I INTRODUCTION

A. RISK FACTORS

Standard Risk Factors:

- Investment in Mutual Fund units involves investment risks such as trading volumes, settlement risk, liquidity risk, default risk including the possible loss of principal.
- As the price / value / interest rates of the securities in which the Scheme invests fluctuates, the value of your investment in the scheme can go up or down depending on various factors and forces affecting capital markets and money markets.
- Past performance of the Sponsor/AMC/Mutual Fund does not guarantee future performance of the Scheme.
- Mirae Asset Great Consumer Fund is the name of the Scheme, and this do not in any manner indicate the quality of the Scheme or its future prospects and returns.
- The Sponsor is not responsible or liable for any loss resulting from the operation of the Scheme beyond the initial contribution of Rs.1.00 Lac made by it towards setting up the Mirae Asset Mutual Fund.
- The present scheme is not a guaranteed or assured return scheme. In addition, the scheme does not guarantee or assure any Income Distribution cum Capital Withdrawal (IDCW) and also does not guarantee or assure that it will make any IDCW distribution, though it has every intention to make the same in the distributions of Income Distribution cum Capital Withdrawal option. All distributions of Income Distribution cum Capital Withdrawal will be subjected to the investment performance of the Scheme.

Scheme Specific Risk Factors

1. The fund may invest in domestic/overseas mutual funds which invests in equities and equity related securities of companies. Hence, movements in Net Asset Value of the underlying schemes would impact the performance of Mirae Asset great Consumer Fund.
2. The disclosures of portfolio for the Scheme will be limited to the particulars of the asset allocation like equity securities and money market securities where the Scheme has invested.

Country Party Risk:

As the equity related securities such as warrants could be subjected to counter party risk as these rank equally among themselves and with all other unsecured obligations of the issuer in case of liquidation of the issuer. Therefore, the value of the Fund's assets will, and may always, depend entirely on the credit risk of the issuer held by the Fund. In the event of liquidation or default of the issuer and that a replacement

issuer cannot be appointed, dealing of the Units of the ETF may be suspended and the Fund may ultimately be terminated, in which case, the Fund may redeem all outstanding Units at the Net Asset Value which may differ from the trading price on the exchange which is affected by secondary market trading factors.

Risks Associated with Equity Investments:

- Equity and equity related securities are volatile and prone to price fluctuations on a daily basis. The liquidity of investments made in the Scheme may be restricted by trading volumes and settlement periods. Settlement periods may be extended significantly by unforeseen circumstances. The inability of the Scheme to make intended securities purchases, due to settlement problems, could cause the Scheme to miss certain investment opportunities. Similarly, the inability to sell securities held in the Scheme portfolio would result at times, in potential losses to the Scheme, should there be a subsequent decline in the value of securities held in the Scheme portfolio. Also, the value of the Scheme investments may be affected by interest rates, changes in law/ policies of the government, taxation laws and political, economic or other developments which may have an adverse bearing on individual Securities, a specific sector or all sectors.
- Investments in equity and equity related securities involve a degree of risk and investors should not invest in the equity Schemes unless they can afford to take the risk of losing their investment.
- Securities which are not quoted on the stock exchanges are inherently illiquid in nature and carry a larger liquidity risk in comparison with securities that are listed on the exchanges or offer other exit options to the investors, including put options. The AMC may choose to invest in unlisted securities that offer attractive yields within the regulatory limit. This may however increase the risk of the portfolio. Additionally, the liquidity and valuation of the Scheme investments due to its holdings of unlisted securities may be affected if they have to be sold prior to the target date of disinvestment.

Settlement Risk

Different segments of financial markets have different settlement periods and such periods may be extended significantly by unforeseen circumstances. The inability of the Portfolio to make purchases in intended securities due to settlement problems could cause the Portfolio to miss certain investment opportunities.

Regulatory Risk

The value of the securities may be affected by uncertainties such as changes in government policies, changes in taxation, and other developments in the laws and regulations.

Risk associated with Unlisted Securities

Securities which are not quoted on the stock exchanges are inherently illiquid in nature and carry a larger liquidity risk in comparison with securities that are listed on the exchanges or offer other exit options to the investors, including put options. The underlying scheme may choose to invest in unlisted domestic securities that offer attractive yields within the regulatory limit. This may however increase the risk of the portfolio. Additionally, the liquidity and valuation of the Scheme's investments due to its holdings of unlisted securities may be affected if they have to be sold prior to the target date of disinvestment.

Risks Associated with Debt & Money Market Instruments

Interest Rate Risk / Price Risk

From the perspective of coupon rates, debt securities can be classified in two categories, i.e., Fixed coupon bearing securities and Floating coupon bearing securities. In Fixed coupon bearing securities, the coupon rate is determined at the time of investment and paid/received at the predetermined frequency. In the floating coupon bearing securities, on the other hand, the coupon rate changes – 'floats' – with the underlying benchmark rate, e.g., MIBOR, 1 yr. Treasury bill.

Fixed income securities (such as Government Securities, bonds, debentures and money market instruments) where a fixed return is offered, run price-risk. Generally, when interest rates rise, prices of fixed income securities fall and when interest rates drop, the prices increase. The extent of fall or rise in the prices is a

function of the existing coupon, the payment-frequency of such coupon, days to maturity and the increase or decrease in the level of interest rates. The prices of Government Securities (existing and new) will be influenced only by movement in interest rates in the financial system and liquidity. Whereas, in the case of corporate or institutional fixed income securities, such as bonds or debentures, prices are influenced not only by the change in interest rates but also by credit rating of the security and liquidity thereof.

Reinvestment Risk

Investments in fixed income securities may carry reinvestment risk as interest rates prevailing in the market may differ from the original coupon of the bond. Consequently the proceeds from regular coupon and principal payments on due date may get invested at a lower rate.

Credit Risk

Credit Risk comprises three components.

- Default Risk

Securities carry a risk of repayment of principal or interest by the borrower. This is called as default risk. The default risk depends on micro economic factors such as financial soundness and ability of the borrower and macro-economic factors such as industry performance, competition, trade barriers etc.

- Downgrade Risk

It is the risk that credit rating agency downgrades the rating of an issuer based on earnings and cash flows generating capacity. The credit rating migration of issuance leads to increase in the credit spread and thus reduces the price of corporate bond.

- Spread Risk

Though the sovereign yield curve might remain constant, investments in corporate bonds are exposed to the risk of spread widening between corporate bonds and gilts. Typically, if this spread widens, the prices of the corporate bonds tend to fall and so could the NAV of the Debt Schemes. Similar risk prevails for the investments in the floating rate bonds, where the benchmark might remain unchanged, but the spread over the benchmark might vary. In such an event, if the spread widens, the price and the NAV could fall.

Prepayment Risk

The Borrower may prepay the receivables prior to their respective due dates. This may result in a change in the yield and tenor for the scheme.

Liquidity Risk

This refers to the ease at which a security can be sold at or near its true value. The primary measure of liquidity risk is the spread between the bid price and the offer price quoted by a dealer. Trading volumes, settlement periods and transfer procedures may restrict the liquidity of some of these investments. Different segments of the Indian financial markets have different settlement periods, and such periods may be extended significantly by unforeseen circumstances. The length of time for settlement may affect the Scheme in the event it has to meet an inordinately large number of redemption or of restructuring of the Scheme's investment portfolio.

Risks associated with Foreign Securities

The risk of investing in foreign securities carries exchange rate risks related to depreciation of foreign currency and the country risks, in addition to the risks of securities in domestic securities.

The country risks would include events such as change in regulations or political circumstances like introduction of extraordinary exchange rate controls, restrictions on repatriation of capital due to exchange rate controls, bi-lateral political tensions leading to immobilization of overseas financial assets and the prevalent tax laws of the respective jurisdiction for the execution of trades or otherwise. For further details please refer to section "Investments Limitations and Restrictions in Foreign Securities" in this Scheme Information Document.

Currency risk

The foreign securities are issued and traded in foreign currencies. As a result, their values may be affected by changes in exchange rates between foreign currencies and the Indian Rupee as well as between currencies of countries other than India. Restrictions on currency trading that may be imposed by developing market countries will have an adverse effect on the value of the securities of companies that trade or operate in such countries.

Risks Associated with Derivatives:

The risks associated with the use of derivatives are different from or possibly greater than the risks associated with investing directly in securities and other traditional instruments. Such risks include mispricing or improper valuation and the inability of derivatives to correlate perfectly with underlying assets, rates and indices.

Trading in derivatives carries a high degree of risk although they are traded at a relatively small amount of margin which provides the possibility of great profit or loss in comparison with the principal investment amount.

Derivative products are highly leveraged instruments that require investment techniques and risk analyses different from those associated with traditional securities such as shares or bonds. Investment in derivatives also requires the maintenance of adequate controls to monitor the transactions entered into, the ability to assess the risk that a derivative adds to the portfolio and the ability to forecast price or interest rate movements correctly.

The options buyer's risk is limited to the premium paid, while the risk of an options writer is unlimited. However, the gains of an options writer are limited to the premiums earned.

The writer of a call option bears a risk of loss if the value of the underlying asset increases above the exercise price. The loss can be unlimited as underlying asset can increase to any levels. The writer of a put option bears the risk of loss if the value of the underlying asset declines below the exercise price and the loss is limited to strike price.

Investments in futures face the same risk as the investments in the underlying securities. The extent of loss is the same as in the underlying securities. However, the risk of loss in trading futures contracts can be substantial, because of the low margin deposits required, the extremely high degree of leverage involved in futures pricing and the potential high volatility of the futures markets.

The derivatives are also subject to liquidity risk as the securities in the cash markets. The derivatives market in India is nascent and does not have the volumes that may be seen in other developed markets, which may result in volatility in the values. For further details please refer to section "Investments Limitations and Restrictions in Derivatives" in this Scheme Information Document.

Risk associated with Securities Lending

Securities Lending is a lending of securities through an approved intermediary to a borrower under an agreement for a specified period with the condition that the borrower will return equivalent securities of the same type or class at the end of the specified period along with the corporate benefits accruing on the securities borrowed.

In case the Scheme undertakes stock lending under the Regulations, it may, at times be exposed to counter party risk and other risks associated with the securities lending. Unitholders of the Scheme should note that there are risks inherent to securities lending, including the risk of failure of the other party, in this case the approved intermediary, to comply with the terms of the agreement entered into between the lender of securities i.e. the Scheme and the approved intermediary. Such failure can result in the possible loss of rights to the collateral put up by the borrower of the securities, the inability of the approved intermediary to return the securities deposited by the lender and the possible loss of any corporate benefits accruing to the lender from the securities deposited with the approved intermediary.

RISK MITIGATION MEASURES

Concentration Risk

The Scheme will try and mitigate this risk by investing in large number of companies so as to maintain optimum diversification and keep stock-specific concentration risk relatively low.

Liquidity Risk

As such the liquidity of stocks that the fund invests into could be relatively low. The fund will try to maintain a proper asset-liability match to ensure redemption / Maturity payments are made on time and not affected by illiquidity of the underlying stocks.

Risks Associated with Equity Investments:

The scheme has a diversified portfolio to counter the volatility in the prices of individual stocks. Diversification in the portfolio reduces the impact of high fluctuations in daily individual stock prices on the portfolio.

Risk of investing in unlisted securities

As per SEBI guidelines, not more than 10% of the portfolio can be invested in unlisted securities. Rigorous due diligence is undertaken before any investments are made by the portfolio in unlisted securities, if any.

Risks Associated with Debt & Money Market Instruments

Credit Risk - The fund has a rigorous credit research process. There is a regulatory and internal cap on exposure to each issuer. This ensures a diversified portfolio and reduced credit risk in the portfolio.

While these measures are expected to mitigate the above risks to a large extent, there can be no assurance that these risks would be completely eliminated.

Risks Associated with Repo in Corporate Debt

1) Illiquidity Risk

The repo market for corporate debt securities is over the counter (OTC) and illiquid. Hence, repo obligations cannot be easily sold to other parties. Therefore, to mitigate such risks, it has been stipulated that gross exposure to Repo in corporate bonds would be limited to 10% of net assets of the concerned scheme. Further, the tenor of repo would be taken based on nature and unit holders' pattern of the scheme.

2) Counter-party risk

Credit risk would arise if the counter-party fails to repurchase the security as contracted or if counterparty fails to return the security or interest received on due date. To mitigate such risks, the schemes shall carry out repo transactions with only those counterparties, which has a credit rating of 'A1+' or 'AA and above'. In case of lending of funds as a repo buyer, minimum haircuts on the value of the collateral security have been stipulated, and we would receive the collateral security in the scheme's account before the money is lent to the counter-party. Overall, we would have a limited number of counter-parties, primarily comprising of Mutual Funds, Scheduled Commercial banks, Financial Institutions and Primary dealers. Similarly, in the event of the scheme being unable to pay back the money to the counterparty as contracted, the counter-party may hurriedly dispose of the assets (as they have sufficient margin) and the net proceeds may be refunded to the Scheme. Thus, the Scheme may suffer losses in such cases. Sufficient funds flow management systems are in place to mitigate such risks.

3) Collateral Risk (as a repo buyer)

Collateral risks arise due to fall in the value of the security (change in credit rating and/or interest rates) against which the money has been lent under the repo arrangement. To mitigate such risks, we have stipulated the minimum credit rating of the issuer of collateral security.

(‘AA’ for long-term instruments/A1+ for money market instruments), maximum duration of the collateral security (10 years) and minimum haircuts on the value of the security.

Risks associated with investing in Tri-Party Repo through CCIL (TREPS)

The mutual fund is a member of securities segment and Tri-party Repo trade settlement of the Clearing Corporation of India (CCIL). All transactions of the mutual fund in government securities and in Triparty Repo trades are settled centrally through the infrastructure and settlement systems provided by CCIL; thus reducing the settlement and counterparty risks considerably for transactions in the said segments. CCIL maintains prefunded resources in all the clearing segments to cover potential losses arising from the default member. In the event of a clearing member failing to honour his settlement obligations, the default Fund is utilized to complete the settlement. The sequence in which the above resources are used is known as the “Default Waterfall”. As per the waterfall mechanism, after the defaulter’s margins and the defaulter’s contribution to the default fund have been appropriated, CCIL’s contribution is used to meet the losses. Post utilization of CCIL’s contribution if there is a residual loss, it is appropriated from the default fund contributions of the non-defaulting members. Thus the scheme is subject to risk of the initial margin and default fund contribution being invoked in the event of failure of any settlement obligations. In addition, the fund contribution is allowed to be used to meet the residual loss in case of default by the other clearing member (the defaulting member). However, it may be noted that a member shall have the right to submit resignation from the membership of the Security segment if it has taken a loss through replenishment of its contribution to the default fund for the segments and a loss threshold as notified have been reached. The maximum contribution of a member towards replenishment of its contribution to the default fund in the 7 days (30 days in case of securities segment) period immediately after the afore-mentioned loss threshold having been reached shall not exceed 5 times of its contribution to the Default Fund based on the last re-computation of the Default Fund or specified amount, whichever is lower. Further, it may be noted that, CCIL periodically prescribes a list of securities eligible for contributions as collateral by members. Presently, all Central Government securities and Treasury bills are accepted as collateral by CCIL. The risk factors may undergo change in case the CCIL notifies securities other than Government of India securities as eligible for contribution as collateral.”

B. REQUIREMENT OF MINIMUM NUMBER OF INVESTORS AND MINIMUM HOLDING BY SINGLE INVESTOR

The Scheme shall have a minimum of 20 investors and no single investor shall account for more than 25% of the corpus of the Scheme. However, if such limit is breached during the NFO of the Scheme, the Fund will endeavor to ensure that within a period of three months or the end of the succeeding calendar quarter from the close of the NFO of the Scheme, whichever is earlier, the Scheme complies with these two conditions. In case the Scheme does not have a minimum of 20 investors in the stipulated period, the provisions of Regulation 39(2)(c) of the SEBI (MF) Regulations would become applicable automatically and accordingly the Scheme shall be wound up and the units would be redeemed at applicable NAV. The two conditions mentioned above shall also be complied within each subsequent calendar quarter thereafter, on an average basis, as specified by SEBI. If there is a breach of the 25% limit by any investor over the quarter, a rebalancing period of one month would be allowed and thereafter the investor who is in breach of the rule shall be given 15 days’ notice to redeem his exposure over the 25% limit. Failure on the part of the said investor to redeem his exposure over the 25% limit within the aforesaid 15 days would lead to automatic redemption by the Mutual Fund on the applicable Net Asset Value on the 15th day of the notice period. The Fund shall adhere to the requirements prescribed by SEBI from time to time in this regard.

Overview of Debt Markets in India

Indian fixed income market, one of the largest and most developed in South Asia, is well integrated with the global financial markets. Screen based order matching system developed by the Reserve Bank of India (RBI) for trading in government securities, straight through settlement system for the same, settlements guaranteed by the Clearing Corporation of India and innovative instruments like Tri-party repo have contributed in reducing the settlement risk and increasing the confidence level of the market participants.

The RBI reviews the monetary policy six times a year giving the guidance to the market on direction of interest rate movement, liquidity and credit expansion. The central bank has been operating as an independent authority, formulating the policies to maintain price stability and adequate liquidity. Bonds are traded in dematerialized form. Credit rating agencies have been playing an important role in the market and are an important source of information to manage the credit risk.

Government (Central and State) is the largest issuer of debt in the market. Public sector enterprises, quasi government bodies and private sector companies are other issuers. Insurance companies, provident funds, banks, mutual funds, financial institutions, corporates and FPIs are major investors in the market. Government loans are available up to 30 years maturity. Variety of instruments available for investments including plain vanilla bonds, floating rate bonds, money market instruments, structured obligations and interest rate derivatives make it possible to manage the interest rate risk effectively.

Indicative levels of the instruments currently trading as on October 17, 2023 are as follows:

Instrument	Maturity	Tenure	Yield	Liquidity
TREPS / Repo	Short	Overnight	6.75	Very High
CP / CD / T Bills	Short	3 months CP	7.20*	High
		3 months CD	7.18	
		1 Year CP	7.86*	
		1 Year CD	7.58	
Central Government securities	Low to High	10 years	7.32	Medium

These are only indicative levels and are likely to change depending upon the prevailing market conditions.

D. WHERE THE SCHEME WILL INVEST?

Investment in Indian Equity securities:

The Schemes will invest in Equity and Equity related instruments include convertible debentures, equity warrants, convertible preference shares, equity derivatives etc.

The investment restrictions and limitations are specified in Schedule VII of SEBI (Mutual Funds) Regulations, 1996, the details of which are given below in “Section I - What are the Investment Restrictions”.

Investment in Debt securities:

The Schemes may invest in Money market instruments including, but not limited to Treasury Bills, Commercial Paper of Public Sector Undertakings and Private Sector Corporate Entities, Term Money, Tri-party repo Certificates of Deposit of Scheduled Commercial Banks, Financial Institutions and Development Financial Institutions, Government securities with unexpired maturity of one year or less and other Money Market securities as may be permitted by SEBI/RBI from time to time and in the manner prescribed under the Regulations.

The Schemes may also invest into debt securities including, but not limited to, debt Obligations of the Government of India, State and Local Governments, Government Agencies, Statutory Bodies, Public Sector Undertakings, Public Sector Banks or Private Sector Banks or any other Banks, Financial Institutions, Development Financial Institutions, and Corporate Entities, Securitised debt (asset backed securities, mortgage backed securities, pass through certificates, collateralised debt obligations or any other instruments as may be prevailing and permissible under the Regulations from time to time).

Investment in Derivatives:

Concepts and Examples of investing into Derivatives:

Derivatives are financial contracts of pre-determined fixed duration, whose values are derived from the value of an underlying primary financial instrument, commodity or index, such as: interest rates, exchange rates, commodities and equities.

- Futures**

A futures contract is an agreement between the buyer and the seller for the purchase and sale of a particular asset at a specific price on a specific future date. The price at which the underlying asset would change hands in the future is agreed upon at the time of entering into the contract. The actual purchase or sale of the underlying asset involving payment of cash and delivery of the instrument does not take place until the contracted date of delivery. A futures contract involves an obligation on both the parties to fulfill the terms of the contract.

Currently, futures contracts have a maximum expiration cycle of 3-months. Three contracts are available at any time for trading, with 1 month, 2 months and 3 months expiry respectively. Futures contracts typically expire on the last Thursday of the month. For example, a contract with the January expiration expires on the last Thursday of January.

A futures contract on the stock market index gives its owner the right and obligation to buy or sell the portfolio of stocks characterized by the index. Stock index futures are cash settled; there is no delivery of the underlying stocks.

Let us assume that the Nifty Index at the beginning of the month October 2017 was 5070 and three index futures as under were available:

Expiry Month	Bid Price	Offer Price
October 2017	5075	5080
November 2017	5085	5090

December 2017	5095	5100
---------------	------	------

The Scheme could buy an index future of October, 2017 at the offer price of Rs. 5080. The Fund will be required to pay the initial margin as required by the exchanges.

The following is a hypothetical example of a typical trade in index future and the costs associated with the trade.

Particulars	Index Future	Actual Purchase of Stocks
Index as on beginning October 2017	5070	5070
October 2017 Futures Price	5080	-
1. Carry Cost associated with Futures	10 (5080-5070)	
2. Brokerage Cost @ 0.02% for Index Future and 0.03% for Cash Markets	1.016 (0.02% of 5080)	1.521 (0.03% of 5070)
3. Securities Transaction Tax (STT) STT on purchase of index futures – NIL STT on purchase of stocks – 0.02%	NIL (0% of 5080)	1.014 (0.02% of 5070)
4. Gain on Surplus Funds (Assumed 6% returns on 75% of the money left after paying margin of 25%)	18.74 (6%*(100% of 5070 – 25% of 5080)*30/365)	NIL
Spot Market Price at the expiry of October Contract	5569	5569
5. Brokerage Cost on Sale @ 0.02% for Index Future and 0.03% for Cash Markets	1.114 (0.02% of 5569)	1.671 (0.03% of 5569)
6. Securities Transaction Tax STT on sale of index future – 0.02% STT on sale of stocks – 0.02%	1.114 (0.02% of 5569)	1.114 (0.02% of 5569)
Total Cost (1+2+3-4+5+6)	-5.50	5.32

Please note that the above example is based on assumptions and is used only for illustrative purposes (including an assumption that there will be a gain pursuant to investment in index futures). As can be seen in the above example, the costs associated with the trade in futures are less than that associated with the trade in actual stock. Thus, in the above example the futures trade seems to be more profitable than the trade in actual stock. However, buying of the index future may not be beneficial as compared to buying stocks if the execution and brokerage costs on purchase of index futures are high and the return on surplus funds are low. The actual returns may vary based on actuals and depends on final guidelines / procedures and trading mechanism as envisaged by stock exchanges and other regulatory authorities.

The actual returns may vary based on actuals and depends on final guidelines / procedures and trading mechanism as envisaged by stock exchanges and other regulatory authorities.

- **Options**

An option is a contract which provides the buyer of the option (also called the holder) the right, without the obligation, to buy or sell a specified asset at an agreed price on or upto a particular date. For acquiring this right the buyer has to pay a premium to the seller. The seller on the other hand has the obligation to buy or sell that specified asset at the agreed price. The premium is determined considering number of factors such as the underlying asset's market price, the number of days to expiration, strike price of the option, the volatility of the underlying asset and the risk less rate of return. The strike price, the expiration date and the market lots are specified by the exchanges.

An option contract may be of two kinds, viz., a call option or a put option. An option that provides the buyer the right to buy is a call option. The buyer of the call option (known as the holder of the option) can call upon the seller of the option (known as writer of the option) and buy from him the underlying asset at the agreed price at any time on or before the expiry date of the option. The seller of the option has to fulfill the obligation on exercise of the option.

The right to sell is called a put option. Here, the buyer of the option can exercise his right to sell the underlying asset to the seller of the option at the agreed price.

Options are of two types: European and American. In a European option, the holder of the option can only exercise his right on the date of expiration. In an American option, he can exercise this right anytime between the purchase date and the expiration date.

Example of options

Buying a Call option: Assume that the Scheme buys a call option at the strike price of Rs. 5,000 and pays a premium of Rs. 100. If the market price of the underlying stock on the date of expiry of the option is Rs. 5,400 (i.e. more than Rs. 5,000 which is the strike price of an option), the Scheme will exercise the option. However, it may not result into profit. The profit is made only in those circumstances when the intrinsic value (5400 (spot price)-5000(strike price)) is greater than cost paid i.e. option premium (100). If on the date of the expiry of the option, the market price of the underlying stock is Rs. 4,900, the Scheme will not exercise the option and it shall lose the premium of Rs. 100.

Thus, in the above example, the loss for the Scheme, as the buyer of the option, is limited to the premium paid by him while the gains are unlimited.

Writing a Call Option: Assume that the Scheme writes a call option at the strike price of Rs. 5,000 and earns a premium of Rs. 100. If the market price of the underlying stock on the date of expiry increases to Rs. 5,400 (i.e. more than Rs. 5,000) then the option is exercised. The Scheme earns the premium of Rs. 100/- but loses the difference between the market price and the exercise price i.e. Rs. 400/-. In case the market price of the underlying stock decreases to Rs. 4,900, the Scheme gets to keep the premium of Rs.100.

Buying a Put Option: Assume that the Scheme buys a put option at the strike price of Rs.5,000 and pays a premium of Rs. 100. If the market price of the underlying stock decreases to Rs. 4,850 (i.e. less than strike price of 5000) the Scheme would be protected from the downside and would exercise the put option. However, it may not result into profit. The profit is resulted only when the intrinsic value (5000 (strike price)- 4850(spot price)) is greater than the cost paid i.e. option premium of 100. Whereas if the stock price moves up to say Rs. 5,150 the Scheme may let the option expire and forego the premium.

Writing a Put Option: Assume that the Scheme writes a put option at the strike price of Rs. 5,000 and earns a premium of Rs. 100. If the market value of the underlying stock decreases to Rs. 4,850, the put option will be exercised and the Scheme will earn the premium of Rs. 100 but loses the difference between the exercise price and the market price which is Rs. 150. However if the market price of the underlying stock is Rs. 5,150, the option-holder will not exercise the option. As a result of which the option will expire and the Scheme will earn the premium income of Rs. 100.

However, as per the Clause 12.25 of SEBI Master circular dated May 19, 2023, the Scheme shall not write options or purchase instruments with embedded written options. The above explanations are only for illustrative purpose.

A forward contract is a transaction in which the buyer and the seller agree upon the delivery of a specified quality (if commodity) and quantity of underlying asset at a predetermined rate on a specified future date.

Please note that the above examples are based on assumptions and are used only for illustrative purposes. Risks associated with investment strategy which may be followed by the fund managers for investment in derivatives:

Execution of investment strategies depends upon the ability of the fund manager to identify such opportunities which may not be available at all times. Identification and execution of the strategies to be pursued by the fund manager involve uncertainty and decision of fund manager may not always be profitable.

The Scheme may face execution risk, whereby the rates seen on the screen may not be the rate at which the ultimate execution of the derivative transaction takes place.

For details of Investments Limitations and Restrictions in Derivatives, kindly refer Section ‘I. What are the Investment Restrictions?’

E. WHAT ARE THE INVESTMENT STRATEGIES?

The Consumer Investment Theme responds to lasting changes in the emerging and developed markets. The AMC’s strong conviction in long-term opportunities of the consumer theme in India especially has led to develop Mirae Asset Great Consumer Fund. Mirae Asset Great Consumer Fund aims to capture the wide-ranging investment opportunities presented by this trend. It does not focus solely on the consumer sector but on a broad range of sectors that will benefit from increased consumption. The portfolio manager aims to construct a concentrated portfolio of stocks based on high conviction investment ideas. The fund manager may not have any bias towards particular market cap or style in selecting investment opportunities.

Risk control:

The AMC will endeavor to mitigate risks by adopting the following measures:

- a. The Fund Manager may diversify its portfolio across various sectors instead of concentrating on few sectors to mitigate sectoral risk.
- b. The Fund Manager may try to have a large base of stocks in the portfolio to avoid concentration risk and liquidity risk.
- c. The Fund Managers may monitor the trading volumes in a particular stock before investment to avoid liquidity risk.
- d. Fund Managers will invest in companies that benefit from macroeconomic, industry and sectoral trends related to the investment objective of the scheme, (Top down Theme Overlay) after doing bottom up analysis and due diligence, quality of management in terms of corporate governance and commitment to minority shareholders etc.

Policy for Investment decisions

The investment policy of the AMC has been determined by the Investment Committee (“IC”) which has been ratified by the Boards of the AMC and Trustee. At the strategic level, the broad investment philosophy of the AMC and the authorized exposure limits are spelt out in the Investment Policy of the AMC. During trading hours, the Fund Managers have the discretion to take investment decisions for the Scheme within the limits defined in the Investment Policy, these decisions and the reasons thereof are communicated to the CEO for post facto approval.

The designated Fund Manager(s) of the Scheme will be responsible for taking day-to-day investment decisions and will inter-alia be responsible for asset allocation, security selection and timing of investment decisions.

Portfolio Turnover Policy

Portfolio turnover is defined as the aggregate value of purchases or sales as a percentage of the corpus of a scheme during a specified period. The Scheme is open ended, with subscriptions and redemptions expected

on a daily basis, resulting in net inflow /outflow of funds, and on account of the various factors that affect portfolio turnover, it is difficult to give an estimate, with any reasonable amount of accuracy.

However, during volatile market conditions, the fund manager has the flexibility to churn the portfolio actively to optimize returns keeping in mind the cost associated with it.

F. FUNDAMENTAL ATTRIBUTES

Following are the fundamental attributes of the scheme, in terms of Regulation 18(15A) of the SEBI (MF) Regulations:

(i) Type of Scheme:

An open ended equity scheme following consumption theme.

(ii) Investment Objective:

The investment objective of the scheme is to generate long term capital appreciation by investing in a portfolio of companies/funds that are likely to benefit either directly or indirectly from consumption led demand in India. The Scheme does not guarantee or assure any returns.

(iii) Asset allocation:

Please refer to ‘Section II - C. Asset Allocation and Investment Pattern’ of this SID for details.

(iv) Terms of Issue:

(a) Listing :

The Scheme being open ended, the Units are not proposed to be listed on any stock exchange and no transfer facility on the exchange is provided. However, the Trustee reserves the right to list the units as and when open-end Schemes are permitted to be listed under the Regulations, and if the Trustee considers it necessary in the interest of unit holders of the Scheme.

(b) Redemption of Units:

The Unit Holder has the option to request for Redemption either in amount in rupees or in number of Units. In case the request for Redemption specifies both, i.e. amount in rupees as well the number of Units to be redeemed, then the latter will be considered as the redemption request and redemption will be processed accordingly.

The minimum redemption amount shall be ‘any amount’ or ‘any number of units’ as requested by the investor at the time of redemption request. The Trustees have authorized the AMC to suo-moto redeem such fractional balance units (less than 1 unit), on periodic basis across all schemes, as and when decided by the AMC.

Units can be redeemed (sold back to the Fund) at the Redemption Price during the Ongoing Offer Period. If an investor has purchased Units of a Scheme on more than one Business Day the Units will be redeemed on a first-in-first-out basis. If multiple Purchases are made on the same day, the Purchase appearing earliest in the account statement will be redeemed first.

Redemption Price:

The Redemption Price of the Units is the price at which a Unit Holder can redeem Units of a scheme. It will be calculated as described below:

Redemption Price = Applicable NAV - (Applicable NAV x Exit Load*)

* Exit Load, whichever is applicable, will be charged.

Redemption Price will be calculated for up to three decimal places for the Scheme.

For example, if the Applicable NAV of a Scheme is Rs.10, and it has a 2% Exit Load, the Redemption Price will be calculated as follows:

$$\text{Redemption Price} = 10.555 - (10.555 \times 2.00\%) \text{ i.e. } 10.455 - 0.211 = 10.344$$

If the Scheme has no Exit Load, the Redemption Price will be equal to the Applicable NAV.

The Securities Transaction Tax levied under the Income Tax Act, 1961, at the applicable rate on the amount of redemption will be reduced from the amount of redemption.

To illustrate:

If a Redemption of 4,900 units is sought by the Unit Holder at a Redemption Price of Rs. 10.344 (as calculated above), the redemption amount is Rs. 50,685.60. Securities Transaction Tax (STT) for instance is 0.001%. This will be further reduced by the STT of Re. 0.50 (i.e. Rs. 50,685.60 x 0.001%), making the net redemption amount Rs. 50,685.10.

If a Redemption of Rs. 10,000 is sought by the Unit Holder at a Net Redemption Price of Rs. 10.344 (as calculated above), which will give 966.744 Units; the effective redemption amount will be grossed up to Rs. 10,204.08 (i.e. $10,000 \div (1-2\%)$) and 966.744 units ($10,204.08 \div 10.555$) will be redeemed. This is to ensure that the Unit Holder receives the net amount of Rs. 10,000 as desired.

Investors may note that the Trustee has a right to modify the existing Load structure in any manner subject to a maximum as prescribed under the Regulations and with prospective effect only.

Please refer section - LOAD STRUCTURE.

Applicable NAV for Redemption:

For Redemption / Switch Out / Systematic Transfer Plan

- In respect of valid Redemption applications accepted at a Designated Collection Centre up to 3 p.m. on a Business Day, the NAV of such day will be applicable.
- In respect of valid Redemption applications accepted at a Designated Collection Centre after 3 p.m. on a Business Day, the NAV of the next Business Day will be applicable.

(c) Aggregate fees and expenses charged to the scheme:

Please refer, “Section VII. Fees and Expenses”

- (d) There is no assurance OR guarantee of returns.

Change in the fundamental attributes of the Schemes:

In accordance with Regulation 18(15A) of the Regulations, the Trustee shall ensure that no change in the fundamental attributes of the Scheme or the Fund or the fees and expenses payable or any other change which would modify the Scheme and affect the interest of the Unit Holders will be carried out unless:

- A written communication about the proposed change is sent to each Unit Holder and an advertisement is given in one English daily newspaper having nationwide circulation as well as in a Marathi daily newspaper with wide circulation published in Mumbai (as the head office of the Fund is situated there); and
- The Unit holders are given an option to exit for a period of 30 days to exit at the prevailing Net Asset Value without any exit Load.

Further, before effecting any such change, the Trustees shall obtain comments from SEBI.

Fundamental attributes will not cover changes to the Scheme made in order to comply with changes in regulation with which the Scheme has been required to comply.

G. HOW WILL THE SCHEMES BENCHMARK THEIR PERFORMANCE?

The performance of the scheme will be benchmarked to the performance of **Nifty India Consumption Index (TRI)**. The above benchmark is in accordance with Clause 1.9 of SEBI Master Circular dated May 19, 2023 on ‘Guiding Principles for bringing uniformity in Benchmarks of Mutual Fund Schemes’.

The same has been chosen as the benchmark as the asset allocation pattern of the benchmark is in conformity with the declared asset allocation pattern of the scheme in the Scheme Information Document.

The performances of the schemes of the Mutual Fund are reviewed by the Investment Committee (“IC”) as well as the Board of Directors of the AMC and Trustee periodically. The IC is operational at the AMC level and has majority representation from the senior management of the company. Monthly reports on the performance of the schemes with appropriate benchmark indices are also sent to the Directors of the AMC and Trustee and also with the relative performance of the schemes of other mutual funds schemes in the same category which is placed with the Board of Directors of the AMC and Trustee. Further, in terms of clause 6.14 of SEBI Master Circular dated May 19, 2023 the performance of the schemes will be benchmarked against the performance of respective benchmarks. Since the scheme is managed with no bias towards any theme, sector, market cap or style, a suitable benchmark indexes have been chosen as the benchmark.

The performance of the Scheme compared to its benchmark index will be reviewed at every meeting of the Board of Directors of the AMC and Trustee and corrective action as proposed will be taken in case of unsatisfactory performance.

In terms of clause 1.8 of SEBI Master Circular dated May 19, 2023 the AMC and Trustee may change the benchmark index or select an additional benchmark index after recording adequate justification for carrying out such change. However, change of benchmark index and/or selecting additional benchmark indices would be done in complete compliance of the relevant guidelines of SEBI in this regard.

ii. Systematic Transfer Plan (STP)

This facility enables Unit Holders to transfer fixed sums from their Unit accounts in the Scheme to the existing schemes or other schemes launched by the Fund from time to time. The transfer will commence from the date mentioned by the Unit Holder in the Application Form for the facility. A minimum period of 5 days shall be required for registration under STP. The Units will be allotted / redeemed at the Applicable NAV of the respective dates of the Scheme on which such transfers are sought from the Scheme. In case the day on which the transfer is sought is a non-Business Day for the Scheme, then the application for the facility will be deemed to have been received on the immediately following Business Day. The facility of STP will not be available from any existing equity / equity oriented schemes to a non-equity scheme of the Fund. STP is not available for investments under lock-in period and for investments which are pledged.

Methodology:

The Unitholder has to ensure to maintain minimum balance in accordance with Plans selected in the Transferor Scheme on the transfer date / execution date under Systematic Transfer Plan.

In case of insufficient balance on the date of transfer in the folio, STP for that particular due date will be processed based on the clear balance available in the scheme. In such cases where STPs are processed due to insufficient balance, the criteria for minimum application amount in the transferee scheme shall not apply except in case of Mirae Asset Tax Saver Fund. However such residual transfer due to insufficient balance shall be done only once during the tenure of STP. For future STPs, in case the unitholder has sufficient balance, the amount as mentioned in the STP form shall be processed.

However, future STPs will continue to be active. This will help the investor to continue his STP facility seamlessly. Moreover, if the investor continues to have insufficient balance / unclear units for 3 consecutive months, the STP will be discontinued.

Following are the features of Variable Transfer Plan (VTP):

- Under the Variable Transfer Plan, unit holders will be eligible to transfer:
Fixed Amount per installment OR the amount as determined by the following formula:-

[(Fixed amount to be transferred per installment X number of installments including the current installment) - market value of the investments through Variable Transfer Plan in the Target Scheme on the date of transfer] whichever is higher, on the date of transfer.

- The first VTP installment will be processed basis the fixed installment amount specified by the unit holder at the time of enrollment. From the second VTP installment onwards, the transfer amount shall be computed as per formula stated above.
- In case of VTP - Daily, Weekly and Fortnightly Interval, the commencement date shall be within 5 business days from the date of receipt of a valid request.
- For Daily, Weekly, Monthly, Fortnightly or Quarterly VTP falling on a Friday or on any business day where the next day is a non-business day, the NAV applicable shall be the Transaction date i.e. before 3.00 p.m. for both source and the target scheme.
- In order to discontinue the facility, a written request must be submitted at least 5 business days prior to the next applicable transfer date for the selected frequency.
- This facility introduced under the scheme will have the same investment objective, portfolio, liquidity and expense ratio as that of the prevailing plans of the respective schemes.

Example of Calculation of Installment of Variable Transfer Plan:

Source Scheme: Mirae Asset Savings Fund

Target Scheme: Mirae Asset Emerging Bluechip Fund

Suppose an investor chose a monthly VTP option from Mirae Asset Savings Fund to Mirae Asset Emerging Bluechip Fund of amount Rs.5000/- and he has already transferred three installments upto date August 1, 2015.

Total units allotted upto the date of last installment i.e. August 1, 2015 is assumed as 1400. The NAV of Mirae Asset Emerging Bluechip Fund - Growth Option on September 2015 is assumed as Rs.9.50 - per unit.

So the market value of investment on the date of transfer is 13,300 (1400 x 9.5).The next installment as per the VTP will be calculated as per the following formulae: Higher of the following, Fixed Amount to be transferred per installment (Rs.5,000/-) OR [(Fixed Amount to be transferred per installment * Number of Installment including current installment) - Market Value of Target Scheme] = (Rs.5000*4) - 13,300 = Rs.6,700/-. So Rs.6,700/- will be transferred under the VTP.

For details on Frequency and minimum applicable amount for SIP, STP and VTP refer the table below:

Facility	Frequency	Day/Date	Criteria*
STP and VTP	Daily	Monday to Friday	Minimum 5 Transfers of Rs.1000 each and in multiples of Re. 1/- thereafter.
	Weekly	Every Wednesday	
	Fortnightly	Every Wednesday of the alternate week.	
SIP	Monthly	01st to 28th except the last three calendar dates 29th, 30th and 31st.	Minimum balance amount at the time of enrolment of STP and VTP: NIL
	Quarterly		
STP and VTP	Monthly	01 st , 10 th , 15 th , 21 st and 28 th .	
	Quarterly		

***Notes:**

Each STP/VTP Installment ‘OUT’ to / of Mirae Asset Tax Saver Fund will be subject to a lock- in period of three years from the date of allotment of Units proposed to be redeemed. Hence, Mirae Asset Tax Saver Fund shall act as Source Scheme for STP/VTP post completion of the said lock-in period.

In the interest of investors, it is hereby clarified that where the switch request has been made from one scheme to another specifying the number of Units or Amount (during NFO as well as ongoing), the request will be processed for the corresponding value of such units or amount and that the allotment in the resultant scheme may be done in fractional units, subject to fulfillment of the minimum purchase amount of the scheme where it is

being switched.

viii. Folio Number

Unless otherwise requested by the Unit Holder, a single folio number may be assigned if an investor invests in different schemes of the Fund, and a consolidated account statement will then be provided for investments in all the schemes.

A list of such circumstances are as follows:</p> <ul style="list-style-type: none"> • Liquidity issues: when market at large becomes illiquid affecting almost all securities rather than any issuer specific security. • Market failures, exchange closures - when markets are affected by unexpected events which impact the functioning of exchanges or the regular course of transactions. Such unexpected events could also be related to political, economic, military, monetary or other emergencies • Operational issues - when exceptional circumstances are caused by force majeure, unpredictable operational problems and technical failures (e.g. a black out). • If so directed by SEBI. <p>Since the occurrence of the abovementioned eventualities have the ability to impact the overall market and liquidity situations, the same may result in exceptionally large number of Redemption being made and in such a situation the indicative timeline (i.e. within 3 to 4 Business Days for schemes other than liquid funds and within 1 Business Day for liquid funds) mentioned by the Fund in the scheme offering documents, for processing of request of Redemption may not be applicable.</p> <p>Any restriction on Redemption or suspend Redemption of the Units in the scheme(s) of the Fund shall be made applicable only after prior approval of the Board of Directors of the AMC and Trustee Company.</p>

<p>Applicability of Stamp Duty</p>	<p>Pursuant to Notification No. S. O. 1226 (E) and G.S.R 226(E) dated March 30, 2020 issued by Department of Revenue, Ministry of Finance, Government of India, read with Part I of Chapter IV of Notification dated February 21, 2019 issued by Legislative Department, Ministry of Law and Justice, Government of India on the Finance Act, 2019, a stamp duty @ 0.005% of the transaction</p>

	<p>value shall be levied on applicable mutual fund transactions.</p> <p>Accordingly, pursuant to levy of stamp duty, the number of units allotted on purchase transactions (including reinvestment of IDCW) to the unitholders would be reduced to that extent. The stamp duty will be deducted from the net investment amount i.e. gross investment amount less any other deduction like transaction charge. Units will be created only for the balance amount i.e. Net Investment Amount as reduced by the stamp duty. The stamp duty will be computed at the rate of 0.005% on an inclusive method basis.</p> <p>For instance: If the transaction amount is Rs. 100100 /- and the transaction charge is Rs. 100, the stamp duty will be calculated as follows: $((\text{Transaction Amount} - \text{Transaction Charge}) * 0.005\%) = \text{Rs. } 5$. If the applicable Net Asset Value (NAV) is Rs. 10 per unit, then units allotted will be calculated as follows: $(\text{Transaction Amount} - \text{Transaction Charge} - \text{Stamp Duty}) / \text{Applicable NAV} = 9,999.50$ units.</p> <p>Please refer Statement of Additional Information for more details.</p>

D COMPUTATION OF NAV

The NAV of the Units of the Scheme will be computed by dividing the net assets of the Scheme by the number of Units outstanding on the valuation date.

NAV of Units under the Scheme or the Options there under can be calculated as shown below:

$$\text{NAV} = \frac{(\text{Market or Fair Value of Scheme's investments} + \text{Current assets including Accrued Income} - \text{Current Liabilities and provisions including accrued expenses})}{\text{No. of Units outstanding under the Scheme/Option.}}$$

The NAV, the sale and repurchase prices of the Units will be calculated and announced at the close of each working day. The NAVs of the Scheme will be computed and units will be allotted upto 3 decimals.

Computation of NAV will be done after taking into account IDCW paid, if any, and the distribution tax thereon, if applicable. Therefore, once IDCW are distributed under the IDCW Option, the NAV of the Units under the IDCW Option would always remain lower than the NAV of the Units issued under the Growth Option. The income earned and the profits realized in respect of the Units issued under the Growth Option remain invested and are reflected in the NAV of the Units.

The valuation of the Schemes' assets and calculation of the Schemes' NAVs shall be subject to audit on an annual basis and such regulations as may be prescribed by SEBI from time to time.

Valuation of Foreign Exchange Currency:

On the Valuation Day, the securities issued outside India and listed on the stock exchanges outside India shall be valued at the closing price on the stock exchange at which it is listed or at the last available traded price. However, in case a security is listed on more than one stock exchange, the AMC reserves the right to determine the stock exchange, the price of which would be used for the purpose of valuation of that security.

Further, in case of extreme volatility in the international markets, the securities listed in those markets may be valued on a fair value basis. In case the closing prices of securities are not available within the above mentioned time frame, the AMC may use the last available traded price for the purpose of valuation.

On the Valuation Day, all assets and liabilities denominated in foreign currency will be valued in Indian Rupees at the exchange rate available on Bloomberg/Reuters/RBI or any other standard reference rate at the close of banking hours in India. The Trustees reserve the right to change the source for determining the exchange rate. The exchange gain/loss resulting from the aforesaid conversion shall be recognized as unrealized exchange gain/loss in the books of the Scheme on the day of valuation. Further, the exchange gain/loss resulting from the settlement of assets/liabilities denominated in foreign currency shall be recognized as realized exchange gain/loss in the books of the scheme on the settlement of such assets/liabilities.

Investors are advised to contact any of the ISCs or the AMC by calling the investor line of the AMC at "1800 2090 777 " (toll-free) to know the current applicable load structure prior to investing. Investors can also visit the website at www.miraeassetmf.co.in, for complete details.

Entry Load: Not Applicable: In accordance with clause 10.4 of SEBI Master Circular dated May 19, 2023 no entry load will be charged by the Scheme to the investor. - Any other measures which the mutual funds may feel necessary.

The AMC may change the load from time to time and in case of an exit/repurchase load this may be linked to the period of holding. The load charged could also be different as regards the amount/tenor of investment, etc. It may be noted that any such change in the load structure shall be applicable on prospective investment only.

The distributors should disclose all the commissions (in the form of trail commission or any other mode) payable to them for the different competing schemes of various mutual funds from amongst which the scheme is being recommended to the investor.
