owned and managed by GOI and not included in points 1 and 2 above.
- Statutory body set-up by Act of Parliament, and included among others in the list of public enterprises

sourced from <https://www.indiabudget.gov.in/>

Issuer Selection:

- All eligible issuers with a conservative rating of AAA maturing in the eligible period will be shortlisted
- 10 most liquid issuers with a minimum total amount outstanding of Rs. 1,000 crores in the eligible period will be selected on the basis of liquidity. If less than 10 issuers are available, all issuers will be selected. Minimum 4 issuers are to be included in the index.
- Only listed issuers shall be included in the index. An issuer will be considered to be listed if at least one security of such issuer is listed.
- Liquidity score will be calculated based on the volume traded (70%), number of trades (15%) and days traded (15%) in the previous quarter.

Security Selection:

- For each issuer selected, most liquid security based on liquidity score in the previous quarter will be selected. Securities maturing in eligible period before the target date, with minimum amount outstanding of Rs. 500 crores will be considered. If there are no trades in the previous quarter for a particular issuer, then security nearest to the maturity from the eligible universe will be selected.
- Perpetual bonds, Floating rate bonds, Tax free bonds, GOI service bonds, GOI guaranteed bonds, CE Rated, Partly Paid, Partial Redemption and bonds with embedded call/put options are excluded from the universe of bonds.

Weighing Approach:

- Weights to the issuers will be divided equally as on the base date of the index.
- Each issuer will be subject to a cap of 15%
- Weights will be reset every quarter

Rebalancing and Downgrade:

- The index constituents will be reviewed on semi-annual basis.
- If any issuer becomes eligible, it will be added during the rebalancing, and the weights will be reset. Existing issuers will not be excluded
- During the rebalancing, if any security of an issuer becomes eligible, it will be added to the index. Existing securities will not be excluded. Weight of the issuer will be divided among the securities.
- If the issuer cap of 15% is being breached, additional / excess amount may be invested in the rest of the securities of the same asset class which are part of the index
- If government gives 'in principal approval' to disinvest its stake in any government owned entity, such entity will not be a part of the index at the time of inception of the index.
- If any existing constituent of the index gets in principal approval for disinvestment, such issuer, will be excluded from the index, only after the process of disinvestment is completed, during the quarter rebalancing of the index.
- In case if any issuer gets downgrade for the PSU AAA issuers, such issuers shall be excluded from the index within the next 5 working days.
- When the issuer is excluded, the weight of the particular issuer will be redistributed proportionally in rest of the issuers of same asset class, subject to 15% issuer cap.
- If the total number of AAA PSU issuers fall below 4, when issuers are excluded on the basis of above reasons

(Downgrade/disinvestment), new issuers will be added as per the criteria stated above.

- Any cash flows accruing to the index on account of coupon cash flows, part redemption of the security or securities, will be reinvested on the same day in the index in the proportion of existing weights.
- As the index includes securities that shall mature during the 6-month period ending on the final maturity date of the index, any proceeds from the redemption of securities prior to the final maturity date of the index shall be reinvested according to following waterfall approach-
 - The proceeds from security redemption will be reinvested in the longest maturity outstanding security issued by the same issuer (state in case of SDL and Bond/money market instrument in case of corporate bond) and maturing on or just before the index maturity date. This will be subject to 15% single issuer limit
 - In case a replacement in the form of outstanding security of the same issuer cannot be found for reinvestment then the proceeds from such redemption shall be reinvested in the remaining portfolio on the same date in the proportion of the existing weights. This will be subject to compliance to the SEBI portfolio concentration norms (single issuer weight cap of 15%)
 - In case due to any reason, it is not possible to meet the portfolio concentration norms as prescribed by SEBI, then the proceeds from such redemption shall be reinvested in a T-Bill maturing on or just before the index maturity date.
 - If the last outstanding security (including T-Bill) in the index matures before the final index maturity date, all redemption proceeds shall be assumed to be re-invested in The Clearing Corporation of India Ltd.'s (CCIL) TREPS overnight rate for any subsequent days till the maturity of the index.

The effective date of the above rebalancing shall be first working day of the month or the quarter

‘Any index having maturity date on a weekend (Saturday and Sunday) or on a holiday, or on an unplanned market off, will mature on the next working day.’

CRISIL-IBX 60:40 SDL + AAA PSU Index – April 2027 seeks to track the performance of SDL and AAA PSU securities maturing between 01 May 2026 to 30 April 2027. The index shall mature on 30 April 2027.

Asset Allocation

- **SDL:** 60%
- **AAA PSU:** 40%

The weights between asset classes may drift due to price movement, and will be reset Semi-annually

Features

- Total Return Index seeking to capture price and coupon returns of the underlying portfolio.
- It's a target date index which follows a roll-down approach.
- State issuers with a minimum outstanding of Rs. 1,500 crores in the eligible period, having the security with the highest liquidity
- Corporate issuers with rating of AAA, issued by PSUs, with a minimum outstanding of Rs. 1,000 crores in the eligible period, having the security with the highest liquidity
- Index portfolio marked-to-market on a daily basis using CRISIL valuations
- Inception Date of Index: 24 March 2022.

Key Characteristics

- **Replicability:** The index constituents are valued on a daily basis. This lends the index a realistic approach by having the valuations close to the market levels

Methodology

SDL

Issuer Selection:

- All states with issuances in maturing in the eligible period will be shortlisted
- 12 most liquid issuers with a minimum total amount outstanding of Rs. 1,500 crores in the eligible period will be selected on the basis of liquidity. If less than 12 issuers are available, all issuers will be selected. Minimum 5 issuers are to be included in the index.
- Liquidity score will be calculated based on the volume traded (70%), number of trades (15%) and days traded (15%) in the previous quarter.

Security Selection:

- For each issuer selected, security having maturity nearest to the target date shall be selected, from securities maturing in eligible period, with minimum amount outstanding of Rs. 1500 crores.
- UDAY bonds will be excluded

Weighing Approach:

- Weights to the issuers will be divided equally as on the base date of the index.
- Weights will be reset every quarter

Rebalancing and downgrade:

- The index constituents will be reviewed on semi-annual basis.
- If any issuer becomes eligible, it will be added during the rebalancing, and the weights will be reset. Existing issuers will not be excluded
- During the rebalancing, if any security of an issuer becomes eligible, it will be added to the index. Existing securities will not be excluded. Weight of the issuer will be divided among the securities.
- When any issuer is excluded, the weight of that particular issuer will be redistributed proportionally in rest of the issuers of same asset class.
- If the total number of SDL issuers fall below 5, when issuers are excluded due to any reason, new issuers will be added as per the criteria stated above.
- Any cash flows accruing to the index on account of coupon cash flows, part redemption of the security or securities, will be reinvested on the same day in the index in the proportion of existing weights.
- As the index includes securities that shall mature during the 6-month period ending on the final maturity date of the index, any proceeds from the redemption of securities prior to the final maturity date of the index shall be reinvested according to following waterfall approach
 - The proceeds from security redemption will be reinvested in the longest maturity outstanding security issued by the same issuer (state in case of SDL and Bond/money market instrument in case of corporate bond) and maturing on or just before the index maturity date.
 - In case a replacement in the form of outstanding security of the same issuer cannot be found for reinvestment then the proceeds from such redemption shall be reinvested in the remaining portfolio on the same date in the proportion of the existing weights.
 - In case due to any reason, it is not possible to meet the portfolio concentration norms as prescribed by SEBI, then the proceeds from such redemption shall be reinvested in a T-Bill maturing on or just before the index maturity date.
 - If the last outstanding security (including T-Bill) in the index matures before the final index maturity date, all redemption proceeds shall be assumed to be re-invested in The Clearing Corporation of India Ltd.'s (CCIL) TREPS overnight rate for any subsequent days till the maturity of the index.

The effective date of the above rebalancing shall be first working day of the month or the quarter

AAA PSU**Eligibility Norms:**

Issuing entity should be domiciled in India and should satisfy either of the following:

- Central Public Sector Enterprises (CPSEs) as listed on DPE & DIPAM website.
- Maharatna, Navratna and Miniratna as listed on DPE website, if not included in CPSEs list as mentioned in point 1.

- Public Financial Institutions (PFIs) owned and managed by GOI and not included in points 1 and 2 above.
- Statutory body set-up by Act of Parliament, and included among others in the list of public enterprises sourced from <https://www.indiabudget.gov.in/>

Issuer Selection:

- All eligible issuers with a conservative rating of AAA maturing in the eligible period will be shortlisted
- 8 most liquid issuers with a minimum total amount outstanding of Rs. 1,000 crores in the eligible period will be selected on the basis of liquidity. If less than 8 issuers are available, all issuers will be selected. Minimum 4 issuers are to be included in the index.
- Only listed issuers shall be included in the index. An issuer will be considered to be listed if at least one security of such issuer is listed.
- Liquidity score will be calculated based on the volume traded (70%), number of trades (15%) and days traded (15%) in the previous quarter.

Security Selection:

- For each issuer selected, security having maturity nearest to the target date shall be selected, from securities maturing in eligible period, with minimum amount outstanding of Rs. 500 crores.
- Perpetual bonds, Floating rate bonds, Tax free bonds, GOI service bonds, GOI guaranteed bonds, CE Rated, Partly Paid, Partial Redemption and bonds with embedded call/put options are excluded from the universe of bonds.

Weighing Approach:

- Weights to the issuers will be divided equally as on the base date of the index.
- Each issuer will be subject to a cap of 15%
- Weights will be reset every quarter

Rebalancing and Downgrade:

- The index constituents will be reviewed on semi-annual basis.
- If any issuer becomes eligible, it will be added during the rebalancing, and the weights will be reset. Existing issuers will not be excluded
- During the rebalancing, if any security of an issuer becomes eligible, it will be added to the index. Existing securities will not be excluded. Weight of the issuer will be divided among the securities.
- If the issuer cap of 15% is being breached, additional / excess amount may be invested in the rest of the securities of the same asset class which are part of the index
- If government gives 'in principal approval' to disinvest its stake in any government owned entity, such entity will not be a part of the index at the time of inception of the index.
- If any existing constituent of the index gets in principal approval for disinvestment, such issuer, will be excluded from the index, only after the process of disinvestment is completed, during the quarter rebalancing of the index.
- In case if any issuer gets downgrade for the PSU AAA issuers, such issuers shall be excluded from the index within the next 5 working days.
- When the issuer is excluded, the weight of the particular issuer will be redistributed proportionally in rest of the issuers of same asset class, subject to 15% issuer cap.
- If the total number of AAA PSU issuers fall below 4, when issuers are excluded on the basis of above reasons (Downgrade/disinvestment), new issuers will be added as per the criteria stated above.

- Any cash flows accruing to the index on account of coupon cash flows, part redemption of the security or securities, will be reinvested on the same day in the index in the proportion of existing weights.
- As the index includes securities that shall mature during the 6-month period ending on the final maturity date of the index, any proceeds from the redemption of securities prior to the final maturity date of the index shall be reinvested according to following waterfall approach-
 - The proceeds from security redemption will be reinvested in the longest maturity outstanding security issued by the same issuer (state in case of SDL and Bond/money market instrument in case of corporate bond) and maturing on or just before the index maturity date. This will be subject to 15% single issuer limit
 - In case a replacement in the form of outstanding security of the same issuer cannot be found for reinvestment then the proceeds from such redemption shall be reinvested in the remaining portfolio on the same date in the proportion of the existing weights. This will be subject to compliance to the SEBI portfolio concentration norms (single issuer weight cap of 15%) for indices used by passive funds.
 - In case due to any reason, it is not possible to meet the portfolio concentration norms as prescribed by SEBI, then the proceeds from such redemption shall be reinvested in a T-Bill maturing on or just before the index maturity date.
 - If the last outstanding security (including T-Bill) in the index matures before the final index maturity date, all redemption proceeds shall be assumed to be re-invested in The Clearing Corporation of India Ltd.'s (CCIL) TREPS overnight rate for any subsequent days till the maturity of the index.

The effective date of the above rebalancing shall be first working day of the month or the quarter

'Any index having maturity date on a weekend (Saturday and Sunday) or on a holiday, or on an unplanned market off, will mature on the next working day.'

CRISIL-IBX ESG Index – March 2026

CRISIL-IBX ESG Index – March 2026 seeks to track the performance of corporate bonds maturing between 31 March 2025 to 30 March 2026. The index shall mature on 30 March 2026.

Asset Allocation

- **Corporate Bonds:** 100%

Features

- Total Return Index seeking to capture price and coupon returns of the underlying portfolio.
- It's a target date index which follows a roll-down approach.
- Corporate issuers with ESG score between 61 to 100, with a minimum outstanding of Rs. 500 crores in the eligible period, having the security nearest to maturity.
- Index portfolio marked-to-market on a daily basis using CRISIL valuations
- Inception Date of Index: 31 March 2021.

Key Characteristics

- **Replicability:** The index constituents are valued on a daily basis. This lends the index a realistic approach by having the valuations close to the market levels

Methodology

Issuer Selection:

- All eligible issuers maturing in the eligible period will be shortlisted
- All issuers with a minimum total amount outstanding of Rs. 500 crores in the eligible period will be selected. Minimum 8 issuers are to be selected.
- Only listed issuers shall be included in the index. An issuer will be considered to be listed if at least one security of such issuer is listed.

Security Selection:

- For each issuer selected, security having maturity nearest to the target date shall be selected, from securities maturing in eligible period, with minimum amount outstanding of Rs. 100 crores.
- Perpetual bonds, Floating rate bonds, Tax free bonds, CE Rated, Partly Paid, Partial Redemption and bonds with single option (call/put), shall be excluded from the universe of bonds.

Weighing Approach:

- Weights to the issuers will be divided equally as on the base date of the index.
- Each issuer will be subject to a cap of 15%
- Weights will be reset during the annual rebalancing

Rebalancing and downgrade:

- The rebalancing period will be annually.
- During the rebalancing, if a new issuer meets the ESG score eligibility criteria, it will be added to the index.
- If ESG score of any issuer falls below 61, it will be excluded during the rebalancing.
- The selected securities will be held till maturity.
- If the issuer cap of 15% is being breached, additional / excess amount may be invested in the rest of the securities which are part of the index
- Any cash flows accruing to the index on account of coupon cash flows, part redemption of the security or securities, will be reinvested on the same day in the index in the proportion of existing weights, subject to 15% single issuer limit.
- As the index includes securities that shall mature during the 12-month period ending on the final maturity date of the index, any proceeds from the redemption of securities prior to the final maturity date of the index shall be reinvested according to following waterfall approach -
 - The proceeds from security redemption will be reinvested in the longest maturity outstanding security issued by the same issuer and maturing on or just before the index maturity date. This will be subject to 15% single issuer limit
 - In case a replacement in the form of outstanding security of the same issuer cannot be found for reinvestment then the proceeds from such redemption shall be reinvested in the remaining portfolio on the same date in the proportion of the existing weights. This will be subject to compliance to the SEBI portfolio concentration norms (minimum 8 issuers and single issuer weight cap of 15%.
 - In case due to any reason, it is not possible to meet the portfolio concentration norms as prescribed by SEBI, then the proceeds from such redemption shall be reinvested in a T-Bill maturing on or just before the index maturity date.
 - If the last outstanding security (including T-Bill) in the index matures before the final index maturity date, all redemption proceeds shall be assumed to be re-invested in The Clearing Corporation of India Ltd.'s (CCIL) TREPS overnight rate for any subsequent days till the maturity of the index.

CRISIL-IBX Gilt Index – April 2029

CRISIL-IBX Gilt Index – April 2029 seeks to track the performance of gilt issuers with total amount outstanding greater than Rs. 5,000 crores maturing between 21st April 2028 to 20th April 2029. The index shall mature on 20th April 2029.

Asset Allocation

- **Government Bonds:** 100%

Features

- Total Return Index seeking to capture price and coupon returns of the underlying portfolio.
- It's a target date index which follows a roll-down approach.
- The index uses a buy and hold strategy wherein the portfolio of G-sec is held till maturity unless they become ineligible.
- Index portfolio marked-to-market on a daily basis using CRISIL Gilt and T-Bills valuations.
- Inception Date of Index: 16th September 2022.

Key Characteristics

- **Replicability:** The index constituents are valued on a daily basis. This lends the index a realistic approach by having the valuations close to the market levels

Methodology

Security Selection:

- Only fixed coupon bearing plain vanilla G-Sec will only be eligible for the index
- All eligible Securities shall be selected on the basis of Amount Outstanding as evaluated during the inception date of the index.
- Minimum Amount Outstanding should be Rs. 5000 crores.
- Surrogate bonds (namely Food Corporation of India bonds, Oil bonds, Fertilizer bonds and UTI Special Bonds), STRIPS and Floating rate bonds shall be kept out of the purview of the selection process.

Weighing Approach:

- Weights to individual securities will be calculated in the ratio of amount outstanding (30% weightage) and liquidity score (70% weightage). The weights may vary on account of relative price movements
- Liquidity score will be calculated based on the volume traded (70%), number of trades (15%) and days traded (15%) in the previous quarter.
- Weights will be reset during the rebalancing period.

Rebalancing and downgrade:

- The index constituents will be reviewed on quarterly basis and the eligible securities will be added on a quarterly basis.
- If any securities become eligible, it will be added during the rebalancing, and the weights will be reset. The

weights may vary on account of relative price movements

- Any cash flows accruing to the index on account of coupon cash flows, part redemption of the security or securities, will be reinvested on the same day in the index in the proportion of existing weights
- As the index includes securities that shall mature during the 12-month period ending on the final maturity date of the index, any proceeds from the redemption of securities prior to the final maturity date of the index shall be reinvested according to following waterfall approach -
 - The proceeds from security redemption will be reinvested in the longest maturity outstanding security issued by the same issuer and maturing on or just before the index maturity date.
 - In case a replacement in the form of outstanding security of the same issuer cannot be found for reinvestment then the proceeds from such redemption shall be reinvested in the remaining portfolio on the same date in the proportion of the existing weights.
 - In case due to any reason, it is not possible to reinvest as per the above criteria, then the proceeds from such redemption shall be reinvested in a T-Bill maturing on or just before the index maturity date.
 - If the last outstanding security (including T-Bill) in the index matures before the final index maturity date, all redemption proceeds shall be assumed to be re-invested in The Clearing Corporation of India Ltd.'s (CCIL) TREPS overnight rate for any subsequent days till the maturity of the index.
- The effective date of the above rebalancing shall be first working day of the month or the quarter.
- Any index having maturity date on a weekend (Saturday and Sunday) or on a holiday, or on an unplanned market off, will mature on the next working day.'

CRISIL-IBX SDL Index – September 2027

CRISIL-IBX SDL Index – September 2027. Seeks to track the performance of SDL securities maturing between 01st April 2027 to 30th September 2027. The index shall mature on 30th September 2027.

Asset Allocation

- **SDL:** 100%

Features

- Total Return Index seeking to capture price and coupon returns of the underlying portfolio.
- It's a target date index which follows a roll-down approach.
- State issuers having the most liquid security with a minimum outstanding of Rs. 1,000 crores in the eligible period.
- Index portfolio marked-to-market on a daily basis using CRISIL valuations
- Inception Date of Index: 16 September 2022.

Key Characteristics

- **Replicability:** The index constituents are valued on a daily basis. This lends the index a realistic approach by having the valuations close to the market levels

Methodology

Issuer Selection:

- All states with issuances in maturing in the eligible period will be shortlisted
- 10 most liquid issuers based on liquidity score as evaluated during the index inception date with minimum total outstanding of Rs. 5000 crores in the eligible period will be selected on the basis of liquidity. If less than 10 issuers are available, all issuers will be selected.
- Liquidity score will be calculated based on the volume traded (70%), number of trades (15%) and days traded (15%) in the previous quarter.

Security Selection:

- For each issuer selected, most liquid security based on liquidity score in the previous quarter as evaluated during the index inception date will be selected. Securities maturing in eligible period before the target date, with minimum amount outstanding of Rs. 1000 crores will be considered. If there are no trades in the previous quarter for a particular issuer, then security nearest to the maturity from the eligible universe will be selected.
- UDAY bonds will be excluded

Weighing Approach:

- Weights to the issuers will be divided equally as on the base date of the index. The weights may vary on account of relative price movements
- Weights will be reset during every rebalancing

Rebalancing and downgrade:

- The index constituents will be reviewed on semi-annual basis.
- If any issuer becomes eligible, it will be added during the rebalancing, and the weights will be reset.
- If the total number of SDL issuers fall below 10, when issuers are excluded due to any reason, new issuers will be added as per the criteria stated above.
- Any cash flows accruing to the index on account of coupon cash flows, part redemption of the security or securities, will be reinvested on the same day in the index in the proportion of existing weights
- As the index includes securities that shall mature during the 6-month period ending on the final maturity date of the index, any proceeds from the redemption of securities prior to the final maturity date of the index shall be reinvested according to following waterfall approach -
 - The proceeds from security redemption will be reinvested in the longest maturity outstanding security issued by the same issuer and maturing on or just before the index maturity date.
 - In case a replacement in the form of outstanding security of the same issuer cannot be found for reinvestment then the proceeds from such redemption shall be reinvested in the remaining portfolio on the same date in the proportion of the existing weights.
 - In case due to any reason, it is not possible to reinvest as per the above criteria, then the proceeds from such redemption shall be reinvested in a T-Bill maturing on or just before the index maturity date.
 - If the last outstanding security (including T-Bill) in the index matures before the final index maturity date, all redemption proceeds shall be assumed to be re-invested in The Clearing Corporation of India Ltd.'s (CCIL) TREPS overnight rate for any subsequent days till the maturity of the index.
- The effective date of the above rebalancing shall be first working day of the month or the quarter.
- Any index having maturity date on a weekend (Saturday and Sunday) or on a holiday, or on an unplanned market off, will mature on the next working day.

CRISIL-IBX Gilt Index – April 2026

CRISIL-IBX Gilt Index – April 2026 seeks to track the performance of gilt issuers with total amount outstanding greater than Rs. 25,000 crores maturing between 1st November 2025 to 30th April 2026. The index shall mature on 30th April 2026.

Asset Allocation

- **Government Bonds:** 100%

Features

- Total Return Index seeking to capture price and coupon returns of the underlying portfolio.
- It's a target date index which follows a roll-down approach.
- The index uses a buy and hold strategy wherein the portfolio of G-sec is held till maturity unless they become ineligible
- Index portfolio marked-to-market on a daily basis using CRISIL Gilt and T-Bills valuations
- Inception Date of Index: 22nd September 2022.

Key Characteristics

- **Replicability:** The index constituents are valued on a daily basis. This lends the index a realistic approach by having the valuations close to the market levels

Methodology

Security Selection:

- Only fixed coupon bearing plain vanilla G-Sec will only be eligible for the index
- All eligible Securities shall be selected on the basis of Amount Outstanding as evaluated during the inception date of the index.
- Minimum Amount Outstanding should be Rs. 25000 crores.
- Surrogate bonds (namely Food Corporation of India bonds, Oil bonds, Fertilizer bonds and UTI Special Bonds), STRIPS and Floating rate bonds shall be kept out of the purview of the selection process.

Weighing Approach:

- Weights to individual securities will be calculated in the ratio of amount outstanding (30% weightage) and liquidity score (70% weightage). The weights may vary on account of relative price movements
- Liquidity score will be calculated based on the volume traded (70%), number of trades (15%) and days traded (15%) in the previous quarter
- Weights will be reset during the rebalancing period.

Rebalancing and review:

- The securities shall be rebalanced every 6 months and the relative weights of the Government securities will change due to price movement and will be reset during the half-yearly rebalancing.
- Eligible securities will be added on a half-yearly basis and weights will be redistributed based on ratio of

amount outstanding (30% weightage) and liquidity score (70% weightage).

- Any cash flows accruing to the index on account of coupon cash flows, part redemption of the security or securities, will be reinvested on the same day in the index in the proportion of existing weights.
- As the index includes securities that shall mature during the 6-month period ending on the final maturity date of the index, any proceeds from the redemption of securities prior to the final maturity date of the index shall be reinvested according to following waterfall approach –
 - The proceeds from security redemption will be reinvested in the longest maturity outstanding government security issued by the same issuer and maturing on or just before the index maturity date.
 - In case a replacement in the form of another outstanding government security cannot be found for reinvestment then the proceeds from such redemption shall be reinvested in the remaining portfolio on the same date in the proportion of the existing weights
 - In case due to any reason, it is not possible to meet the requirements stated in point a and b above, then the proceeds from such redemption shall be reinvested in a T-Bill maturing on or just before the index maturity date.
 - If the last outstanding security (including T-Bill) in the index matures before the final index maturity date, all redemption proceeds shall be assumed to be re-invested in The Clearing Corporation of India Ltd.'s (CCIL) TREPS overnight rate for any subsequent days till the maturity of the index.
- The effective date of the above rebalancing shall be first working day of the month or the quarter.
- Any index having maturity date on a weekend (Saturday and Sunday) or on a holiday, or on an unplanned market off, will mature on the next working day.'

Portfolio as on 03 October 2023

CRISIL-IBX Gilt Index – April 2033

CRISIL-IBX Gilt Index – April 2033 seeks to track the performance of gilt issuers maturing between 1st May 2032 to 29th April 2033. The index shall mature on 29th April 2033.

Asset Allocation

- **Government Bonds:** 100%

Features

- Total Return Index seeking to capture price and coupon returns of the underlying portfolio.
- It's a target date index which follows a roll-down approach.
- The index uses a buy and hold strategy wherein the portfolio of G-sec is held till maturity unless they become ineligible.
- Index portfolio marked-to-market on a daily basis using CRISIL Gilt and T-Bills valuations.
- Inception Date of Index: 23rd September 2022.

Key Characteristics

- **Replicability:** The index constituents are valued on a daily basis. This lends the index a realistic approach by having the valuations close to the market levels.

Methodology

Security Selection:

- Only fixed coupon bearing plain vanilla G-Sec will only be eligible for the index
- All eligible Securities shall be selected on the basis of Amount Outstanding as evaluated during the inception date of the index.
- Surrogate bonds (namely Food Corporation of India bonds, Oil bonds, Fertilizer bonds and UTI Special Bonds), STRIPS and Floating rate bonds shall be kept out of the purview of the selection process.

Weighing Approach:

- Weights to individual securities will be calculated in the ratio of amount outstanding (30% weightage) and liquidity score (70% weightage). The weights may vary on account of relative price movements
- Liquidity score will be calculated based on the volume traded (70%), number of trades (15%) and days traded (15%) in the previous quarter
- Weights will be reset during the rebalancing period.

Rebalancing and review:

- The index constituents will be reviewed on quarterly basis and the eligible securities will be added every quarter.
- If any security becomes eligible, it will be added during the rebalancing process, and the weights will be reset as per weighing approach explained above.
- Any cash flows accruing to the index on account of coupon cash flows, part redemption of the security or

securities, will be reinvested on the same day in the index in the proportion of existing weights

- As the index includes securities that shall mature during the 12-month period ending on the final maturity date of the index, any proceeds from the redemption of securities prior to the final maturity date of the index shall be reinvested according to following waterfall approach -
 - The proceeds from security redemption will be reinvested in the longest maturity outstanding security maturing on or just before the index maturity date.
 - In case a replacement in the form of outstanding security cannot be found for reinvestment then the proceeds from such redemption shall be reinvested in the remaining portfolio on the same date in the proportion of the existing weights.
 - In case due to any reason, it is not possible to reinvest as per the above criteria, then the proceeds from such redemption shall be reinvested in a T-Bill maturing on or just before the index maturity date.
 - If the last outstanding security (including T-Bill) in the index matures before the final index maturity date, all redemption proceeds shall be assumed to be re-invested in The Clearing Corporation of India Ltd.'s (CCIL) TREPS overnight rate for any subsequent days till the maturity of the index.
- The effective date of the above rebalancing shall be first working day of the month or the quarter.
- Any index having maturity date on a weekend (Saturday and Sunday) or on a holiday, or on an unplanned market off, will mature on the next working day.

Portfolio as on 01 January 2024

CRISIL-IBX 50:50 Gilt Plus SDL Index – April 2037

CRISIL-IBX 50:50 Gilt Plus SDL Index – April 2037 seeks to track the performance of Gilt and SDL securities maturing between 01 May 2036 to 29 April 2037. The index shall mature on 29 April 2037.

Asset Allocation

- **Gilt:** 50%
- **SDL:** 50%

The weights between asset classes may drift due to price movement and will be reset quarterly.

Features

- Total Return Index seeking to capture price and coupon returns of the underlying portfolio.
- It's a target date index which follows a roll-down approach.
- Government securities with a minimum outstanding of Rs. 10000 crores, having the security with highest liquidity.
- State issuers with a minimum outstanding of Rs. 1,000 crores in the eligible period, having the security with highest liquidity.
- Index portfolio marked-to-market on a daily basis using CRISIL valuations
- Inception Date of Index: 23rd September 2022.

Key Characteristics

- **Replicability:** The index constituents are valued on a daily basis. This lends the index a realistic approach by having the valuations close to the market levels

Methodology

Gilt

Security Selection:

- Most liquid securities in the eligible period will be selected. If less than 5 securities are available, all securities will be selected.
- Minimum Amount Outstanding should be Rs. 10,000 crores.
- The index constituents are valued on a daily basis using CRISIL Valuations.
- Surrogate bonds (namely Food Corporation of India bonds, Oil bonds, Fertilizer bonds and UTI Special Bonds), STRIPS and Floating rate bonds shall be kept out of the purview of the selection process.

Weighing Approach:

- Weights to individual securities will be calculated in the ratio of amount outstanding (30% weightage) and liquidity score (70% weightage).
- Liquidity score will be calculated based on the volume traded (70%), number of trades (15%) and days traded (15%) in the previous quarter.
- Weights will be reset during the quarterly rebalancing.

Rebalancing and Review:

- Eligible securities will be added on a quarterly basis and weights will be redistributed based on ratio of amount outstanding (30% weightage) and liquidity score (70% weightage).
- Any cash flows accruing to the index on account of coupon cash flows, part redemption of the security or securities, will be reinvested on the same day in the index in the proportion of existing weights.
- As the index includes securities that shall mature during the twelve-month period ending on the final maturity date of the index, any proceeds from the redemption of securities prior to the final maturity date of the index shall be reinvested according to following waterfall approach –
 - The proceeds from security redemption will be reinvested in the longest maturity outstanding security and maturing on or just before the index maturity date.
 - In case a replacement in the form of outstanding security cannot be found for reinvestment then the proceeds from such redemption shall be reinvested in the remaining portfolio on the same date in the proportion of the existing weights.
 - In case if there are no eligible securities, then the proceeds from such redemption shall be reinvested in a T-Bill maturing on or just before the index maturity date.
 - If the last outstanding security (including T-Bill) in the index matures before the final index maturity date, all redemption proceeds shall be assumed to be re-invested in The Clearing Corporation of India Ltd.'s (CCIL) TREPS overnight rate for any subsequent days till the maturity of the index
- The effective date of the above rebalancing shall be first working day of the month or the quarter.
- Any index having maturity date on a weekend (Saturday and Sunday) or on a holiday, or on an unplanned market off, will mature on the next working day.

SDL**Issuer Selection:**

- All states with issuances in maturing in the eligible period will be shortlisted
- 5 most liquid issuers with a minimum total amount outstanding of Rs. 1000 crores in the eligible period will be selected on the basis of liquidity. If less than 5 issuers are available, all issuers will be selected.
- Liquidity score will be calculated based on the volume traded (70%), number of trades (15%) and days traded (15%) in the previous quarter

Security Selection:

- For each issuer selected, most liquid security based on liquidity score in the previous quarter will be selected. Securities maturing in eligible period before the target date, with minimum amount outstanding of Rs. 500 crores will be considered. If there are no trades in the previous quarter for a particular issuer, then security nearest to the maturity from the eligible universe will be selected.
- The index constituents are valued on a daily basis using CRISIL Valuations.

Weighing Approach:

- Weights to the issuers will be divided equally, at the inception of the index.
- The weights may drift due to price movement and due to cash flows accruing on account of coupon cash flows and will be reset during rebalancing.
- Weights will reset every quarter.

Rebalancing and Review:

- The rebalancing period will be quarterly.
- During the quarterly rebalancing, if a new issuer meets the eligibility criteria, it will be added to the index. The weights of the issuers will be reset to equal weights during the quarterly rebalancing, when a new issuer is added in the index.
- The selected securities will be held till maturity unless a new security of same issuer is identified during, quarterly rebalancing to be more liquid.
- Any cash flows accruing to the index on account of coupon cash flows, part redemption of the security or securities, will be reinvested on the same day in the index in the proportion of existing weights.
- As the index includes securities that shall mature during the twelve-month period ending on the final maturity date of the index, any proceeds from the redemption of securities prior to the final maturity date of the index shall be reinvested according to following waterfall approach
 - The proceeds from security redemption will be reinvested in the longest maturity outstanding security issued by the same issuer and maturing on or just before the index maturity date.
 - In case a replacement in the form of outstanding security of the same issuer cannot be found for reinvestment then the proceeds from such redemption shall be reinvested in the remaining portfolio on the same date in the proportion of the existing weights.
 - In case due to any reason, it is not possible to reinvest in any issuer or security, then the proceeds from such redemption shall be reinvested in a T-Bill maturing on or just before the index maturity date.
 - If the last outstanding security (including T-Bill) in the index matures before the final index maturity date, all redemption proceeds shall be assumed to be re-invested in The Clearing Corporation of India Ltd.'s (CCIL) TREPS overnight rate for any subsequent days till the maturity of the index.
- The effective date of the above rebalancing shall be first working day of the month or the quarter.
- Any index having maturity date on a weekend (Saturday and Sunday) or on a holiday, or on an unplanned market off, will mature on the next working day.

CRISIL-IBX 50:50 Gilt Plus SDL Index – June 2027

CRISIL-IBX 50:50 Gilt Plus SDL Index – June 2027 seeks to track the performance of Gilt and SDL securities maturing between 01 January 2027 to 30 June 2027. The index shall mature on 30 June 2027.

Asset Allocation

- **Gilt:** 50%
- **SDL:** 50%

The weights between asset classes may drift due to price movement and will be reset quarterly.

Features

- Total Return Index seeking to capture price and coupon returns of the underlying portfolio.
- It's a target date index which follows a roll-down approach.
- Government securities with a minimum outstanding of Rs. 25,000 crores, having the security with highest liquidity.
- State issuers with a minimum outstanding of Rs. 1,000 crores in the eligible period, having the security with highest liquidity.
- Index portfolio marked-to-market on a daily basis using CRISIL valuations
- Inception Date of Index: 4th October 2022.

Key Characteristics

- **Replicability:** The index constituents are valued on a daily basis. This lends the index a realistic approach by having the valuations close to the market levels

Methodology

Gilt

Security Selection:

- 2 most liquid securities in the eligible period will be selected. If less than 5 securities are available, all securities will be selected.
- Minimum Amount Outstanding should be Rs. 25,000 crores.
- The index constituents are valued on a daily basis using CRISIL Valuations.
- Surrogate bonds (namely Food Corporation of India bonds, Oil bonds, Fertilizer bonds and UTI Special Bonds), STRIPS and Floating rate bonds shall be kept out of the purview of the selection process.

Weighing Approach:

- Weights to individual securities will be calculated in the ratio of amount outstanding (30% weightage) and liquidity score (70% weightage).
- Liquidity score will be calculated based on the volume traded (70%), number of trades (15%) and days traded (15%) in the previous quarter.

Rebalancing and Review:

- The most 2 liquid securities shall be reviewed every quarter.
- Eligible securities will be added on a quarterly basis and weights will be redistributed based on ratio of amount outstanding (30% weightage) and liquidity score (70% weightage).
- The existing securities will not be removed unless the security's amount outstanding falls below 25000 cr.
- Any cash flows accruing to the index on account of coupon cash flows, part redemption of the security or securities, will be reinvested on the same day in the index in the proportion of existing weights.
- As the index includes securities that shall mature during the six-month period ending on the final maturity date of the index, any proceeds from the redemption of securities prior to the final maturity date of the index shall be reinvested according to following waterfall approach –
 - The proceeds from security redemption will be reinvested in the longest maturity outstanding security and maturing on or just before the index maturity date.
 - In case a replacement in the form of outstanding security cannot be found for reinvestment then the proceeds from such redemption shall be reinvested in the remaining portfolio on the same date in the proportion of the existing weights.
 - In case if there are no eligible securities, then the proceeds from such redemption shall be reinvested in a T-Bill maturing on or just before the index maturity date.
 - If the last outstanding security (including T-Bill) in the index matures before the final index maturity date, all redemption proceeds shall be assumed to be re-invested in The Clearing Corporation of India Ltd.'s (CCIL) TREPS overnight rate for any subsequent days till the maturity of the index
- The effective date of the above rebalancing shall be first working day of the month or the quarter.
- Any index having maturity date on a weekend (Saturday and Sunday) or on a holiday, or on an unplanned market off, will mature on the next working day.
- The relative weights of the Government securities will change due to price movement and will be reset during the quarterly rebalancing.

SDL

Issuer Selection:

- All states with issuances having maturities in the eligible period will be shortlisted.
- Top 15 issuers with a minimum total amount outstanding of Rs. 1,000 crores in the eligible period will be selected based on liquidity. If less than 15 issuers are available, all issuers will be selected.
- Liquidity score will be calculated based on the volume traded (70%), number of trades (15%) and days traded (15%) in the previous quarter.
- Uday Bonds will be excluded.

Security Selection:

- For each issuer selected, security having highest liquidity shall be selected, from securities maturing in 6-month period before the target date, and with minimum amount outstanding of Rs. 500 crores will be considered.
- The index constituents are valued on a daily basis using CRISIL Valuations.

Weighing Approach:

- Weights to the issuers will be divided equally, at the inception of the index.
- The weights may drift due to price movement and due to cash flows accruing on account of coupon cash flows and will be reset during rebalancing.

Rebalancing and Review:

- Top 15 liquid issuers will be reviewed and replaced during the quarterly rebalancing.
- The most liquid security in each issuer will be reviewed and replaced during the quarter rebalancing.
- Any cash flows accruing to the index on account of coupon cash flows, part redemption of the security or securities, will be reinvested on the same day in the index in the proportion of existing weights.
- As the index includes securities that shall mature during the six-month period ending on the final maturity date of the index, any proceeds from the redemption of securities prior to the final maturity date of the index shall be reinvested according to following waterfall approach
 - The proceeds from security redemption will be reinvested in the longest maturity outstanding security issued by the same issuer and maturing on or just before the index maturity date.
 - In case a replacement in the form of outstanding security of the same issuer cannot be found for reinvestment then the proceeds from such redemption shall be reinvested in the remaining portfolio on the same date in the proportion of the existing weights.
 - In case due to any reason, it is not possible to reinvest in any issuer or security, then the proceeds from such redemption shall be reinvested in a T-Bill maturing on or just before the index maturity date.
 - If the last outstanding security (including T-Bill) in the index matures before the final index maturity date, all redemption proceeds shall be assumed to be re-invested in The Clearing Corporation of India Ltd.'s (CCIL) TREPS overnight rate for any subsequent days till the maturity of the index.
- The effective date of the above rebalancing shall be first working day of the month or the quarter.
- Any index having maturity date on a weekend (Saturday and Sunday) or on a holiday, or on an unplanned market off, will mature on the next working day.

CRISIL-IBX 90-10 SDL Plus Gilt Index - November 2026

CRISIL IBX 90-10 SDL Plus Gilt Index - November 2026 seeks to track the performance of large SDL and GILT securities maturing between 01 June 2026 to 30 November 2026. The index shall mature on 30 November 2026.

Asset Allocation

- **SDL:** 90%
- **GILT:** 10%

The weights between asset classes may drift due to price movement and will be reset quarterly.

Features

- Total Return Index seeking to capture price and coupon returns of the underlying portfolio.
- It's a target date index which follows a roll-down approach.
- Government securities with a minimum outstanding of Rs. 25,000 crores, having the security with highest liquidity.
- State issuers with a minimum outstanding of Rs. 7,500 crores in the eligible period, having the security closest to target date.
- Index portfolio marked-to-market on a daily basis using CRISIL valuations
- Inception Date of Index: 4th November 2022.

Key Characteristics

- **Replicability:** The index constituents are valued on a daily basis. This lends the index a realistic approach by having the valuations close to the market levels

Methodology

Gilt

Security Selection:

- 2 securities with nearest maturity to the target date of the index in the eligible period will be selected.
- The selected security shall have a minimum average daily trading volume of Rs. 25 crores in the previous quarter.
- Minimum Amount Outstanding should be Rs. 25,000 crores.
- Surrogate bonds (namely Food Corporation of India bonds, Oil bonds, Fertilizer bonds and UTI Special Bonds), STRIPS and Floating rate bonds shall be kept out of the purview of the selection process.
- The index constituents are valued on a daily basis using CRISIL Valuations

Weighing Approach:

- Weights to individual securities will be calculated in the ratio of amount outstanding (30% weightage) and liquidity score (70% weightage).
- Liquidity score will be calculated based on the volume traded (70%), number of trades (15%) and days traded (15%) in the previous quarter.

Rebalancing and Review:

- The index constituents will be reviewed on a quarterly basis and the relative weights of the Government securities will change due to price movement and will be reset during the quarterly rebalancing.
- Eligible securities with minimum outstanding of Rs. 25000 crores as evaluated during each rebalancing date will be added on quarterly basis and weights will be redistributed based on ratio of amount outstanding (30% weightage) and liquidity score (70% weightage).
- The relative weights of the Government securities will change due to price movement and will be reset during the quarterly rebalancing.
- Any cash flows accruing to the index on account of coupon cash flows, part redemption of the security or securities, will be reinvested on the same day in the index in the proportion of existing weights,
- As the index includes securities that shall mature during the 6-month period ending on the final maturity date of the index, any proceeds from the redemption of securities prior to the final maturity date of the index shall be reinvested according to following waterfall approach –
 - The proceeds from security redemption will be reinvested in the longest maturity outstanding and maturing on or just before the index maturity date.
 - In case a replacement in the form of another outstanding security cannot be found for reinvestment then the proceeds from such redemption shall be reinvested in the remaining portfolio on the same date in the proportion of the existing weights. This will be subject to compliance to the SEBI portfolio concentration norms.
 - In case due to any reason, it is not possible to meet any norms as prescribed by SEBI vide circular no. SEBI/HO/IMD/DOF2/P/CIR/2022/69 dated May 23, 2022, then the proceeds from such redemption shall be reinvested in a T-Bill maturing on or just before the index maturity date.
 - If the last outstanding security (including T-Bill) in the index matures before the final index maturity date, all redemption proceeds shall be assumed to be re-invested in The Clearing Corporation of India Ltd.'s (CCIL) TREPS overnight rate for any subsequent days till the maturity of the index.
- The effective date of the above rebalancing shall be first working day of the month of rebalance.
- Any index having maturity date on a weekend (Saturday and Sunday) or on a holiday, or on an unplanned market off, will mature on the next working day.
- The relative weights of the Government securities will change due to price movement and will be reset during the quarterly rebalancing.

SDL**Issuer Selection:**

- States with a minimum amount outstanding of Rs. 7,500 crores in the eligible period as evaluated during the inception date of index shall be shortlisted.
- Those states that have GSDP ratio (Total Outstanding Liability /Gross State Domestic Product ratio) of less than 45 as evaluated during the inception date of index shall be further shortlisted.
- Top 8 issuers out of the shortlisted issuers as evaluated during the inception date of index shall be selected based on composite liquidity score.
- Composite Liquidity score will be calculated based on the Liquidity score (70%) and Amount Outstanding

score (30%) in the previous quarter.

- Liquidity score will be calculated based on the volume traded (70%), number of trades (15%) and days traded (15%) in the previous quarter.

Security Selection:

- Securities of selected issuers which are closest to target date, in the eligible period as evaluated during the inception date of index shall be selected
- The index constituents are valued on a daily basis using CRISIL Valuations.
- Uday Bonds will be excluded.

Weighing Approach:

- Weights to the issuers will be divided equally, at the inception of the index.
- The weights may drift due to price movement and due to cash flows accruing on account of coupon cash flows and will be reset during rebalancing.

Rebalancing and Review:

- The index constituents will be reviewed on a quarterly basis and the relative weights of the securities will change due to price movement and will be reset during the quarterly rebalancing.
- Eligible securities as evaluated during each rebalancing date will be added on a quarterly basis and weights will be redistributed equally.
- Selection of states will be reviewed on an annual basis based on the latest available financial data for states.
- Any cash flows accruing to the index on account of coupon cash flows, part redemption of the security or securities, will be reinvested on the same day in the index in the proportion of existing weights
- As the index includes securities that shall mature during the 6-month period ending on the final maturity date of the index, any proceeds from the redemption of securities prior to the final maturity date of the index shall be reinvested according to following waterfall approach –
 - The proceeds from security redemption will be reinvested in the longest maturity outstanding security issued by the same issuer (state in case of SDL) and maturing on or just before the index maturity date.
 - In case a replacement in the form of outstanding security of the same issuer cannot be found for reinvestment then the proceeds from such redemption shall be reinvested in the remaining portfolio on the same date in the proportion of the existing weights.
 - In case due to any reason, it is not possible to meet any norms as prescribed by SEBI vide circular no. SEBI/HO/IMD/DOF2/P/CIR/2022/69 dated May 23, 2022, then the proceeds from such redemption shall be reinvested in a T-Bill maturing on or just before the index maturity date.
 - if the last outstanding security (including T-Bill) in the index matures before the final index maturity date, all redemption proceeds shall be assumed to be re-invested in The Clearing Corporation of India Ltd.'s (CCIL) TREPS overnight rate for any subsequent days till the maturity of the index.
- The effective date of the above rebalancing shall be first working day of the month of rebalance.
- Any index having maturity date on a weekend (Saturday and Sunday) or on a holiday, or on an unplanned market off, will mature on the next working day.

CRISIL-IBX 90-10 SDL Plus Gilt Index - September 2027

CRISIL IBX 90-10 SDL Plus Gilt Index - September 2027 seeks to track the performance of large SDL and GILT securities maturing between 01 April 2027 to 30 September 2027. The index shall mature on 30 September 2027.

Asset Allocation

- **SDL:** 90%
- **GILT:** 10%

The weights between asset classes may drift due to price movement and will be reset quarterly.

Features

- Total Return Index seeking to capture price and coupon returns of the underlying portfolio.
- It's a target date index which follows a roll-down approach.
- Government securities with a minimum outstanding of Rs. 25,000 crores, having the security with highest liquidity.
- State issuers with a minimum outstanding of Rs. 7,500 crores in the eligible period, having the security closest to target date.
- Index portfolio marked-to-market on a daily basis using CRISIL valuations
- Inception Date of Index: 4th November 2022.

Key Characteristics

- **Replicability:** The index constituents are valued on a daily basis. This lends the index a realistic approach by having the valuations close to the market levels

Methodology

Gilt

Security Selection:

- 2 securities with nearest maturity to the target date of the index in the eligible period will be selected.
- The selected security shall have a minimum average daily trading volume of Rs. 25 crores in the previous quarter.
- Minimum Amount Outstanding should be Rs. 25,000 crores.
- Surrogate bonds (namely Food Corporation of India bonds, Oil bonds, Fertilizer bonds and UTI Special Bonds), STRIPS and Floating rate bonds shall be kept out of the purview of the selection process.
- The index constituents are valued on a daily basis using CRISIL Valuations

Weighing Approach:

- Weights to individual securities will be calculated in the ratio of amount outstanding (30% weightage) and liquidity score (70% weightage).
- Liquidity score will be calculated based on the volume traded (70%), number of trades (15%) and days

traded (15%) in the previous quarter.

Rebalancing and Review:

- The index constituents will be reviewed on a quarterly basis and the relative weights of the Government securities will change due to price movement and will be reset during the quarterly rebalancing.
- Eligible securities with minimum outstanding of Rs. 25000 crores as evaluated during each rebalancing date will be added on quarterly basis and weights will be redistributed based on ratio of amount outstanding (30% weightage) and liquidity score (70% weightage).
- The relative weights of the Government securities will change due to price movement and will be reset during the quarterly rebalancing.
- Any cash flows accruing to the index on account of coupon cash flows, part redemption of the security or securities, will be reinvested on the same day in the index in the proportion of existing weights,
- As the index includes securities that shall mature during the 6-month period ending on the final maturity date of the index, any proceeds from the redemption of securities prior to the final maturity date of the index shall be reinvested according to following waterfall approach –
 - The proceeds from security redemption will be reinvested in the longest maturity outstanding and maturing on or just before the index maturity date.
 - In case a replacement in the form of another outstanding security cannot be found for reinvestment then the proceeds from such redemption shall be reinvested in the remaining portfolio on the same date in the proportion of the existing weights. This will be subject to compliance to the SEBI portfolio concentration norms.
 - In case due to any reason, it is not possible to meet any norms as prescribed by SEBI vide circular no. SEBI/HO/IMD/DOF2/P/CIR/2022/69 dated May 23, 2022, then the proceeds from such redemption shall be reinvested in a T-Bill maturing on or just before the index maturity date.
 - If the last outstanding security (including T-Bill) in the index matures before the final index maturity date, all redemption proceeds shall be assumed to be re-invested in The Clearing Corporation of India Ltd.'s (CCIL) TREPS overnight rate for any subsequent days till the maturity of the index.
- The effective date of the above rebalancing shall be first working day of the month of rebalance.
- Any index having maturity date on a weekend (Saturday and Sunday) or on a holiday, or on an unplanned market off, will mature on the next working day.
- The relative weights of the Government securities will change due to price movement and will be reset during the quarterly rebalancing.

SDL

Issuer Selection:

- States with a minimum amount outstanding of Rs. 7,500 crores in the eligible period as evaluated during the inception date of index shall be shortlisted.
- Those states that have GSDP ratio (Total Outstanding Liability /Gross State Domestic Product ratio) of less than 45 as evaluated during the inception date of index shall be further shortlisted.
- Top 8 issuers out of the shortlisted issuers as evaluated during the inception date of index shall be selected based on composite liquidity score.
- Composite Liquidity score will be calculated based on the Liquidity score (70%) and Amount Outstanding score (30%) in the previous quarter.

- Liquidity score will be calculated based on the volume traded (70%), number of trades (15%) and days traded (15%) in the previous quarter.

Security Selection:

- Securities of selected issuers which are closest to target date, in the eligible period as evaluated during the inception date of index shall be selected
- The index constituents are valued on a daily basis using CRISIL Valuations.
- Uday bonds will be excluded.

Weighing Approach:

- Weights to the issuers will be divided equally, at the inception of the index.
- The weights may drift due to price movement and due to cash flows accruing on account of coupon cash flows and will be reset during rebalancing.

Rebalancing and Review:

- The index constituents will be reviewed on a quarterly basis and the relative weights of the securities will change due to price movement and will be reset during the quarterly rebalancing.
- Eligible securities as evaluated during each rebalancing date will be added on a quarterly basis and weights will be redistributed equally.
- Selection of states will be reviewed on an annual basis based on the latest available financial data for states.
- Any cash flows accruing to the index on account of coupon cash flows, part redemption of the security or securities, will be reinvested on the same day in the index in the proportion of existing weights
- As the index includes securities that shall mature during the 6-month period ending on the final maturity date of the index, any proceeds from the redemption of securities prior to the final maturity date of the index shall be reinvested according to following waterfall approach –
 - The proceeds from security redemption will be reinvested in the longest maturity outstanding security issued by the same issuer (state in case of SDL) and maturing on or just before the index maturity date.
 - In case a replacement in the form of outstanding security of the same issuer cannot be found for reinvestment then the proceeds from such redemption shall be reinvested in the remaining portfolio on the same date in the proportion of the existing weights.
 - In case due to any reason, it is not possible to meet any norms as prescribed by SEBI vide circular no. SEBI/HO/IMD/DOF2/P/CIR/2022/69 dated May 23, 2022, then the proceeds from such redemption shall be reinvested in a T-Bill maturing on or just before the index maturity date.
 - if the last outstanding security (including T-Bill) in the index matures before the final index maturity date, all redemption proceeds shall be assumed to be re-invested in The Clearing Corporation of India Ltd.'s (CCIL) TREPS overnight rate for any subsequent days till the maturity of the index.
- The effective date of the above rebalancing shall be first working day of the month of rebalance.
- Any index having maturity date on a weekend (Saturday and Sunday) or on a holiday, or on an unplanned market off, will mature on the next working day.

CRISIL-IBX 50:50 Gilt Plus SDL Index – September 2028

CRISIL-IBX 50:50 Gilt Plus SDL Index – September 2028 seeks to track the performance of Gilt and SDL securities maturing between 01 October 2027 to 28 September 2028. The index shall mature on 28 September 2028.

Asset Allocation

- **Gilt:** 50%
- **SDL:** 50%

The weights between asset classes may drift due to price movement and will be reset quarterly.

Features

- Total Return Index seeking to capture price and coupon returns of the underlying portfolio.
- It's a target date index which follows a roll-down approach.
- Government securities with a minimum outstanding of Rs. 25,000 crores, having the security with highest liquidity.
- State issuers with a minimum outstanding of Rs. 1,000 crores in the eligible period, having the security with highest liquidity.
- Index portfolio marked-to-market on a daily basis using CRISIL valuations
- Inception Date of Index: 4th November 2022.

Key Characteristics

- **Replicability:** The index constituents are valued on a daily basis. This lends the index a realistic approach by having the valuations close to the market levels

Methodology

Gilt

Security Selection:

- 2 most liquid securities in the eligible period will be selected.
- Minimum Amount Outstanding should be Rs. 25,000 crores.
- Surrogate bonds (namely Food Corporation of India bonds, Oil bonds, Fertilizer bonds and UTI Special Bonds), STRIPS and Floating rate bonds shall be kept out of the purview of the selection process since these are quasi government bonds
- The index constituents are valued on a daily basis using CRISIL Valuations

Weighing Approach:

- Weights to individual securities will be calculated in the ratio of amount outstanding (30% weightage) and liquidity score (70% weightage).
- Liquidity score will be calculated based on the volume traded (70%), number of trades (15%) and days traded (15%) in the previous quarter.

Rebalancing and Review:

- The most 2 liquid securities shall be reviewed every quarter.
- Eligible securities will be added on a quarterly basis and weights will be redistributed based on ratio of amount outstanding (30% weightage) and liquidity score (70% weightage).
- The existing securities will not be removed unless the security's amount outstanding falls below 25000 cr.
- Any cash flows accruing to the index on account of coupon cash flows, part redemption of the security or securities, will be reinvested on the same day in the index in the proportion of existing weights.
- As the index includes securities that shall mature during the twelve-month period ending on the final maturity date of the index, any proceeds from the redemption of securities prior to the final maturity date of the index shall be reinvested according to following waterfall approach –
 - The proceeds from security redemption will be reinvested in the longest maturity outstanding security and maturing on or just before the index maturity date.
 - In case a replacement in the form of outstanding security cannot be found for reinvestment then the proceeds from such redemption shall be reinvested in the remaining portfolio on the same date in the proportion of the existing weights.
 - In case if there are no eligible securities, then the proceeds from such redemption shall be reinvested in a T-Bill maturing on or just before the index maturity date.
 - If the last outstanding security (including T-Bill) in the index matures before the final index maturity date, all redemption proceeds shall be assumed to be re-invested in The Clearing Corporation of India Ltd.'s (CCIL) TREPS overnight rate for any subsequent days till the maturity of the index
- The effective date of the above rebalancing shall be first working day of the month or the quarter.
- Any index having maturity date on a weekend (Saturday and Sunday) or on a holiday, or on an unplanned market off, will mature on the next working day.
- The relative weights of the Government securities will change due to price movement and will be reset during the quarterly rebalancing.

SDL

Issuer Selection:

- All states with issuances having maturities in the eligible period will be shortlisted.
- Top 15 issuers with a minimum total amount outstanding of Rs. 1,000 crores in the eligible period will be selected based on liquidity. If less than 15 issuers are available, all issuers will be selected.
- Liquidity score will be calculated based on the volume traded (70%), number of trades (15%) and days traded (15%) in the previous quarter.

Security Selection:

- For each issuer selected, security having highest liquidity shall be selected, from securities maturing in twelve-month period before the target date, and with minimum amount outstanding of Rs. 500 crores will be considered.
- The index constituents are valued on a daily basis using CRISIL Valuations.
- Uday Bonds will be excluded.

Weighing Approach:

- Weights to individual securities will be calculated in the ratio of amount outstanding (30% weightage) and liquidity score (70% weightage) as evaluated during the inception date of the index
- Liquidity score will be calculated based on the volume traded (70%), number of trades (15%) and days traded (15%) in the previous quarter
- The weights may drift due to price movement and due to cash flows accruing on account of coupon cash flows and will be reset during rebalancing.

Rebalancing and Review:

- The most liquid security in each issuer will be reviewed during the quarter rebalancing.
- Any cash flows accruing to the index on account of coupon cash flows, part redemption of the security or securities, will be reinvested on the same day in the index in the proportion of existing weights.
- As the index includes securities that shall mature during the twelve months period ending on the final maturity date of the index, any proceeds from the redemption of securities prior to the final maturity date of the index shall be reinvested according to following waterfall approach –
 - The proceeds from security redemption will be reinvested in the longest maturity outstanding security issued by the same issuer (state in case of SDL and Bond/money market instrument in case of corporate bond) and maturing on or just before the index maturity date.
 - In case a replacement in the form of outstanding security of the same issuer cannot be found for reinvestment then the proceeds from such redemption shall be reinvested in the remaining portfolio on the same date in the proportion of the existing weights.
 - In case it is not possible to reinvest as per the point number a and b stated above, then the proceeds from such redemption shall be reinvested in a T-Bill maturing on or just before the index maturity date.
 - If the last outstanding security (including T-Bill) in the index matures before the final index maturity date, all redemption proceeds shall be assumed to be re-invested in The Clearing Corporation of India Ltd.'s (CCIL) TREPS overnight rate for any subsequent days till the maturity of the index.
- The effective date of the above rebalancing shall be first working day of the month or the quarter.
- Any index having maturity date on a weekend (Saturday and Sunday) or on a holiday, or on an unplanned market off, will mature on the next working day.

CRISIL-IBX 90-10 SDL Plus Gilt Index - April 2032

CRISIL IBX 90-10 SDL Plus Gilt Index - April 2032 seeks to track the performance of large SDL and GILT securities maturing between 07 April 2031 to 05 April 2032. The index shall mature on 05 April 2032.

Asset Allocation

- **SDL:** 90%
- **GILT:** 10%

The weights between asset classes may drift due to price movement and will be reset quarterly.

Features

- Total Return Index seeking to capture price and coupon returns of the underlying portfolio.
- It's a target date index which follows a roll-down approach.
- Government securities with a minimum outstanding of Rs. 25,000 crores, having the security with highest liquidity.
- State issuers with a minimum outstanding of Rs. 7,500 crores in the eligible period, having the security closest to target date.
- Index portfolio marked-to-market on a daily basis using CRISIL valuations
- Inception Date of Index: 9th November 2022.

Key Characteristics

- **Replicability:** The index constituents are valued on a daily basis. This lends the index a realistic approach by having the valuations close to the market levels

Methodology

Gilt

Security Selection:

- 2 securities with nearest maturity to the target date of the index in the eligible period will be selected.
- The selected security shall have a minimum average daily trading volume of Rs. 25 crores in the previous quarter.
- Minimum Amount Outstanding should be Rs. 25,000 crores.
- Surrogate bonds (namely Food Corporation of India bonds, Oil bonds, Fertilizer bonds and UTI Special Bonds), STRIPS and Floating rate bonds shall be kept out of the purview of the selection process.
- The index constituents are valued on a daily basis using CRISIL Valuations.

Weighing Approach:

- Weights to individual securities will be calculated in the ratio of amount outstanding (30% weightage) and liquidity score (70% weightage).

- Liquidity score will be calculated based on the volume traded (70%), number of trades (15%) and days traded (15%) in the previous quarter.

Rebalancing and Review:

- The index constituents will be reviewed on a quarterly basis and the relative weights of the Government securities will change due to price movement and will be reset during the quarterly rebalancing.
- Eligible securities with minimum outstanding of Rs. 25000 crores as evaluated during each rebalancing date will be added on quarterly basis and weights will be redistributed based on ratio of amount outstanding (30% weightage) and liquidity score (70% weightage).
- The relative weights of the Government securities will change due to price movement and will be reset during the quarterly rebalancing.
- Any cash flows accruing to the index on account of coupon cash flows, part redemption of the security or securities, will be reinvested on the same day in the index in the proportion of existing weights,
- As the index includes securities that shall mature during the 12-month period ending on the final maturity date of the index, any proceeds from the redemption of securities prior to the final maturity date of the index shall be reinvested according to following waterfall approach –
 - The proceeds from security redemption will be reinvested in the longest maturity outstanding and maturing on or just before the index maturity date.
 - In case a replacement in the form of another outstanding security cannot be found for reinvestment then the proceeds from such redemption shall be reinvested in the remaining portfolio on the same date in the proportion of the existing weights. This will be subject to compliance to the SEBI portfolio concentration norms.
 - In case due to any reason, it is not possible to meet any norms as prescribed by SEBI vide circular no. SEBI/HO/IMD/DOF2/P/CIR/2022/69 dated May 23, 2022, then the proceeds from such redemption shall be reinvested in a T-Bill maturing on or just before the index maturity date.
 - If the last outstanding security (including T-Bill) in the index matures before the final index maturity date, all redemption proceeds shall be assumed to be re-invested in The Clearing Corporation of India Ltd.'s (CCIL) TREPS overnight rate for any subsequent days till the maturity of the index.
- The effective date of the above rebalancing shall be first working day of the month of rebalance.
- Any index having maturity date on a weekend (Saturday and Sunday) or on a holiday, or on an unplanned market off, will mature on the next working day.
- The relative weights of the Government securities will change due to price movement and will be reset during the quarterly rebalancing.

SDL

Issuer Selection:

- States with a minimum amount outstanding of Rs. 7,500 crores in the eligible period as evaluated during the inception date of index shall be shortlisted.
- Those states that have GSDP ratio (Total Outstanding Liability /Gross State Domestic Product ratio) of less than 45 as evaluated during the inception date of index shall be further shortlisted.
- Top 8 issuers out of the shortlisted issuers as evaluated during the inception date of index shall be selected based on composite liquidity score.
- Composite Liquidity score will be calculated based on the Liquidity score (70%) and Amount Outstanding

score (30%) in the previous quarter.

- Liquidity score will be calculated based on the volume traded (70%), number of trades (15%) and days traded (15%) in the previous quarter.

Security Selection:

- Securities of selected issuers which are closest to target date, in the eligible period as evaluated during the inception date of index shall be selected
- The index constituents are valued on a daily basis using CRISIL Valuations.
- Uday Bonds will be excluded.

Weighing Approach:

- Weights to the issuers will be divided equally, at the inception of the index.
- The weights may drift due to price movement and due to cash flows accruing on account of coupon cash flows and will be reset during rebalancing.

Rebalancing and Review:

- The index constituents will be reviewed on a quarterly basis and the relative weights of the securities will change due to price movement and will be reset during the quarterly rebalancing.
- Eligible securities as evaluated during each rebalancing date will be added on a quarterly basis and weights will be redistributed equally.
- Selection of states will be reviewed on an annual basis based on the latest available financial data for states.
- Any cash flows accruing to the index on account of coupon cash flows, part redemption of the security or securities, will be reinvested on the same day in the index in the proportion of existing weights
- As the index includes securities that shall mature during the 12-month period ending on the final maturity date of the index, any proceeds from the redemption of securities prior to the final maturity date of the index shall be reinvested according to following waterfall approach –
 - The proceeds from security redemption will be reinvested in the longest maturity outstanding security issued by the same issuer (state in case of SDL) and maturing on or just before the index maturity date.
 - In case a replacement in the form of outstanding security of the same issuer cannot be found for reinvestment then the proceeds from such redemption shall be reinvested in the remaining portfolio on the same date in the proportion of the existing weights.
 - In case due to any reason, it is not possible to meet any norms as prescribed by SEBI vide circular no. SEBI/HO/IMD/DOF2/P/CIR/2022/69 dated May 23, 2022, then the proceeds from such redemption shall be reinvested in a T-Bill maturing on or just before the index maturity date.
 - if the last outstanding security (including T-Bill) in the index matures before the final index maturity date, all redemption proceeds shall be assumed to be re-invested in The Clearing Corporation of India Ltd.'s (CCIL) TREPS overnight rate for any subsequent days till the maturity of the index.
- The effective date of the above rebalancing shall be first working day of the month of rebalance.
- Any index having maturity date on a weekend (Saturday and Sunday) or on a holiday, or on an unplanned market off, will mature on the next working day.

CRISIL-IBX SDL Index – April 2033

CRISIL-IBX SDL Index – April 2033 seeks to track the performance of SDL securities maturing between 16 April 2032 to 15 April 2033. The index shall mature on 15 April 2033.

Asset Allocation

- **SDL:** 100%

Features

- Total Return Index seeking to capture price and coupon returns of the underlying portfolio.
- It's a target date index which follows a roll-down approach.
- State issuers with a minimum outstanding of Rs. 5,500 crores in the eligible period, having the security with highest liquidity.
- Index portfolio marked-to-market on a daily basis using CRISIL valuations
- Inception Date of Index: 25th November 2022.

Key Characteristics

- **Replicability:** The index constituents are valued on a daily basis. This lends the index a realistic approach by having the valuations close to the market levels

Methodology

SDL

Issuer Selection:

- All states with issuances maturing in the eligible period as evaluated during the inception date of the index will be shortlisted
- 12 most liquid issuers as evaluated during the inception date of the index with a minimum total amount outstanding of Rs. 5,000 crores in the eligible period will be selected on the basis of liquidity. If less than 10 issuers are available, all issuers will be selected.
- Liquidity score will be calculated based on the volume traded (70%), number of trades (15%) and days traded (15%) in the previous quarter.

Security Selection:

- For each issuer, most liquid security based on liquidity score in the previous quarter will be selected as evaluated during the inception date of the index. Securities maturing in 12 month period before the target date, with minimum amount outstanding of Rs. 1000 crores will be considered. If there are no trades in the previous quarter for a particular issuer, then security nearest to the maturity from the eligible universe will be selected.
- Liquidity score will be calculated based on the volume traded (70%), number of trades (15%) and days traded (15%) in the previous quarter.
- Uday Bonds will be excluded.

Weighing Approach:

- Weights to the issuers will be divided equally as on the base date of the index
- The weights may drift due to price movement and will be reset on a quarterly basis

Rebalancing and Review:

- The securities will be rebalanced on a semi-annually basis.
- Any cash flows accruing to the index on account of coupon cash flows, part redemption of the security or securities, will be reinvested on the same day in the index in the proportion of existing weights
- As the index includes securities that shall mature during the 12-month period ending on the final maturity date of the index, any proceeds from the redemption of securities prior to the final maturity date of the index shall be reinvested according to following waterfall approach –
 - The proceeds from security redemption will be reinvested in the longest maturity outstanding security issued by the same issuer (state in case of SDL) and maturing on or just before the index maturity date.
 - In case a replacement in the form of outstanding security of the same issuer cannot be found for reinvestment then the proceeds from such redemption shall be reinvested in the remaining portfolio on the same date in the proportion of the existing weights.
 - In case due to any reason, it is not possible to meet any norms as prescribed by SEBI vide circular no. SEBI/HO/IMD/DOF2/P/CIR/2022/69 dated May 23, 2022, then the proceeds from such redemption shall be reinvested in a T-Bill maturing on or just before the index maturity date.
 - if the last outstanding security (including T-Bill) in the index matures before the final index maturity date, all redemption proceeds shall be assumed to be re-invested in The Clearing Corporation of India Ltd.'s (CCIL) TREPS overnight rate for any subsequent days till the maturity of the index.
- The effective date of the above rebalancing shall be first working day of the month of rebalance.
- Any index having maturity date on a weekend (Saturday and Sunday) or on a holiday, or on an unplanned market off, will mature on the next working day.

CRISIL-IBX 60:40 SDL Plus AAA PSU Index – April 2026

CRISIL-IBX 60:40 SDL + AAA PSU Index – April 2026 seeks to track the performance AAA PSU and SDL issuers maturing between 01 November 2025 to 30 April 2026. The index shall mature on 30 April 2026.

Asset Allocation

- **SDL:** 60%
- **AAA PSU:** 40%

The weights between asset classes may drift due to price movement and will be reset quarterly.

Features

- Total Return Index seeking to capture price and coupon returns of the underlying portfolio.
- It's a target date index which follows a roll-down approach.
- Corporate issuers with rating of AAA, issued by PSUs, with a minimum outstanding of Rs. 700 crores in the eligible period, having the security with highest liquidity.
- State issuers with a minimum outstanding of Rs. 1,500 crores in the eligible period, having the security with highest liquidity.
- Index portfolio marked-to-market on a daily basis using CRISIL valuations
- Inception Date of Index: 25th November 2022.

Key Characteristics

- **Replicability:** The index constituents are valued on a daily basis. This lends the index a realistic approach by having the valuations close to the market levels

Methodology

SDL

Issuer Selection:

- All states with issuances maturing in the eligible period will be shortlisted
- 10 most liquid issuers with a minimum total amount outstanding of Rs. 1,500 crores in the eligible period will be selected on the basis of liquidity. If less than 10 issuers are available, all issuers will be selected. Minimum 5 issuers are to be selected.
- Liquidity score will be calculated based on the volume traded (70%), number of trades (15%) and days traded (15%) in the previous quarter

Security Selection:

- For each issuer selected, most liquid security based on liquidity score in the previous quarter will be selected. Securities maturing in eligible period before the target date, with minimum amount outstanding of Rs. 1500 crores will be considered. If there are no trades in the previous quarter for a particular issuer, then security nearest to the maturity from the eligible universe will be selected.
- UDAY bonds will be excluded
- The index constituents are valued on a daily basis using CRISIL Valuations.

Weighing Approach:

- Weights to the issuers will be divided equally as on the base date of the index.
- Weights will be reset every six months.

Rebalancing and Review:

- The index constituents will be reviewed on semi-annual basis.
- Existing issuers will be carried forward to the next rebalancing period.
- If the total number of SDL issuers fall below 5, when issuers are excluded due to any reason, new issuers will be added as per the criteria stated above.
- When any issuer is excluded, the weight of the particular issuer will be redistributed proportionally in rest of the issuers of same asset class.
- Securities of selected issuers will be reviewed and replaced by the most liquid securities during semi-annual rebalancing.
- Any cash flows accruing to the index on account of coupon cash flows, part redemption of the security or securities, will be reinvested on the same day in the index in the proportion of existing weights.
- As the index includes securities that shall mature during the 6 month period ending on the final maturity date of the index, any proceeds from the redemption of securities prior to the final maturity date of the index shall be reinvested according to following waterfall approach –
 - The proceeds from security redemption will be reinvested in the longest maturity outstanding security issued by the same issuer (state in case of SDL and Bond/money market instrument in case of corporate bond) and maturing on or just before the index maturity date.
 - In case a replacement in the form of outstanding security of the same issuer cannot be found for reinvestment then the proceeds from such redemption shall be reinvested in the remaining portfolio on the same date in the proportion of the existing weights
 - In case due to any reason, it is not possible to meet any norms as prescribed by SEBI vide circular no. SEBI/HO/IMD/DOF2/P/CIR/2022/69 dated May 23, 2022, then the proceeds from such redemption shall be reinvested in a T-Bill maturing on or just before the index maturity date
 - If the last outstanding security (including T-Bill) in the index matures before the final index maturity date, all redemption proceeds shall be assumed to be re-invested in The Clearing Corporation of India Ltd.'s (CCIL) TREPS overnight rate for any subsequent days till the maturity of the index.
- The effective date of the above rebalancing shall be first working day of the month.
- Any index having maturity date on a weekend (Saturday or Sunday), on a holiday, or on an unplanned market off, will mature on the next working day.

AAA PSU
Eligibility norms:

Issuing entity should be domiciled in India and should satisfy either of the following:

- Central Public Sector Enterprises (CPSEs) as listed on DPE & DIPAM website.
- Maharatna, Navratna and Miniratna as listed on DPE website, if not included in CPSEs list as mentioned in point 1.
- Public Financial Institutions (PFIs) owned and managed by GOI and not included in points 1 and 2 above.
- Statutory body set-up by Act of Parliament.

Issuer Selection:

- All eligible issuers with a conservative rating of AAA maturing in the eligible period will be shortlisted

- 10 most liquid issuers with a minimum total amount outstanding of Rs. 700 crores in the eligible period will be selected on the basis of liquidity. If less than 10 issuers are available, all issuers will be selected. Minimum 7 issuers are to be selected.
- In case 7 issuers are not selected on the basis of liquidity, issuers with highest amount outstanding in the eligible period shall be selected till there are 7 issuers in the index (issuer must have more than Rs. 700 crores in eligible period)
- Only listed issuers shall be included in the index. An issuer will be considered to be listed if at least one security of such issuer is listed.
- Liquidity score will be calculated based on the volume traded (70%), number of trades (15%) and days traded (15%) in the previous quarter.

Security Selection:

- For each issuer selected from traded liquidity data, most liquid security based on liquidity score in the previous quarter will be selected. Securities maturing in eligible period before the target date, with minimum amount outstanding of Rs. 250 crores will be considered. If there are no trades in the previous quarter for a particular issuer, then security nearest to the maturity from the eligible universe will be selected.
- For issuers selected from outstanding data, the security nearest to target maturity will be selected.
- Perpetual bonds, Floating rate bonds, Tax free bonds, GOI service bonds, GOI guaranteed bonds, CE Rated, Partly Paid, Partial Redemption and bonds with embedded call/put options, subordinated debt securities, strips securities are excluded from the universe of bonds.
- Additional Tier-II are excluded from the universe of bonds.

Weighing Approach:

- Weights to the issuers will be divided in the proportion of their amount outstanding in the eligible period. If the issuer cap is met, the excess weight shall be re-distributed amongst remaining issuers.
- Each issuer will be subject to a cap of 12.5%
- Weights will be reset every six months.

Rebalancing and Review:

- The issuers and securities both will be rebalanced semi-annually.
- Existing issuers will be carried forward to the next rebalancing period.
- During the semi-annual rebalancing, if a new issuer meets the eligibility criteria, it will be added to the index, subject to limit of 10 issuers. The weights of the issuers will be reset as per the weighing approach mentioned above.
- The selected securities will be held till maturity (or till they are replaced by security of the same issuer with maturity date nearer to the maturity date of the fund during semi-annual rebalancing). If the issuer cap of 12.5% is being breached, additional / excess amount may be invested in the rest of the securities of the same asset class which are part of the index
- If government gives 'in principal approval' to disinvest its stake in any government owned entity, such entity will not be a part of the index at the time of inception of the index.
- If any existing constituent of the index gets in principal approval for disinvestment, such issuer, will be excluded from the index, only after the process of disinvestment is completed, during the quarter rebalancing of the index.
- In case if any issuer gets downgraded from AAA, such issuers shall be excluded from the index within the

next 5 working days.

- When the issuer is excluded, the weight of the particular issuer will be redistributed proportionally in rest of the issuers of same asset class.
- If the total number of AAA issuers fall below 7, when issuers are excluded on the basis of above reasons (Downgrade/disinvestment), new issuers will be added as per the criteria stated above.
- Any cash flows accruing to the index on account of coupon cash flows, part redemption of the security or securities, will be reinvested on the same day in the index in the proportion of existing weights,
- As the index includes securities that shall mature during the 12-month period ending on the final maturity date of the index, any proceeds from the redemption of securities prior to the final maturity date of the index shall be reinvested according to following waterfall approach –
 - The proceeds from security redemption will be reinvested in the longest maturity outstanding and maturing on or just before the index maturity date.
 - In case a replacement in the form of another outstanding security cannot be found for reinvestment then the proceeds from such redemption shall be reinvested in the remaining portfolio on the same date in the proportion of the existing weights. This will be subject to compliance to the SEBI portfolio concentration norms.
 - In case due to any reason, it is not possible to meet any norms as prescribed by SEBI vide circular no. SEBI/HO/IMD/DOF2/P/CIR/2022/69 dated May 23, 2022, then the proceeds from such redemption shall be reinvested in a T-Bill maturing on or just before the index maturity date.
 - If the last outstanding security (including T-Bill) in the index matures before the final index maturity date, all redemption proceeds shall be assumed to be re-invested in The Clearing Corporation of India Ltd.'s (CCIL) TREPS overnight rate for any subsequent days till the maturity of the index.
- The effective date of the above rebalancing shall be first working day of the month of rebalance.
- Any index having maturity date on a weekend (Saturday and Sunday) or on a holiday, or on an unplanned market off, will mature on the next working day.
- The relative weights of the Government securities will change due to price movement and will be reset during the quarterly rebalancing.

CRISIL-IBX SDL Index – June 2027

CRISIL-IBX SDL Index – June 2027 seeks to track the performance of SDL securities maturing between 16 December 2026 to 15 June 2027. The index shall mature on 15 June 2027.

Asset Allocation

- **SDL:** 100%

Features

- Total Return Index seeking to capture price and coupon returns of the underlying portfolio.
- It's a target date index which follows a roll-down approach.
- State issuers with a minimum outstanding of Rs. 5,000 crores in the eligible period, having the security with highest liquidity.
- Index portfolio marked-to-market on a daily basis using CRISIL valuations
- Inception Date of Index: 22nd December 2022.

Key Characteristics

- **Replicability:** The index constituents are valued on a daily basis. This lends the index a realistic approach by having the valuations close to the market levels

Methodology

SDL

Issuer Selection:

- All states with issuances maturing in the eligible period as evaluated during the inception date of the index will be shortlisted
- 12 most liquid issuers as evaluated during the inception date of the index with a minimum total amount outstanding of Rs. 5,000 crores in the eligible period will be selected on the basis of liquidity. If less than 10 issuers are available, all issuers will be selected.
- Liquidity score will be calculated based on the volume traded (70%), number of trades (15%) and days traded (15%) in the previous quarter.

Security Selection:

- For each issuer, most liquid security based on liquidity score in the previous quarter will be selected as evaluated during the inception date of the index. Securities maturing in 6 month period before the target date, with minimum amount outstanding of Rs. 1000 crores will be considered. If there are no trades in the previous quarter for a particular issuer, then security nearest to the maturity from the eligible universe will be selected.
- Liquidity score will be calculated based on the volume traded (70%), number of trades (15%) and days traded (15%) in the previous quarter.
- Uday Bonds will be excluded.

Weighing Approach:

- Weights to the issuers will be divided equally as on the base date of the index
- The weights may drift due to price movement and will be reset on a quarterly basis

Rebalancing and Review:

- The securities will be rebalanced on a semi-annually basis.
- Any cash flows accruing to the index on account of coupon cash flows, part redemption of the security or securities, will be reinvested on the same day in the index in the proportion of existing weights
- As the index includes securities that shall mature during the 6-month period ending on the final maturity date of the index, any proceeds from the redemption of securities prior to the final maturity date of the index shall be reinvested according to following waterfall approach –
 - The proceeds from security redemption will be reinvested in the longest maturity outstanding security issued by the same issuer (state in case of SDL) and maturing on or just before the index maturity date.
 - In case a replacement in the form of outstanding security of the same issuer cannot be found for reinvestment then the proceeds from such redemption shall be reinvested in the remaining portfolio on the same date in the proportion of the existing weights.
 - In case due to any reason, it is not possible to meet any norms as prescribed by SEBI vide circular no. SEBI/HO/IMD/DOF2/P/CIR/2022/69 dated May 23, 2022, then the proceeds from such redemption shall be reinvested in a T-Bill maturing on or just before the index maturity date.
 - if the last outstanding security (including T-Bill) in the index matures before the final index maturity date, all redemption proceeds shall be assumed to be re-invested in The Clearing Corporation of India Ltd.'s (CCIL) TREPS overnight rate for any subsequent days till the maturity of the index.
- The effective date of the above rebalancing shall be first working day of the month of rebalance.
- Any index having maturity date on a weekend (Saturday and Sunday) or on a holiday, or on an unplanned market off, will mature on the next working day.

CRISIL-IBX 50:50 SDL Plus Gilt Index - June 2028

CRISIL-IBX 50:50 SDL Plus Gilt Index - June 2028 seeks to track the performance of large SDL and GILT securities maturing between 01 January 2028 to 30 June 2028. The index shall mature on 30 June 2028.

Asset Allocation

- **SDL:** 50%
- **GILT:** 50%

The weights between asset classes may drift due to price movement and will be reset quarterly.

Features

- Total Return Index seeking to capture price and coupon returns of the underlying portfolio.
- It's a target date index which follows a roll-down approach.
- Government securities with a minimum outstanding of Rs. 25,000 crores, having the security with highest liquidity.
- State issuers with a minimum outstanding of Rs. 1000 crores in the eligible period, having the security with highest liquidity.
- Index portfolio marked-to-market on a daily basis using CRISIL valuations
- Inception Date of Index: 02nd January, 2023.

Key Characteristics

- **Replicability:** The index constituents are valued on a daily basis. This lends the index a realistic approach by having the valuations close to the market levels

Methodology

Gilt

Security Selection:

- Securities with minimum Amount Outstanding of Rs. 25000 crores will be eligible for selection as evaluated during the inception date.
- Surrogate bonds (namely Food Corporation of India bonds, Oil bonds, Fertiliser bonds and UTI Special Bonds), STRIPS and Floating rate bonds shall be kept out of the purview of the selection process since these are quasi government bonds
- 2 most liquid securities as evaluated during the inception date will be selected based on liquidity in the previous quarter.
- The index constituents shall be valued on a daily basis using CRISIL Valuations.

Weighing Approach:

- Weights to individual securities as evaluated during the inception date and during each index rebalancing will be calculated in the ratio of amount outstanding (30% weightage) and liquidity score (70% weightage).

These weights will drift on an ongoing basis on account of relative price movements.

- Liquidity score will be calculated based on the volume traded (70%), number of trades (15%) and days traded (15%) in the previous quarter.

Rebalancing and Review:

- The most 2 liquid securities shall be reviewed every quarter.
- Eligible securities will replace existing securities on a quarterly basis and weights will be redistributed based on ratio of amount outstanding (30% weightage) and liquidity score (70% weightage).
- Any cash flows accruing to the index on account of coupon cash flows, part redemption of the security or securities, will be reinvested on the same day in the index in the proportion of existing weights.
- As the index includes securities that shall mature during the 6-month period ending on the final maturity date of the index, any proceeds from the redemption of securities prior to the final maturity date of the index shall be reinvested according to following waterfall approach–
 - The proceeds from security redemption will be reinvested in the longest maturity outstanding and maturing on or just before the index maturity date.
 - In case a replacement in the form of another outstanding security cannot be found for reinvestment then the proceeds from such redemption shall be reinvested in the remaining portfolio on the same date in the proportion of the existing weights. This will be subject to compliance to the SEBI portfolio concentration norms.
 - In case due to any reason, it is not possible to meet any norms as prescribed by SEBI vide circular no. SEBI/HO/IMD/DOF2/P/CIR/2022/69 dated May 23, 2022, then the proceeds from such redemption shall be reinvested in a T-Bill maturing on or just before the index maturity date.
 - If the last outstanding security (including T-Bill) in the index matures before the final index maturity date, all redemption proceeds shall be assumed to be re-invested in The Clearing Corporation of India Ltd.'s (CCIL) TREPS overnight rate for any subsequent days till the maturity of the index.
- The relative weights of the Government securities will change due to price movement and will be reset during the semi-annual rebalancing.
- The effective date of the above rebalancing shall be first working day of the month of rebalance.
- Any index having maturity date on a weekend (Saturday and Sunday) or on a holiday, or on an unplanned market off, will mature on the next working day.

SDL

Issuer Selection:

- All states with issuances maturing in the eligible period, as evaluated during the inception date, will be shortlisted.
- Top 15 issuers with a minimum total amount outstanding of Rs. 1,000 crores in the eligible period will be selected on the basis of liquidity as evaluated during the inception date. If less than 15 issuers are available, all such issuers will be selected.
- Liquidity score will be calculated based on the volume traded (70%), number of trades (15%) and days

traded (15%) in the previous quarter.

Security Selection:

- For each issuer selected, security having highest liquidity as evaluated during the inception date of the index shall be selected, from securities maturing in 6-month period before the target date, and with minimum amount outstanding of Rs. 500 crores will be considered.
- The index constituents shall be valued on a daily basis using CRISIL Valuations.
- Uday Bonds will be excluded.

Weighing Approach:

- Weights to individual securities as evaluated during the inception date and during each index rebalancing will be calculated in the ratio of amount outstanding (30% weightage) and liquidity score (70% weightage). These weights will drift on an ongoing basis on account of relative price movements.
- Weights will be reset during every rebalancing period.

Rebalancing and Review:

- The most liquid security in each issuer will be reviewed during the quarter rebalancing.
- Any cash flows accruing to the index on account of coupon cash flows, part redemption of the security or securities, will be reinvested on the same day in the index in the proportion of existing weights.
- As the index includes securities that shall mature during the 6-month period ending on the final maturity date of the index, any proceeds from the redemption of securities prior to the final maturity date of the index shall be reinvested according to following waterfall approach -
 - The proceeds from security redemption will be reinvested in the longest maturity outstanding and maturing on or just before the index maturity date.
 - In case a replacement in the form of another outstanding security cannot be found for reinvestment then the proceeds from such redemption shall be reinvested in the remaining portfolio on the same date in the proportion of the existing weights. This will be subject to compliance to the SEBI portfolio concentration norms.
 - In case due to any reason, it is not possible to meet any norms as prescribed by SEBI vide circular no. SEBI/HO/IMD/DOF2/P/CIR/2022/69 dated May 23, 2022, then the proceeds from such redemption shall be reinvested in a T-Bill maturing on or just before the index maturity date.
 - If the last outstanding security (including T-Bill) in the index matures before the final index maturity date, all redemption proceeds shall be assumed to be re-invested in The Clearing Corporation of India Ltd.'s (CCIL) TREPS overnight rate for any subsequent days till the maturity of the index.
- The effective date of the above rebalancing shall be first working day of the month of rebalance.
- Any index having maturity date on a weekend (Saturday and Sunday) or on a holiday, or on an unplanned market off, will mature on the next working day.

CRISIL-IBX 50:50 Gilt Plus SDL Index – April 2033

CRISIL-IBX 50:50 Gilt Plus SDL Index – April 2033 seeks to track the performance of Gilt and SDL securities maturing between 26th April 2032 to 25th April 2033. The index shall mature on 25th April 2033.

Asset Allocation

- **Gilt:** 50%
- **SDL:** 50%

The weights between asset classes may drift due to price movement and will be reset quarterly.

Features

- Total Return Index seeking to capture price and coupon returns of the underlying portfolio.
- It's a target date index which follows a roll-down approach.
- Government securities with a minimum outstanding of Rs. 25000 crores.
- States filtered based on Total outstanding liability and Gross state domestic product ratio with a minimum outstanding of Rs 6,000 crores in the eligible period, having the security closest to target date.
- Index portfolio marked-to-market on a daily basis using CRISIL valuations
- Inception Date of Index: 10th January 2023.

Key Characteristics

- **Replicability:** The index constituents are valued on a daily basis. This lends the index a realistic approach by having the valuations close to the market levels

Methodology

Gilt

Security Selection:

- All Securities are selected on the basis of Amount Outstanding.
- All securities, in the eligible period, with minimum Amount Outstanding of Rs. 25000 crores.
- Surrogate bonds (namely Food Corporation of India bonds, Oil bonds, Fertilizer bonds and UTI Special Bonds), STRIPS and Floating rate bonds shall be kept out of the purview of the selection process since these are quasi government bonds
- The index constituents are valued on a daily basis using CRISIL Valuations.

Weighing Approach:

- Weights to individual securities will be divided equally as evaluated during inception date of the index.
- The weights may change due to relative price movements of securities

Rebalancing and Review:

- All securities shall be reviewed every quarter.

- Eligible securities will be added on a quarterly basis and weights will be redistributed equally.
- The relative weights of the Government securities and asset classes will change due to price movement and will be reset during the quarterly rebalancing.
- The existing securities will not be removed unless the security's amount outstanding falls below 25000 cr.
- Any cash flows accruing to the index on account of coupon cash flows, part redemption of the security or securities, will be reinvested on the same day in the index in the proportion of existing weights.
- As the index includes securities that shall mature during the twelve-month period ending on the final maturity date of the index, any proceeds from the redemption of securities prior to the final maturity date of the index shall be reinvested according to following waterfall approach –
 - The proceeds from security redemption will be reinvested in the longest maturity outstanding security and maturing on or just before the index maturity date.
 - In case a replacement in the form of outstanding security cannot be found for reinvestment then the proceeds from such redemption shall be reinvested in the remaining portfolio on the same date in the proportion of the existing weights.
 - In case if there are no eligible securities, then the proceeds from such redemption shall be reinvested in a T-Bill maturing on or just before the index maturity date.
 - If the last outstanding security (including T-Bill) in the index matures before the final index maturity date, all redemption proceeds shall be assumed to be re-invested in The Clearing Corporation of India Ltd.'s (CCIL) TREPS overnight rate for any subsequent days till the maturity of the index
- The effective date of the above rebalancing shall be first working day of the month or the quarter.
- Any index having maturity date on a weekend (Saturday and Sunday) or on a holiday, or on an unplanned market off, will mature on the next working day.
- The relative weights of the Government securities will change due to price movement and will be reset during the quarterly rebalancing.

SDL

Issuer Selection:

- All SDL issuers with a minimum total amount outstanding of Rs. 6,000 crores in the eligible period will be shortlisted.
- Top 5 issuers as evaluated during the inception date of the index shall be selected based on “Total Outstanding Liability /Gross State Domestic Product ratio” (in the order of lowest to highest)

Security Selection:

- Securities of selected issuers which are closest to target date, in the eligible period shall be selected.
- The index constituents are valued on a daily basis using CRISIL Valuations.
- Uday Bonds will be excluded.

Weighing Approach:

- Weights to the issuers will be divided equally as on the base date of the index. The weights shall change basis the relative price movements
- Weights will be reset during every rebalancing.

Rebalancing and Review:

- The index constituents will be reviewed on a quarterly basis.

- If any security becomes eligible, it will be added during the rebalancing, and the weights will be reset.
- Selection of states will be reviewed on an annual basis based on the latest available financial data for states.
- Any cash flows accruing to the index on account of coupon cash flows, part redemption of the security or securities, will be reinvested on the same day in the index in the proportion of existing weights
- As the index includes securities that shall mature during the twelve months period ending on the final maturity date of the index, any proceeds from the redemption of securities prior to the final maturity date of the index shall be reinvested according to following waterfall approach –
 - The proceeds from security redemption will be reinvested in the longest maturity outstanding security issued by the same issuer (state in case of SDL and Bond/money market instrument in case of corporate bond) and maturing on or just before the index maturity date.
 - In case a replacement in the form of outstanding security of the same issuer cannot be found for reinvestment then the proceeds from such redemption shall be reinvested in the remaining portfolio on the same date in the proportion of the existing weights.
 - In case it is not possible to reinvest as per the point number a and b stated above, then the proceeds from such redemption shall be reinvested in a T-Bill maturing on or just before the index maturity date.
 - If the last outstanding security (including T-Bill) in the index matures before the final index maturity date, all redemption proceeds shall be assumed to be re-invested in The Clearing Corporation of India Ltd.'s (CCIL) TREPS overnight rate for any subsequent days till the maturity of the index.
- The effective date of the above rebalancing shall be first working day of the month or the quarter.
- Any index having maturity date on a weekend (Saturday and Sunday) or on a holiday, or on an unplanned market off, will mature on the next working day.

CRISIL-IBX 50:50 Gilt Plus SDL Short Duration Fund Index

CRISIL-IBX 50:50 Gilt Plus SDL Short Duration Fund Index seeks to track the performance of short term Gilt and SDL issuers in a fixed maturity bucket.

Asset Allocation

- **Gilt:** 50%
- **SDL:** 50%

The weights between asset classes may drift due to price movement and will be reset quarterly.

Features

- Total Return Index seeking to capture price and coupon returns of the underlying portfolio.
- Government securities with highest liquidity and a minimum outstanding of Rs. 10000 crores.
- State issuers with highest liquidity in the eligible bucket, having the security with highest liquidity.
- Following four buckets shall be taken into consideration based on residual maturity as on the inception date and rebalancing date for government securities and State issuers: -
 - 1-2 year Bucket
 - 2-3 year Bucket
 - 3-4 year Bucket
 - 4-5 year Bucket
- Index portfolio marked-to-market on a daily basis using CRISIL valuations
- Inception Date of Index: 25th January 2023.

Key Characteristics

- **Replicability:** The index constituents are valued on a daily basis. This lends the index a realistic approach by having the valuations close to the market levels

Methodology

Gilt

Security Selection:

- Topmost liquid security with a minimum outstanding of Rs. 10,000 crores as evaluated on the inception date and each rebalancing date in each eligible bucket shall be selected.
- Liquid security selection shall be done based on highest liquidity score.
- Surrogate bonds (namely Food Corporation of India bonds, Oil bonds, Fertilizer bonds and UTI Special Bonds), STRIPS and Floating rate bonds shall be kept out of the purview of the selection process.
- Liquidity score shall be calculated based on the volume traded (70%), number of trades (15%) and days traded (15%) in the previous quarters.

Weighing Approach:

- Weights to individual securities will be divided equally as evaluated during inception date of the index.

- The weights may change due to relative price movements of securities.

Rebalancing and Review:

- All securities shall be reviewed every quarter.
- Any cash flows accruing to the index on account of coupon cash flows, part redemption of the security or securities, will be reinvested on the same day in the index in the proportion of existing weights.
- The effective date of the above rebalancing shall be first working day of the month or the quarter.
- Any index having maturity date on a weekend (Saturday and Sunday) or on a holiday, or on an unplanned market off, will mature on the next working day.

SDL**Issuer Selection:**

- All states with issuances maturing in the eligible Bucket shall be shortlisted.
- Topmost liquid issuers in the eligible bucket shall be selected on the basis of liquidity as evaluated during inception date and each rebalancing date.
- Liquidity score shall be calculated based on the volume traded (70%), number of trades (15%) and days traded (15%) in the previous quarter.
- UDAY bonds shall be excluded from eligible universe.

Security Selection:

- For each issuer selected, most liquid security as evaluated during the index inception and each rebalancing date based on liquidity score in the eligible bucket shall be selected. Securities with minimum amount outstanding of Rs. 500 crores shall be considered. If there are no trades in the previous quarter for a particular issuer, then security nearest to the maturity from the eligible universe shall be selected.

Weighing Approach:

- Weights to the issuers under each bucket will be divided equally as on the base date of the index.
- The weights shall change basis the relative price movements.
- Weights will be reset during every rebalancing.

Rebalancing and Review:

- The index constituents will be reviewed on a quarterly basis.
- Any cash flows accruing to the index on account of coupon cash flows, part redemption of the security or securities, will be reinvested on the same day in the index in the proportion of existing weights
- The effective date of the above rebalancing shall be first working day of the month or the quarter.
- Any index having maturity date on a weekend (Saturday and Sunday) or on a holiday, or on an unplanned market off, will mature on the next working day.

CRISIL-IBX Gilt Index – April 2032

CRISIL-IBX Gilt Index – April 2032 seeks to track the performance of Gilt securities maturing between 1st May 2031 to 30th April 2032. The index shall mature on 30th April 2032.

Asset Allocation

- **Government Bonds:** 100%

Features

- Total Return Index seeking to capture price and coupon returns of the underlying portfolio.
- It's a target date index which follows a roll-down approach.
- Government Securities are to be selected with minimum Amount Outstanding should be Rs. 25000 crores.
- Index portfolio marked-to-market on a daily basis using CRISIL Gilt and T-Bills valuations.
- Inception Date of Index: 25th January 2023.

Key Characteristics

- **Replicability:** The index constituents are valued on a daily basis. This lends the index a realistic approach by having the valuations close to the market levels.

Methodology

Security Selection:

- All eligible Securities shall be selected on the basis of Amount Outstanding.
- Securities are to be selected with minimum Amount Outstanding should be Rs. 25000 crore.
- The selected security shall have a minimum average daily trading volume of Rs. 25 crore in the previous quarter.
- Surrogate bonds (namely Food Corporation of India bonds, Oil bonds, Fertilizer bonds and UTI Special Bonds), STRIPS and Floating rate bonds shall be kept out of the purview of the selection process.

Weighing Approach:

- Weights to individual securities will be calculated in the ratio of amount outstanding (30% weightage) and liquidity score (70% weightage), as on base date of the index, which is the inception date of the index. Post the inception dates the weights calculated basis liquidity score and amount outstanding may drift due to price movements. Such weights shall be reset half-yearly.
- Liquidity score will be calculated based on the volume traded (70%), number of trades (15%) and days traded (15%) in the previous quarter.
- Weights will be reset on the rebalancing date.

Rebalancing and review:

- The securities shall be rebalanced every 6 months and the relative weights of the Government securities will change due to price movement and will be reset during the half-yearly rebalancing.
- Eligible securities will be added on a half yearly basis and weights will be redistributed based on ratio of

amount outstanding (30% weightage) and liquidity score (70% weightage).

- Any cash flows accruing to the index on account of coupon cash flows, part redemption of the security or securities, will be reinvested on the same day in the index in the proportion of existing weights.
- As the index includes securities that shall mature during the 12 month period ending on the final maturity date of the index, any proceeds from the redemption of securities prior to the final maturity date of the index shall be reinvested according to following waterfall approach:-
 - The proceeds from security redemption will be reinvested in the longest maturity outstanding government security and maturing on or just before the index maturity date.
 - In case a replacement in the form of outstanding security of the government securities cannot be found for reinvestment then the proceeds from such redemption shall be reinvested in the remaining portfolio on the same date in the proportion of the existing weights.
 - In case due to any reason, it is not possible to reinvest any issuer as prescribed by SEBI vide circular no. SEBI/HO/IMD/DOF2/P/CIR/2022/69 dated May 23, 2022, then such proceeds shall be reinvested in a T-Bill maturing on or just before the index maturity date.
 - If the last outstanding security (including T-Bill) in the index matures before the final index maturity date, all redemption proceeds shall be assumed to be re-invested in The Clearing Corporation of India Ltd.'s (CCIL) TREPS overnight rate for any subsequent days till the maturity of the index.
- The effective date of the above rebalancing shall be first working day of the month of rebalance.
- Any index having maturity date on a weekend (Saturday and Sunday) or on a holiday, or on an unplanned market off, will mature on the next working day.

Portfolio as on 03 October 2023

Asset Class	ISIN	Issuer Name	Maturity	Weights
Gilt	IN0020210095	Central Government	12-Jul-31	23.66%
	IN0020210244	Central Government	17-Jan-32	76.34%

CRISIL-IBX AAA Index – March 2024

CRISIL-IBX AAA Index – March 2024. Seeks to track the performance of AAA issuers maturing between 01 October 2023 to 30 March 2024. The index shall mature on 31 March 2024.

Asset Allocation

- **AAA Corporate bonds:** 100%

The weights may drift due to price movement, and will be reset quarterly

Features

- Total Return Index seeking to capture price and coupon returns of the underlying portfolio.
- It's a target date index which follows a roll-down approach.
- AAA corporate issuers having with a minimum outstanding of Rs. 1,000 crores in the eligible period, having the issuers with the highest liquidity in the eligible period.
- Index portfolio marked-to-market on a daily basis using CRISIL valuations
- Inception Date of Index: 31st January 2022.

Key Characteristics

- **Replicability:** The index constituents are valued on a daily basis. This lends the index a realistic approach by having the valuations close to the market levels

Methodology

Issuer Selection

1. All eligible issuers with a conservative rating of AAA maturing in the eligible period will be shortlisted
2. Topmost 20 liquid issuers with a minimum total amount outstanding of Rs. 1,000 crores in the eligible period as evaluated during the inception date of the index will be selected on the basis of liquidity. If less than 20 issuers are available, all issuers will be selected. Minimum 8 issuers are to be selected.
3. Only listed issuers shall be included in the index. An issuer will be considered to be listed if at least one security of such issuer is listed.
4. Liquidity score will be calculated based on the volume traded (70%), number of trades (15%) and days traded (15%) in the previous quarter.

Security Selection

1. For each issuer selected, security having maturity nearest to the target date as evaluated during the inception date of the index shall be selected, from securities maturing in eligible period, with minimum amount outstanding of Rs. 700 crores.
2. Perpetual bonds, Floating rate bonds, Tax free bonds, GOI service bonds, GOI guaranteed bonds, CE Rated, Partly Paid, Partial Redemption and bonds with embedded call/put options, subordinated debt securities are excluded from the universe of bonds. Bonds with both put & call option on same dates will be excluded too.
3. Additional Tier-II are excluded from the universe of bonds.

Weighing Approach

1. Weights to the issuers will be divided equally
2. Each issuer will be subject to a cap of 15%. Issuers will be subject to Sector and group cap of 25% respectively. The 25% sector and group caps are not applicable to PSUs, PFIs and PSBs as mentioned in the SEBI circular SEBI/HO/IMD/DOF2/P/CIR/2022/69.
3. Weights will be reset every quarter

Rebalancing and Downgrade

1. The index constituents will be reviewed on semi-annual basis.
2. During the semi-annual rebalancing, if a new issuer meets the eligibility criteria, it will be added to the index, subject to limit of 20 issuers. The weights of the issuers will be reset to equal weights during the semi-annual rebalancing (subject to sector and group caps), when a new issuer is added in the index, subject to 15% single issuer limit.
3. The selected securities will be held till maturity (or till they are replaced by security of the same issuer with maturity date nearer to the maturity date of the fund during semi-annual rebalancing).
4. If the issuer cap of 15% is being breached, additional / excess amount may be invested in the rest of the securities of the same asset class which are part of the index
5. In case if any issuer gets downgrade for the AAA issuers, such issuers shall be excluded from the index on a monthly basis.
6. When the issuer is excluded, the weight of the particular issuer will be redistributed proportionally in rest of the issuers of same asset class, subject to 15% issuer cap.
7. If the total number of AAA issuers fall below 14, when issuers are excluded on the basis of above reasons (Downgrade/disinvestment), new issuers will be added as per the criteria stated above.
8. Any cash flows accruing to the index on account of coupon cash flows, part redemption of the security or securities, will be reinvested on the same day in the index in the proportion of existing weights
9. As the index includes securities that shall mature during the 6 month period ending on the final maturity date of the index, any proceeds from the redemption of securities prior to the final maturity date of the index shall be reinvested according to following waterfall approach :-
 - The proceeds from security redemption will be reinvested in the longest maturity outstanding security issued by the same issuer (state in case of SDL and Bond/money market instrument in case of corporate bond) and maturing on or just before the index maturity date.
 - In case a replacement in the form of outstanding security of the same issuer cannot be found for reinvestment then the proceeds from such redemption shall be reinvested in the remaining portfolio on the same date in the proportion of the existing weights.
 - In case it is not possible to reinvest as per the point number a and b stated above, then the proceeds from such redemption shall be reinvested in a T-Bill maturing on or just before the index maturity date.
 - If the last outstanding security (including T-Bill) in the index matures before the final index maturity date, all redemption proceeds shall be assumed to be re-invested in The Clearing Corporation of India Ltd.'s (CCIL) TREPS overnight rate for any subsequent days till the maturity of the index.

The effective date of the above rebalancing shall be first working day of the month or the quarter.

‘Any index having maturity date on a weekend (Saturday and Sunday) or on a holiday, or on an unplanned market off, will mature on the next working day.’

CRISIL-IBX SDL Index – June 2032

CRISIL-IBX SDL Index – June 2032 seeks to track the performance of SDL securities maturing between 01st July 2031 to 30th June 2032. The index shall mature on 30th June 2032.

Asset Allocation

- **SDL:** 100%

Features

- Total Return Index seeking to capture price and coupon returns of the underlying portfolio.
- It's a target date index which follows a roll-down approach.
- State issuers with a minimum outstanding of Rs. 14,000 crores in the eligible period, having the security with highest liquidity.
- Index portfolio marked-to-market on a daily basis using CRISIL valuations
- Inception Date of Index: 31st January 2023.

Key Characteristics

- **Replicability:** The index constituents are valued on a daily basis. This lends the index a realistic approach by having the valuations close to the market levels

Methodology

SDL

Issuer Selection:

- All states with issuances in maturing in the eligible period will be shortlisted
- 10 most liquid issuers identified at the time of inception of the index with a minimum total amount outstanding of Rs. 14000 crores in the eligible period will be selected on the basis of liquidity. If less than 10 issuers are available, all issuers will be selected.
- Liquidity score will be calculated based on the volume traded (70%), number of trades (15%) and days traded (15%) in the previous quarter.

Security Selection:

- For each issuer selected, most liquid security based on liquidity score in the previous quarter will be selected. Securities maturing in eligible period before the target date, with minimum amount outstanding of Rs. 1000 crores will be considered. If there are no trades in the previous quarter for a particular issuer, then security nearest to the maturity from the eligible universe will be selected.
- UDAY bonds will be excluded.

Weighing Approach:

- Weights to the issuers will be divided equally as on the base date of the index. The weights may drift due

to relative price movements of securities.

- Weights will be reset during every rebalancing.

Rebalancing and Review:

- The index constituents will be reviewed on semi-annual basis (April and October).
- If any issuer becomes eligible, it will be added during the rebalancing, and the weights will be redistributed. Existing issuers will continue to remain in the index.
- During the rebalancing, if any security of an issuer becomes eligible, it will be added to the index. Existing securities continue to remain in the index. Weight of the issuer will be divided among the securities.
- Any cash flows accruing to the index on account of coupon cash flows, part redemption of the security or securities, will be reinvested on the same day in the index in the proportion of existing weights.
- As the index includes securities that shall mature during the twelve month period ending on the final maturity date of the index, any proceeds from the redemption of securities prior to the final maturity date of the index shall be reinvested according to following waterfall approach –
 - The proceeds from security redemption will be reinvested in the longest maturity outstanding SDL security issued by the same issuer and maturing on or just before the index maturity date.
 - In case a replacement in the form of another outstanding SDL security of the same issuer cannot be found for reinvestment then the proceeds from such redemption shall be reinvested in the remaining portfolio on the same date in the proportion of the existing weights.
 - In case due to any reason it is not possible to invest as per the points above, then the proceeds from such redemption shall be reinvested in a T-Bill maturing on or just before the index maturity date.
 - If the last outstanding security (including T-Bill) in the index matures before the final index maturity date, all redemption proceeds shall be assumed to be re-invested in The Clearing Corporation of India Ltd.'s (CCIL) TREPS overnight rate for any subsequent days till the maturity of the index.
- The effective date of the above rebalancing shall be first working day of the month of rebalance.
- Any index having maturity date on a weekend (Saturday and Sunday) or on a holiday, or on an unplanned market off, will mature on the next working day.

CRISIL-IBX 50:50 SDL Plus Gilt Index - September 2027

CRISIL-IBX 50:50 SDL Plus Gilt Index – September 2027 seeks to track the performance of large SDL and GILT securities maturing between 01 April 2027 to 30 September 2027. The index shall mature on 30 September 2027.

Asset Allocation

- **SDL:** 50%
- **GILT:** 50%

The weights between asset classes may drift due to price movement and will be reset quarterly.

Features

- Total Return Index seeking to capture price and coupon returns of the underlying portfolio.
- It's a target date index which follows a roll-down approach.
- Government securities with a minimum outstanding of Rs. 25,000 crores, having the security with highest liquidity.
- State issuers with a minimum outstanding of Rs. 1000 crores in the eligible period, having the security with highest liquidity.
- Index portfolio marked-to-market on a daily basis using CRISIL valuations
- Inception Date of Index: 03rd February, 2023.

Key Characteristics

- **Replicability:** The index constituents are valued on a daily basis. This lends the index a realistic approach by having the valuations close to the market levels

Methodology

Gilt

Security Selection:

- Securities with minimum Amount Outstanding of Rs. 25000 crores will be eligible for selection as evaluated during the inception date.
- Surrogate bonds (namely Food Corporation of India bonds, Oil bonds, Fertilizer bonds and UTI Special Bonds), STRIPS and Floating rate bonds shall be kept out of the purview of the selection process since these are quasi government bonds
- 2 most liquid securities as evaluated during the inception date will be selected based on liquidity in the previous quarter.
- The index constituents shall be valued on a daily basis using CRISIL Valuations.

Weighing Approach:

- Weights to individual securities as evaluated during the inception date and during each index rebalancing will be calculated in the ratio of amount outstanding (30% weightage) and liquidity score (70% weightage).

These weights will drift on an ongoing basis on account of relative price movements.

- Liquidity score will be calculated based on the volume traded (70%), number of trades (15%) and days traded (15%) in the previous quarter.

Rebalancing and Review:

- The most 2 liquid securities shall be reviewed every quarter.
- Eligible securities will be added on a quarterly basis and weights will be redistributed based on ratio of amount outstanding (30% weightage) and liquidity score (70% weightage). These weights will drift on an ongoing basis on account of relative price movements
- Any cash flows accruing to the index on account of coupon cash flows, part redemption of the security or securities, will be reinvested on the same day in the index in the proportion of existing weights.
- As the index includes securities that shall mature during the six month period ending on the final maturity date of the index, any proceeds from the redemption of securities prior to the final maturity date of the index shall be reinvested according to following waterfall approach:-
 - The proceeds from security redemption will be reinvested in the longest maturity outstanding security issued by the same issuer (state in case of SDL and Bond/money market instrument in case of corporate bond) and maturing on or just before the index maturity date.
 - In case a replacement in the form of outstanding security of the same issuer cannot be found for reinvestment then the proceeds from such redemption shall be reinvested in the remaining portfolio on the same date in the proportion of the existing weights.
 - In case it is not possible to reinvest as per the point number a and b stated above, then the proceeds from such redemption shall be reinvested in a T-Bill maturing on or just before the index maturity date.
 - If the last outstanding security (including T-Bill) in the index matures before the final index maturity date, all redemption proceeds shall be assumed to be re-invested in The Clearing Corporation of India Ltd.'s (CCIL) TREPS overnight rate for any subsequent days till the maturity of the index.
- The relative weights of the Government securities will change due to price movement and will be reset during the semi-annual rebalancing.
- The effective date of the above rebalancing shall be first working day of the month of rebalance.

SDL

Issuer Selection:

- All states with issuances in maturing in the eligible period will be shortlisted
- Top 15 issuers as evaluated on the inception date of the index with a minimum total amount outstanding of Rs. 1,000 crores in the eligible period will be selected on the basis of liquidity. If less than 15 issuers are available, all issuers will be selected.
- Liquidity score will be calculated based on the volume traded (70%), number of trades (15%) and days

traded (15%) in the previous quarter

Security Selection:

- For each issuer selected, security having highest liquidity as evaluated on the inception date of the index shall be selected, from securities maturing in 6-month period before the target date, and with minimum amount outstanding of Rs. 500 crores will be considered.
- The index constituents are valued on a daily basis using CRISIL Valuations.
- Uday Bonds will be excluded.

Weighing Approach:

- Weights to individual securities as evaluated during the inception date and during each index rebalancing will be calculated in the ratio of amount outstanding (30% weightage) and liquidity score (70% weightage). These weights will drift on an ongoing basis on account of relative price movements.
- Weights will be reset during every rebalancing period.

Rebalancing and Review:

- The most liquid security in each issuer will be reviewed during the quarter rebalancing.
- Any cash flows accruing to the index on account of coupon cash flows, part redemption of the security or securities, will be reinvested on the same day in the index in the proportion of existing weights,
- As the index includes securities that shall mature during the six month period ending on the final maturity date of the index, any proceeds from the redemption of securities prior to the final maturity date of the index shall be reinvested according to following waterfall approach –
 - The proceeds from security redemption will be reinvested in the longest maturity outstanding security issued by the same issuer (state in case of SDL and Bond/money market instrument in case of corporate bond) and maturing on or just before the index maturity date.
 - In case a replacement in the form of outstanding security of the same issuer cannot be found for reinvestment then the proceeds from such redemption shall be reinvested in the remaining portfolio on the same date in the proportion of the existing weights.
 - In case it is not possible to reinvest as per the point number a and b stated above, then the proceeds from such redemption shall be reinvested in a T-Bill maturing on or just before the index maturity date.
 - If the last outstanding security (including T-Bill) in the index matures before the final index maturity date, all redemption proceeds shall be assumed to be re-invested in The Clearing Corporation of India Ltd.'s (CCIL) TREPS overnight rate for any subsequent days till the maturity of the index.
- The effective date of the above rebalancing shall be first working day of the month of rebalance.
- Any index having maturity date on a weekend (Saturday and Sunday) or on a holiday, or on an unplanned market off, will mature on the next working day.

CRISIL-IBX SDL Index – September 2028

CRISIL-IBX SDL Index – September 2028 seeks to track the performance of SDL securities maturing between 30th March 2028 to 29th September 2028. The index shall mature on 29th September 2028.

Asset Allocation

- **SDL:** 100%

Features

- Total Return Index seeking to capture price and coupon returns of the underlying portfolio.
- It's a target date index which follows a roll-down approach.
- State issuers with a minimum outstanding of Rs. 1,500 crores in the eligible period, having the security with highest liquidity.
- Index portfolio marked-to-market on a daily basis using CRISIL valuations
- Inception Date of Index: 23rd March, 2023.

Key Characteristics

- **Replicability:** The index constituents are valued on a daily basis. This lends the index a realistic approach by having the valuations close to the market levels

Methodology

SDL

Issuer Selection:

- All states with issuances maturing in the eligible period will be shortlisted
- 10 most liquid issuers identified at the time of inception of the index with a minimum total amount outstanding of Rs. 1500 crores in the eligible period will be selected on the basis of liquidity. If less than 10 issuers are available, all issuers will be selected.
- Liquidity score will be calculated based on the volume traded (70%), number of trades (15%) and days traded (15%) in the previous quarter.

Security Selection:

- For each issuer selected, most liquid security based on liquidity score in the previous quarter will be selected. Securities maturing in eligible period before the target date, with minimum amount outstanding of Rs. 1500 crores will be considered. If there are no trades in the previous quarter for a particular issuer, then security nearest to the maturity from the eligible universe will be selected.
- UDAY bonds will be excluded

Weighing Approach:

- Weights to the issuers will be divided equally as on the base date of the index. The weights may drift due to relative price movements of securities.
- Weights will be reset every quarter.

Rebalancing and Review:

- The index constituents shall be rebalanced on semi-annual basis and the relative weights will be reset equally during rebalancing .
- Existing issuers will be carried forward to the next rebalancing period.
- If the total number of SDL issuers fall below 10, when issuers are excluded due to any reason, new issuers will be added as per the criteria stated above. New issuers will be added only if there are less than 10 issuers.
- Securities of selected issuers will be reviewed and replaced by the most liquid securities during semi-annual rebalancing.
- Any cash flows accruing to the index on account of coupon cash flows, part redemption of the security or securities, will be reinvested on the same day in the index in the proportion of existing weights.
- As the index includes securities that shall mature during the twelve month period ending on the final maturity date of the index, any proceeds from the redemption of securities prior to the final maturity date of the index shall be reinvested according to following waterfall approach –
 - The proceeds from security redemption will be reinvested in the longest maturity outstanding SDL security issued by the same issuer and maturing on or just before the index maturity date.
 - In case a replacement in the form of another outstanding SDL security of the same issuer cannot be found for reinvestment then the proceeds from such redemption shall be reinvested in the remaining portfolio on the same date in the proportion of the existing weights.
 - In case due to any reason it is not possible to invest as per the points above, then the proceeds from such redemption shall be reinvested in a T-Bill maturing on or just before the index maturity date.
 - If the last outstanding security (including T-Bill) in the index matures before the final index maturity date, all redemption proceeds shall be assumed to be re-invested in The Clearing Corporation of India Ltd.'s (CCIL) TREPS overnight rate for any subsequent days till the maturity of the index.
- The effective date of the above rebalancing shall be first working day of the month of rebalance.
- Any index having maturity date on a weekend (Saturday and Sunday) or on a holiday, or on an unplanned market off, will mature on the next working day.

CRISIL-IBX SDL Index – June 2034

CRISIL-IBX SDL Index - June 2034 seeks to track the performance of SDL securities maturing between 01 July 2033 to 30 June 2034. The index shall mature on 30 June 2034.

Inception date: Yet to finalize.

Asset Allocation

- **SDL:** 100%

Target date (Maturity date of the index): 30 June 2034

Eligible period/lookback period – The dates between which underlying securities will mature:

- 01 July 2033 to 30 June 2034

Asset Allocation :

SDL	100%
-----	------

- As the index includes securities that shall mature within rebalancing period ending, any proceeds from the redemption of securities prior to the final maturity date of the index shall be reinvested according to following waterfall approach: -
 - The proceeds from security redemption will be reinvested in the longest maturity outstanding security issued by the same issuer (state in case of SDL and Bond/money market instrument in case of corporate bond) and maturing on or just before the index maturity date.
 - In case a replacement in the form of outstanding security of the same issuer cannot be found for reinvestment then the proceeds from such redemption shall be reinvested in the remaining portfolio on the same date in the proportion of the existing weights.
 - In case it is not possible to reinvest as per the point number a and b stated above, then the proceeds from such redemption shall be reinvested in a T-Bill maturing on or just before the index maturity date.
 - If the last outstanding security (including T-Bill) in the index matures before the final index maturity date, all redemption proceeds shall be assumed to be re-invested in The Clearing Corporation of India Ltd.'s (CCIL) TREPS overnight rate for any subsequent days till the maturity of the index.

Index Construction:

Parameter	Asset class – SDL
Eligibility criteria	<ul style="list-style-type: none"> • Minimum amount outstanding of states in the eligible - Rs. 10,000 crores • Minimum amount outstanding of securities in the eligible period - Rs. 1000 crores
Universe exclusions	<ul style="list-style-type: none"> • Securities - <ol style="list-style-type: none"> 1. Uday bonds 2. Special securities
Issuer selection at inception	<ul style="list-style-type: none"> • Top 9 states shall be selected, on the basis of liquidity of the securities maturing in the eligible period.
Security selection at inception	<ul style="list-style-type: none"> • Securities of selected states having maturity nearest to target date, with minimum amount outstanding of Rs. 1000 crores will be selected.
Weighing approach	<ul style="list-style-type: none"> • Weights to the securities will be based on Liquidity score (70%) and amount outstanding (30%) at a state level. The weight will drift with price movement in the securities which will reset on quarterly basis

	<ul style="list-style-type: none"> Liquidity score will be calculated based on the volume traded (70%), number of trades (15%) and days traded (15%) in the previous quarter
Rating change treatment	NA
Removal from index	<ul style="list-style-type: none"> States or Securities will be removed at the month end, if amount outstanding of any security falls below Rs. 1000 crore in the interim period and there is no replacement security available for the states.
Cash flow treatment	<ul style="list-style-type: none"> Any cash flows accruing to the index on account of coupon cash flows, part redemption of the security or securities, will be reinvested on the same day in the index in the proportion of existing weights
Rebalancing –	<ul style="list-style-type: none"> Existing states will be carried forward.
1. Issuer selection	
2. Treatment of existing issuers	<ul style="list-style-type: none"> Hold till maturity
3. Security selection	<ul style="list-style-type: none"> New security of same state having outstanding greater than existing security and maturity closer to fund maturity as compared to existing security will be selected.
4. Treatment of existing securities	<ul style="list-style-type: none"> Hold till maturity unless a new security of same state is available having outstanding greater than and maturity closer to fund maturity as compared to existing security.
Reconstitution frequency	<ul style="list-style-type: none"> Quarterly (Jan, Apr, July, Oct)
Weight reset frequency	<ul style="list-style-type: none"> Quarterly (Jan, Apr, July, Oct)

- The effective date of the above rebalancing shall be first working day of the month of rebalance.
